

Guided Case Conversation – Peer Engagement Form

Conservation Biology

Your name: _____ **Date:** _____

Please answer each prompt in **2–4 sentences**. These are graded for **completion**, not correctness.

1. Identify **one metric, indicator, or proxy** used in today's case to assess threats, progress, or success.

2. Name **one concept from this course** (e.g., extinction risk, habitat fragmentation, genetic diversity, metapopulations, overexploitation) that helped you understand the case. *How did this concept clarify the conservation decision or tradeoffs involved?*

3. Identify **one ethical, social, or equity-related issue** raised by the case or discussion. Who benefited? Who bore costs or risks? Whose perspectives may have been missing?

4. What is **one question, uncertainty, or concern** you still have about this conservation decision?
Hint: This could relate to: long-term outcomes, unintended consequences, alternative strategies, or the limits of available data

Submit this form at the end of class **5 points for completion**
