

Association of Zoos & Aquariums

2023 AZA CONSERVATION GRANTS FUND

Application Instructions

DEADLINE

This 2023 Conservation Grants Fund (CGF) electronic application must be used for all proposals. Completed applications must be submitted via email no later than **5:00 p.m. EDT** on **15 March 2023**. An auto-response email with a time-stamp will confirm receipt of the application.

*Incomplete applications, or applications received after 5:00 p.m. EDT on 15 March 2023, **regardless of cause, will NOT be eligible for consideration. NO DEADLINE EXCEPTIONS WILL BE MADE.***

MEMBERSHIP

The Principal Investigator (PI) and all Co-Investigators (CIs) *must be individual AZA members* at the Professional Associate, Professional Affiliate, Professional Fellow, or Student level. Institutional membership does not count as individual membership and individual members at the Friend level are not eligible. Other participants actively involved in the completion of the project should be listed as collaborators and are not required to be AZA members. To apply for membership, visit <https://www.aza.org/individual-membership>.

FUNDING TIMELINE

All CGF projects must be completed within 12 months. CGF grants are intended to serve as seed money to attract additional funding and proposals should request funds only for this one-year period. Identical components of a project will not be funded for more than two grant cycles; however, funding requests for different components of the same project may be applied for in subsequent grant cycles.

CGF proposals undergo a two-tiered review process, outlined at <https://www.aza.org/cgf-selection-process>. Applicants will be notified of funding decisions in early September 2023 and funds will be available 2 October 2023. CGF funds can only be used for proposal expenses incurred on or after the award date. Expenses incurred prior to the award date will not be covered by CGF funds.

APPLICATION GUIDELINES

The application and all supplemental forms are posted online at: <http://www.aza.org/cgf-information-for-applicants/>. These documents contain form fields that must be completed and submitted via email to: CGFapp@aza.org. *All application materials must be in electronic format. No hard copies of any application materials will be accepted.*

It is strongly recommended that you save a copy of your completed application and supplemental forms as a backup. Only completed applications, submitted by the deadline defined above, will be reviewed. Applicants will be informed electronically if their application is incomplete.

APPLICATION INSTRUCTIONS AND CHECKLIST: All completed application materials must be submitted **in one email** by the deadline identified above and include the following:

Application: The application is one document consisting of the three sections outlined below. All sections must be complete in order for the application to be considered complete. The application must be submitted as a Microsoft Word document titled **"Application"** and attached to your Application email.

Applications submitted in Portable Document Format (PDF) will NOT be eligible for consideration. NO EXCEPTIONS WILL BE MADE.

Note that “spell checker” and “track changes” functions cannot be used in this form. AZA strongly recommends that applicants compose the content for their application in a separate document to make use of these features, and then copy and paste the final text into the form fields. When composing in a separate document, be aware of character limitations. If the copied text exceeds the character limit when pasted into a form field, *all text exceeding the character limitation will be cut off and will not appear in the final proposal.* Character limits include spaces.

Also note that certain formatting such as italics, bold, and underlining, is unavailable due to the application format. AZA recommends the use of numbering and spacing to emphasize important points in the text.

- ☒ **Cover Sheet.** Fill in the text fields for the project title, amount requested, and PI and CI information. Choose *two* project categories from the given list and identify the SAFE species that is (are) the focus of the project. Include a project abstract of 1500 or fewer characters.
- ☒ **Project Proposal.** Text fields are provided for responses to questions 1-12. Fields have a limit on the number of characters that may be used to keep the application concise. Character limits, including spaces, are stated following each question. If a question is not applicable to your proposal, write “N/A” in the field but *do not leave any form fields blank*, as this may delay processing of your application.
- ☒ **Budget.** Required budgetary information includes:
 - ☒ Detailed Project Budget. Detail how the budget will be allocated to specific items and indicate which funding source will pay for each item. State the total project budget, the amount requested from CGF, and other financial support applied for or received. Each of these amounts should reflect the one-year duration of the project. Funding decisions are announced in early September and CGF funds are to be used for work from the announcement date forward. Expenses incurred prior to the announcement will not be covered by CGF funds.
 - ☒ Budget Justification. Provide an explanation of why specific major items are essential to the project and reasonable in cost.

Required Attachments: The following must be attached to your Application email:

- ☒ **Curricula Vitae (CV).** A CV is required for each PI and CI listed on the Cover Sheet and must follow the format stated in these guidelines. CVs must not exceed two letter-sized (8.5 by 11 inch) pages each and must be typed in a legible font size (12 point recommended); each side of the paper counts as one page. CVs may be attached for collaborators but are not required. Each CV must be submitted as a separate document entitled, “**CV Investigator’s Last Name.**” CVs *exceeding the maximum length will be cut off at the second page.*
- ☒ **Statement of Institutional Support Forms.** Electronically signed *Statements of Institutional Support* from the CEO(s)/Institutional Director(s) (not the COO, General Curator, Vice President, Dean, or Department Director) of the PI’s institution and **each** CI institution *and* collaborating institution must be attached to the Application email as separate documents titled “**SIS Institution’s Name.**” The *Statement of Institutional Support* form can be found with the rest of the Application materials on the AZA website identified above.

Applicants wishing to include support letters from entities *other than* PI and CI institutions, collaborating institutions may submit such items as appendices.

Letters of support from PI and CI institutions and collaborating institutions will not be accepted in lieu of the *Statement of Institutional Support* form.

- ☒ **Statement of SAFE Species Program Alignment Forms.** Electronically signed *Statements of SAFE Species Program Alignment* from the program leader of relevant SAFE species program(s) must be attached to the Application email as separate documents titled “**SOA SAFE Species Program Name.**” The *Statement of SAFE Species Program Alignment* form can be found with the rest of the Application materials on the AZA website identified above.

Letters of support/endorsement from AZA Programs (Taxon Advisory Groups, Species Survival Plans®, SAFE) are **not** accepted, although coordination with AZA SAFE Programs is expected and should be described in Question 1. To assure program review of relevant submissions, AZA SAFE or Animal Program Leaders may serve as expert reviewers in the application review process and may express their support for a proposal at that time.

- ☒ **Permits.** If permits are required to complete your proposed project, you must attach a copy of each to your Application email. Each permit attached to the Application email must be titled “**Permit #.**” *If you are not able to obtain a required permit before submitting this proposal, you must submit it by 15 June 2023 to ensure award eligibility.*
- ☐ **Proposal Resubmission Form.** If a proposal for this project was previously submitted for AZA grant funding (i.e., CGF or SAFE granting program) and rejected, the revised proposal *must* include a completed *Proposal Resubmission Form* as an attachment on the Application email. This attachment must be submitted as a Microsoft Word document titled “**Resubmission Form**” and attached to your Application email. *Resubmission forms submitted in Portable Document Format (PDF) will not be accepted.* The form can be found with the rest of the Application materials on the AZA website identified above.

Note: Proposals that fail to provide all items identified in the above checklist in the correct format will not be reviewed.

Non-Required Attachments: The following attachments to your Application email are optional:

- ☒ **Citations (recommended).** Citations/references for statements made in the Application should be included in a separate document titled “**Citations**” and attached to the Application email.
- ☒ **Appendices.** Appendices are allowed, but may only *clarify*, and not *supplement*, information in the narrative. For example, photos or diagrams would be acceptable, but not videos, publications, or SAFE species program plans. Appendices must be attached to the Application email titled “**Appendix #.**”

Note: Appendices that do not adhere to these guidelines will be removed from the proposal prior to review.

SUBMISSION INSTRUCTIONS

By submitting your application, you agree, if funded, to abide by the Grant Terms and Conditions posted on AZA’s website at <http://www.aza.org/cgf-information-for-applicants/>.

Proposals must be submitted electronically using the 2023 Application and related forms via a **single email, with the proposal title as the subject line**, to CGFapp@aza.org no later than 5:00 p.m. EDT on 15 March 2023. Hard copies of any application materials or applications received after this deadline will not be accepted regardless of cause.

AZA's email system accepts messages up to 8 MB in size. In cases when applications are too large to be accepted in one email, AZA will accept the application submission in two separate emails, provided that the same proposal title is identified in the subject line of each.

The 2023 Application email **must** include the following attachments

- Application (this completed form);
- CVs for each Principal and Co- Investigator(s);
- Statements of Institutional Support for each PI and CI institution and collaborating institution;
- Statement(s) of SAFE Species Program Support; and
- A Proposal Resubmission form, if applicable.

The Application email may also include citation and appendices attachments.

Auto-response emails will be sent to applicants confirming receipt of the application package. If an auto-response is not received, please resubmit the application. If an applicant submits more than one proposal, the person should ensure that an auto-response was received for *each* submission. If submission problems arise, contact the AZA office at 301-562-0777. If you submit your application after the 5:00 p.m. deadline, you may still receive an auto-response from the Application inbox; however, your proposal will not be reviewed.

Applications which fail to follow submission instructions or are time-stamped after the deadline will not be considered and applicants will be notified that their application is inadmissible.

APPLICATION ASSISTANCE

The CGF website (<http://www.aza.org/cgf-information-for-applicants/>) contains a wealth of information to help applicants compose a competitive proposal.

Proposals received before 8 March will be reviewed by AZA staff to ensure that the application is completed correctly. Early submission allows time for AZA staff to inform applicants if problems are noted in time for resubmission. Please note that AZA staff does not review early proposals for content.

2023 AZA CONSERVATION GRANTS FUND Cover Sheet

Project Number:
For AZA use only

Title of Project: Screening for Highly Pathogenic Avian Influenza in African penguins admitted for rehabilitation in South Africa

Amount Requested: \$24,002 (round to the nearest whole dollar)

Project Start Date: 1 October 2023 **End Date:** 30 September 2024
(CGF funding is for one year only, beginning no earlier than the award date)

Investigators: Each Principal Investigator (PI) and Co-Investigators (CI) *must be an individual AZA member at the time of application* at the Professional Associate, Professional Affiliate, Professional Fellow, or Student level. Other participants should be listed as collaborators on this form.

A Curriculum Vitae (CV) is required for each PI and CI, and a Statement of Institutional Support (SIS) form is required for each PI and CI Organization.

1. Principal Investigator (PI) Name and Title: Mr Albert Snyman – Researcher

CV Attached? ☒ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (required; available at: <http://www.aza.org/cgf-information-for-applicants/>). ☒

Individual AZA Member Number: 81226568 (required)

Institution/Organization: Southern African Foundation for the Conservation of Coastal Birds (SANCCOB)

Statement of Institutional Support Form Attached? ☒ (required)

Institutional Address: PO Box 11116, Bloubergrant, 7443, South Africa

Phone: +27 21 5576155

E-mail: Albert@sanccob.co.za

2. Co-Investigator (CI) Name and Title: Dr Katrin (Katta) Ludynia – Research Manager

CV Attached? ☒ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (available at: <http://www.aza.org/cgf-information-for-applicants/>). ☒ (required)

Individual AZA Member Number: 81025180 (required)

Institution/Organization: Southern African Foundation for the Conservation of Coastal Birds (SANCCOB)

Statement of Institutional Support Form Attached? ☒ (required)

Institutional Address: PO Box 11116, Bloubergrant, 7443, South Africa

Phone: +27 21 5576155

E-mail: Katta@sanccob.co.za

3. Co-Investigator (CI) Name and Title: Ms Nicola (Nicky) Stander – Head of Conservation

CV Attached? ☒ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (available at: <http://www.aza.org/cgf-information-for-applicants/>). ☒ (required)

Individual AZA Member Number: 81119157 (required)

Institution/Organization: Southern African Foundation for the Conservation of Coastal Birds (SANCCOB)

Statement of Institutional Support Form Attached? ☒ (required)

Institutional Address: PO Box 11116, Bloubergrant, 7443, South Africa

Phone: +27 21 5576155

E-mail: Nicky@sanccob.co.za

Information about additional co-investigators may be included in a separate document titled “**Additional Co-Investigators**” and attached to your Application email.

Collaborating Institutions or Organizations: A collaborating institution is defined as any institution actively involved in the design or completion of the project. Funding institutions *not* actively involved in project design or completion should be listed in the “Grant/Matching Support” section of the Project Budget and need not be listed as collaborators.

List all collaborating institutions below, including the institutions of the PI and CIs listed on the Cover Sheet, as well as those associated with the personnel listed in Question 6, and attach a Statement of Institutional Support form for each collaborating institution to the Application email.

Collaborating Institution Names:

SANCCOB *Statement of Institutional Support* Form Attached? ☒ (required)

N/A *Statement of Institutional Support* Form Attached? ☐ (required)

N/A *Statement of Institutional Support* Form Attached? ☐ (required)

N/A *Statement of Institutional Support* Form Attached? ☐ (required)

N/A *Statement of Institutional Support* Form Attached? ☐ (required)

Note: If additional Collaborating Institutions or Organizations need to be included, add their information in a separate document titled “**Additional Collaborators**” and include it as an attachment to your Application email.

Project Categories (choose two that best describe the project):

☐ Animal / Population Management (*Ex situ*)

☐ Conservation Education / Engagement

☒ Animal Health

☐ Field Conservation (*In situ*)

☐ Animal Welfare

☒ Research

☐ Communications / Public Relations

Identify the SAFE species program(s) this project will benefit: African penguin

Project Abstract (limit 1,500 characters with spaces):

The Endangered African penguin has suffered a recent dramatic population decline primarily from lack of sufficient food, while disease causing high mortalities is an increasing conservation threat. In southern Africa, there have recently been two outbreaks of Highly Pathogenic Avian Influenza (HPAI) with the H5N8 strain in 2018-2019 and the H5N1 strain in 2021-2022, causing high mortalities in several seabird species, including the African penguin. Additionally, In November 2022, the Cape Town seabird hospital was placed under quarantine due to positive HPAI cases.

This project focuses on conducting increased HPAI screening on live African penguins admitted to Southern African Foundation for the Conservation of Coastal Birds (SANCCOB) for rehabilitation, effectively sampling wild birds. We will sample and test 600 African penguins on admission to the Cape Town and Gqeberha centres throughout the year, provide timeous feedback to all authorities, increase biosecurity and waste management at the Cape Town centre, and host internal and external meetings to evaluate the occurrence of, and our response to, regional HPAI outbreaks. All results will increase knowledge of the epidemiology of HPAI. The project is conducted by the team at SANCCOB who have dealt with the prior HPAI outbreaks in southern Africa. As this is a pilot programme, we will also evaluate the effectiveness of the increased screening and the conservation value provided for disease (particularly HPAI) surveillance.

2023 AZA CONSERVATION GRANTS FUND

Project Proposal

1. Describe the overall project and its significance for conservation and/or management. What species, sites, habitats, populations, or questions are targeted or addressed and what critical needs will be met? Explain the project's relevance to the SAFE species' program team's priorities and how it supports implementation of the team's 3-year program plan and existing regional and/or global recovery plans. **LIMIT 5,000**

CHARACTERS with spaces

The African penguin *Spheniscus demersus* is endemic to the Benguela upwelling ecosystem (Namibia and South Africa) and is classified as Endangered by the International Union for Conservation of Nature (IUCN). The population has undergone a dramatic decline primarily from a lack of sufficient food due to collapsing fish stocks and competition with industrial fisheries, but the species is also impacted by habitat destruction, climate change (with extreme weather events), marine pollution (such as oil spillages), disease outbreaks, and predation.

Diseases causing high mortalities can be conservation-threatening, especially in endangered species with declining populations, and this is complicated further by climate change causing changing environmental conditions where pathogens and parasites are able to survive. Disease surveillance in wild birds facilitates ecosystem health monitoring and serves as an early warning system for diseases that could potentially have devastating consequences for these endangered species, as well as possibly also infecting domestic animals and humans. In southern Africa, there have recently been two outbreaks of Highly Pathogenic Avian Influenza (HPAI) with the H5N8 strain in 2018-2019 and the H5N1 strain in 2021-2022, causing high mortalities in several seabird species, including the African penguin.

The Southern African Foundation for the Conservation of Coastal Birds (SANCCOB) has spearheaded disease research in southern African seabirds for more than a decade and it is a key component of our routine activities, with clinical examination of all individuals admitted for rehabilitation, as well as post-mortem examination of carcasses collected along the South African coast. The SANCCOB Disease Surveillance Programme tests carcasses admitted for necropsy, or symptomatic birds dying soon after admission, for various diseases including HPAI, and has been instrumental in monitoring and responding to both HPAI outbreaks, collecting valuable information on disease prevalence of HPAI in seabirds, and training of government and conservation authority staff in practically dealing with a disease outbreak in seabird colonies.

In November 2022, test results showed positive cases of HPAI at the Cape Town rehabilitation centre, which was then placed under quarantine by the Department of Agriculture, Directorate of Veterinary Services. This outbreak and quarantine posed some challenges regarding management of the disease within the centre, including preventing releases of birds back into the wild. Strict biosecurity measures were initiated, a temporary off-site facility was set up to care for new admissions, and HPAI surveillance testing was increased. The quarantine was lifted in January 2023 after negative test results and no new symptomatic birds. This outbreak taught us many lessons on screening tests, biosecurity protocols, and symptoms and management of HPAI within the centre.

This new project will specifically conduct increased HPAI screening on live African penguins admitted to SANCCOB (Cape Town and Gqeberha) for rehabilitation from wild colonies. Most samples will be taken in the Western Cape province (the area most affected by HPAI in recent years), but we will also sample from the Eastern Cape to check for disease occurrence. Sampling penguins admitted for rehabilitation allows us to effectively sample wild birds without causing disturbance in the seabird colonies, as well as prioritising sampling of birds that may be harbouring disease. This means that we can monitor wild birds before they show symptoms, enabling us to initiate a rapid early response in the seabird colonies if necessary, reduce the spread of avian influenza within the facility by implementing increased biosecurity measures, and monitor the epidemiology of the disease and the effectiveness of our response.

This project supports the South African National African Penguin Biodiversity Management Plan (gazetted by the then Department of Environmental Affairs (now Department of Forestry, Fisheries and the Environment, DFFE) in 2013, and currently being revised with a draft version published in 2022). Disease is listed as a threat to the African penguin with actions for ongoing disease surveillance and ensuring that all colonies have disease contingency plans that allow for rapid

management action. The SAFE African Penguin Conservation Action Plan includes Health Monitoring and Rehabilitation as a project identified for conservation with Maximizing the health surveillance and disease monitoring program of the African Penguin Biodiversity Management Plan. Screening of African penguins admitted for rehabilitation for HPAI ensures that cases are diagnosed early (even without showing any symptoms) and a rapid response can be initiated to limit morbidity and mortality within the colonies.

2. List the goal(s) and associated objective(s) of the proposed project and the actions that will be taken to achieve them. Goals should describe the desired status in the long-term of the question or problem that the project will address. Objectives should state the immediate results that are necessary to meet the long-term goal(s). Actions should be the specific activities the project will undertake to complete each objective. If the proposal is a request to fund part of a larger project, this section should focus on the part for which CGF funding is being requested during the one-year duration, while also providing some context regarding the larger effort. **LIMIT 4,500 CHARACTERS with spaces**

The aim of this project is to conduct screening of HPAI of live African penguins admitted for rehabilitation at the SANCCOB Cape Town facility, over and above the ongoing disease surveillance project, in order to monitor wild birds before they show symptoms, enabling us to initiate a rapid response in the seabird colonies, reduce the spread of avian influenza within the facility by implementing increased biosecurity measures, prevent the spread of the disease from the facility to wild birds, and monitor the epidemiology of the disease and the effectiveness of our response.

GOAL 1: CONDUCT HPAI SCREENING IN AFRICAN PENGUINS AND INITIATE A RAPID RESPONSE IN PENGUIN COLONIES TO A POTENTIAL HPAI DISEASE OUTBREAK

Objective 1.1: Monitor wild African penguins admitted to the facilities for potential HPAI

Action 1.1.1: Swab 600 African penguins (cloacal and tracheal swabs) on admission

Action 1.1.2: Store swabs appropriately and send timeously to the laboratory for testing

Objective 1.2: Initiate decision-making by appropriate authorities on management of potential HPAI outbreak

Action 1.2.1: Provide feedback to the Department of Agriculture, Directorate of Veterinary Services (HPAI is a state-controlled disease) and the appropriate conservation authorities in the case of any positive test results

Action 1.2.2: Provide veterinary advice on management actions to implement and provide assistance, if required, to the conservation authorities

GOAL 2: IN THE CASE OF POSITIVE TEST RESULTS, PREVENT FURTHER SPREAD OF THE DISEASE IN THE FACILITY AND FROM THE FACILITY TO WILD BIRDS

Objective 2.1: Quarantine the facility (conducted by the Department of Agriculture, Directorate of Veterinary Services) in the event of a positive result

Action 2.1.1: Establish a temporary offsite facility with facilities for housing and swimming birds, preparation of food, admission, health evaluation, and basic veterinary care of new patients (*not part of this project proposal as this forms part of our rehabilitation programme)

Action 2.1.2: Communicate on an ongoing basis with the Department of Agriculture, Directorate of Veterinary Services in terms of symptomatic and positive cases, in order to determine the correct timing for lifting the quarantine

Objective 2.2: Increase biosecurity measures in the event of a positive result

Action 2.2.1: Isolate any penguins, or other birds, showing symptoms of HPAI in a quarantine area with dedicated staff and equipment, with consideration of euthanasia in cases showing neurological symptoms

Action 2.2.2: Increase disinfection protocols in bird pens, pools, and corridors

Action 2.2.3: Place foot baths at the entrance to separate quarantine areas within the facility, as well as at the entrance to SANCCOB

Action 2.2.4: Control bird movement between the different areas dependent on testing of birds and presence of symptomatic birds

Action 2.2.5: Restrict entrance to SANCCOB to essential service providers

Action 2.2.6: Ensure appropriate disposal of all waste products to prevent any spread of the virus through waste

GOAL 3: MONITOR THE EPIDEMIOLOGY OF THE DISEASE AND THE EFFECTIVENESS OF THE RESPONSE

Objective 3.1: Evaluate the HPAI testing results from wild birds admitted to the centres

Action 3.1.1: Evaluate all results (such as age of penguins found positive, date, time of year, colony admitted from, reason for admittance, time to positive, symptoms seen, outcome) to test for significance

Action 3.1.2: Provide feedback of results to the Department of Agriculture, Directorate of Veterinary Services as the authority monitoring HPAI epidemiology and outbreaks within other bird species (especially domestic species) in southern Africa

Objective 3.2: Evaluate SANCCOB's response to a positive HPAI test result within the rehabilitation facility

Action 3.2.1: Hold debriefing session after quarantine has been lifted for all SANCCOB rehabilitation, veterinary, and research staff, as well as a representative from the Department of Agriculture, Directorate of Veterinary Services, to evaluate the response

Action 3.2.2: Organize an online workshop to discuss the results of or response with interested facilities, especially any that have also responded to a HPAI outbreak

3. Explain in detail the methodology for this project and why it is appropriate. If this is a research project, clearly state the research question(s) and how it will be tested. For applied conservation projects, explain how project actions will be undertaken and why the proposed actions are appropriate for addressing the conservation issue identified. If this is a conservation education or professional training project, describe the methods as they relate to the target audience, number of people that will be reached, etc. **LIMIT 7,000 CHARACTERS with spaces**

Action 1.1.1: Swab 600 African penguins (cloacal and tracheal swabs) on admission

Laboratory supplies for taking samples will be ordered and distributed as needed to both centres. Plastic tip rayon swabs are used to collect samples from the trachea and cloaca of each penguin. We aim to collect from 600 penguins throughout the year; 500 samples from the Western Cape and 100 samples from the Eastern Cape. We will primarily screen and prioritise weak and debilitated individuals, including abandoned chicks and chicks removed for various reasons, with fewer samples collected from penguins admitted due to other causes such as external injuries. Sampling will start in October 2023 with the expected annual influx of African penguin chicks that are abandoned by moulting parents, based on the 2022 outbreak of HPAI in the facility.

Action 1.1.2: Store swabs appropriately and send timeously to the laboratory for testing

Both swabs from the same bird are placed in one vial with 2ml viral transport medium per vial, clearly labelled, and transported in cooler boxes. Transport of the samples to the laboratory is dependent on the centre, the laboratory used, and the urgency of results needed; they may be couriered overnight, or dropped off at the laboratory.

Action 1.2.1: Provide feedback to the Department of Agriculture, Directorate of Veterinary Services and the appropriate conservation authorities in the case of any positive test results

Results take approximately 48 hours and will be forwarded to the State Veterinarian; this directorate collects and collates all HPAI information (in wild and domestic birds, as it is a state-controlled disease) and publishes their results on a yearly basis. In the case of a positive result, the conservation authorities (CapeNature, South African National Parks (SANParks), the City of Cape Town, and Robben Island Museum) from the specific colony are notified so that they can initiate a management plan. This is done in conjunction with the Department of Agriculture, Directorate of Veterinary Services and the Department of Forestry, Fisheries and the Environment (DFFE).

Action 1.2.2: Provide veterinary advice on management actions to implement and provide assistance, if required, to the conservation authorities

SANCCOB has close working relationships with the conservation authorities listed above, as well as supporting African Penguin and Seabird Rangers at Robben Island, Simon's Town, Stony Point, and Bird Island. This ensures effective and ongoing communication with the colony managers, and allows SANCCOB to provide support as needed.

Action 2.1.1: Establish a temporary offsite facility

The rehabilitation actions and setting up a temporary offsite facility are not within the scope of this grant application.

Action 2.1.2: Communicate on an ongoing basis with the Department of Agriculture, Directorate of Veterinary Services in terms of symptomatic and positive cases, in order to determine the correct timing for lifting the quarantine

In a quarantine situation, there is close communication with the State Veterinarian as they must determine when to place a facility in quarantine, as well as when to lift quarantine and it is safe to release birds back into the wild.

Action 2.2.1: Isolate any penguins, or other birds, showing symptoms of HPAI in a quarantine area with dedicated staff and equipment, and with consideration of euthanasia in cases showing neurological symptoms

We have established detailed protocols for isolation based on the 2022 quarantine situation. These are revised on a weekly basis with all SANCCOB members providing feedback on numbers of birds and capacity to manage the different areas. The veterinarian makes the final decision on birds needing euthanasia as per regular SANCCOB rehabilitation and veterinary protocols.

Action 2.2.2: Increase disinfection protocols in bird pens, pools, and corridors

Pool water will be treated with chlorine. The disinfectant concentration will be increased with pens cleaned on a daily basis with F10 SCXD and F10SC, and bleach used on a weekly basis.

Action 2.2.3: Place foot baths at the entrance to separate quarantine areas within the facility, as well as at the entrance to SANCCOB

Foot baths of F10SC at 8ml/L will be set up at the entrances to each of the bird pens, at the entrance to all quarantine areas, the Intensive Care Unit, the home pen, and the entrance to SANCCOB.

Action 2.2.4: Control bird movement between the different areas dependent on testing of birds and presence of symptomatic birds

No birds will be moved from one set of pens to another until we have tested each area and shown that movement will not increase the risk of disease spread. This testing is not within the scope of this grant application.

Action 2.2.5: Restrict entrance to SANCCOB to essential service providers

Action 2.2.6: Ensure appropriate disposal of all waste products to prevent any spread of the virus through waste

Cardboard transport boxes are folded, double bagged, and sprayed with disinfectant before being removed from an area. All other waste (such as newspaper and towels) is placed in large green incineration bags; when bags are full, they are disinfected and removed from the area. Fish waste and carcasses are double bagged and frozen until removal. All waste is stored outside the facility in a garage and collected regularly for incineration by the waste disposal company. Infectious waste, medical waste, and sharp items are disposed of in 20L containers, and disposed by a medical waste company.

Action 3.1.1: Evaluate all results (such as age of penguins found positive, date, time of year, colony admitted from, reason for admittance, time to positive, symptoms seen, outcome) to test for significance

Action 3.1.2: Provide feedback of results to the Department of Agriculture, Directorate of Veterinary Services as the authority on HPAI epidemiology

Action 3.2.1: Hold debriefing session after quarantine has been lifted for all SANCCOB rehabilitation, veterinary, and research staff, as well as a representative from the Department of Agriculture, Directorate of Veterinary Services, to evaluate the response

Action 3.2.2: Organize an online workshop to discuss the results of or response with interested facilities, especially any that have also responded to a HPAI outbreak

We will organize an online workshop to discuss the results of our response with interested facilities housing captive birds that have also responded to similar outbreaks. Information on the epidemiology of HPAI outbreaks in captive facilities is essential for an appropriate response to an outbreak and there is very little information available at present. This workshop would also serve as a refresher training course in the event that there are no positive results in terms of responding to an outbreak.

4. If AZA has provided previous funding for this or a related project through its grants programs, summarize relevant findings and identify how they relate to the current proposal. **LIMIT 1,000 CHARACTERS with spaces**

N/A

5. Describe the timeline in which components of the project will be completed within the one-year project duration. Use of bulleted/numbered lists is encouraged. **LIMIT 1,500 CHARACTERS with spaces**

October 2023

- Order all necessary supplies and ensure protocols and equipment are in place at both centres

October 2023 – September 2024:

- Sampling and testing of 600 African penguin samples
- Results evaluated and forwarded to relevant authorities
- Response on colonies required if positive results
- Quarantine of rehabilitation facility if positive results

April – August 2024: (depending on positive results and how busy the rehabilitation team are)

- Discuss and evaluate SANCCOB's response
- Protocols formulated for response to disease outbreak within the rehabilitation facility will be circulated internally
- Hold online workshop to discuss HPAI outbreak with other facilities housing wild birds
- Report from this workshop issued and circulated

6. Define the project team by identifying the personnel included for this project, their roles, qualifications, and the key skills they bring. Discuss the PI and each CI listed on the Cover Sheet and any collaborators (persons actively involved in the completion of the project). Each collaborator's institution should be listed under **Collaborating Institutions or Organizations** on the application Cover Sheet. **LIMIT 2,500 CHARACTERS with spaces**

Mr Albert Snyman – PI – SANCCOB Researcher – BSc. Hons. Ichthyology and Fisheries Science

Albert has 10 years' experience working with seabirds, starting as a Rehabilitator at SANCCOB, field work during the over-wintering team on the remote Marion Island, and Researcher at SANCCOB from 2017. His role is to order and manage all supplies needed, send supplies to Gqeberha facility, produce protocols for sampling, ensure samples are collected, labelled, and stored correctly, transported to the laboratories, and that results are collated and evaluated. He ensures that feedback on results is given to all authorities on a monthly basis.

Dr Katta Ludynia – CI – SANCCOB Research Manager – PhD. in Biological Marine Science

Katta has more than 15 years' experience in seabird biology and conservation in southern Africa and has been working at SANCCOB for six years. Her role is to supervise and manage the project (including financial management of the grant), evaluate results, provide statistical analysis if needed, and contribute research expertise to the project and response.

Ms Nicky Stander – CI – SANCCOB Head of Conservation – BSc. Hons. Animal Sciences

Nicky has more than a decade of marine conservation experience, with 12 years based at SANCCOB, and most of that time in senior management. She has worked as a Rehabilitator, Rehabilitation Manager, Preparedness & Response Manager, and is now the Head of Conservation. Her role is to ensure all targets are met, management of staff, and liaison with external parties.

Dr David Roberts – Collaborator – SANCCOB Clinical Veterinarian – BVSc. and MSc. Veterinary Science

David qualified as a Veterinarian in 2012 and obtained his Masters degree before joining SANCCOB five years ago. He is responsible for all veterinary diagnostics and treatment at SANCCOB. His role is to select penguins for sampling, ensure sampling is performed correctly, evaluate symptoms and isolation of all birds within care, ensure all quarantine and disinfection protocols are in place, liaise with the State Veterinarian, and provide expert advice to conservation authorities on disease management within colonies.

7. Describe the project's monitoring and evaluation plans. Explain how the goals and objectives of the project will be met, which indicators will be used, and how those indicators will be measured. If this project has an educational or professional training component, the educational impact should be discussed (ideally including impacts on conservation-related knowledge, attitudes/affect, and behavior). Plans may be quantitative or qualitative, and should differentiate between monitoring (ensuring proposed actions are taken) and evaluation (whether the project had the desired impact on the issue or question addressed). **LIMIT 3,000 CHARACTERS with spaces**

Most of this project involves testing live African penguins admitted for rehabilitation for the presence of HPAI virus. Some of the actions and objectives will only come into play if there is a positive test result, whether a management response needs to be initiated at the colonies, and whether SANCCOB needs to be placed under quarantine. Indicators used for monitoring of project:

- Number of samples collected
- Laboratory results for testing of samples
- Communication with State Veterinarian re results
- Communication with conservation authorities re results and disease management
- Placement of facility under quarantine
- Establishment of temporary rehabilitation facility during quarantine
- Communication with State Veterinarian re positive cases, symptoms, isolation, and quarantine
- SANCCOB Isolation and treatment protocols, including movement of birds between pens
- SANCCOB Disinfection protocols
- SANCCOB Infected waste protocols
- Department of Agriculture, Directorate of Veterinary Services annual report on HPAI testing and epidemiology in wild birds

Indicators used for evaluation of the project:

- Positive laboratory results for HPAI
- Debriefing session with SANCCOB staff and State Veterinarian to evaluate the response to testing and any positive results
- Online workshop with interested facilities, especially those that have also responded to a HPAI outbreak
- SANCCOB staff meeting to discuss the overall cost-effectiveness of testing live penguins admitted for rehabilitation and the conservation value provided for disease (particularly HPAI) surveillance

8. Explain and identify the means and timeline of how the key results and lessons of the project will be disseminated and shared. Key internal and external audiences should be identified. **LIMIT 1,500 CHARACTERS with spaces**

Any positive results will be disseminated immediately to the Department of Agriculture, Directorate of Veterinary Services and the appropriate conservation authorities (CapeNature, South African National Parks (SANParks), the City of Cape Town, and Robben Island Museum) so that they can initiate a management plan and response. This is done in conjunction with the Department of Forestry, Fisheries and the Environment (DFFE). Additionally, feedback on all results is given to all authorities listed above on a monthly basis.

If SANCCOB is placed under quarantine, we will hold a debriefing session after quarantine has been lifted for all relevant SANCCOB staff, as well as a representative from the Department of Agriculture, Directorate of Veterinary Services, to evaluate the response.

A report from the online workshop will be circulated in September 2024 to all (yet to be identified facilities) involved.

A detailed report will be issued in October 2024 on the outcome of all testing results and this will be sent to the State Veterinarian, DFFE, and the conservation authorities.

A funding report will be issued in October 2024 summarising all the work completed, significant points from the workshop, and will also consider whether testing live penguins admitted for rehabilitation is a worthwhile use of funds, and whether to continue this project going forward.

9. Have all the necessary permits been obtained for the project?

- a) ☒ Yes ☐ No ☐ Not Applicable

If yes, list the permits here and attach one copy of each to your Application email. Attachments should be titled **“Permit #.”**

1. Department of Agriculture, Land Reform and Rural Development - Section 20 permit Research under the Animal Diseases Act
2. Department of Forestry, Fisheries and the Environment – Research permit for collecting samples under the Marine Living Resources Act (renewed annually)
3. CapeNature – Rehabilitation permit (renewed annually)
4. Department of Forestry, Fisheries and the Environment – Standing permit for multiple restricted activities involving listed threatened or protected marine species (TOPS)
4a list of species in the TOPS permit above
5. South African Veterinary Council registration as a veterinary facility

- b) If the necessary permits have not yet been obtained, please explain why. **Pending permits must be obtained and submitted to AZA by 15 June 2023.**

N/A

10. If research animals are to be purchased for the project, indicate and justify the destination of the animal(s) after completion of the research. **LIMIT 750 CHARACTERS with spaces**

N/A

11. If this is a multi-year project, identify the funding strategy for subsequent years. **LIMIT 750 CHARACTERS with spaces**

Currently, this is a one-year project (2023/2024) to pilot a HPAI screening programme of live penguins admitted for rehabilitation in Cape Town and Gqeberha. Evaluation of the project will determine whether to include this screening in the larger ongoing Disease Surveillance Programme. The Disease Surveillance Programme is currently funded by the Rupert Nature Foundation, but going forward, if we add this extended testing, we will require additional funding to make it a reality. SANCCOB conducts continuous fundraising from multiple income streams to ensure a sustainable funding pipeline.

12. **Past AZA Grant Support.** If Principal or Co-Investigators listed on the Cover Sheet have received previous AZA grant support (i.e., CGF or SAFE granting program), complete the following (required).

- a) Name of Investigator: Dr Katta Ludynia and Ms Nicky Stander (co-investigators) Year of Award: 2022 Amount of Award: \$29,392
Project Title: Saving African Penguins in Namibia - Halifax Island Project (CGF)
Were all required reports (annual/final) submitted?
☐ Yes ☐ No ☒ Not yet due / Other (briefly explain) currently being conducted
- b) Name of Investigator: Dr Katta Ludynia Year of Award: 2023 Amount of Award: \$45,914
Project Title: Evaluating the Efficacy of Management Interventions in the Conservation of African Penguins (SAFE Granting Program)
Were all required reports (annual/final) submitted?
☐ Yes ☐ No ☒ Not yet due / Other (briefly explain) currently being conducted

Note: If additional awards need to be included, add their information to a separate document titled **“Past AZA-Funded Projects”** and include it as an attachment with your Application email.

2023 AZA CONSERVATION GRANTS FUND

Project Budget

BUDGET CYCLE

All funding requests from CGF must be for a maximum period of one year only. Funding decisions are announced in early September and expenses incurred prior to the award date will not be covered by CGF funds. CGF funds are to be used within one year from the project start date and forward.

DETAILED BUDGET

A detailed budget sheet is provided below and information should be separated into CGF and non-CGF costs. List under each category the budget items and method of calculation for each (e.g., 2 persons x 10 days x \$25/day), as well as probable sources of support. The following should be listed as **separate** budget items:

- airfares
- lodging
- vehicle rental (automobiles, planes, boats)
- fuel
- per diem
- equipment over \$500
- supplies, services (lab analyses, editing)
- pharmaceuticals
- shipping/postage
- printing
- personnel costs

CGF does not fund the following: Tuition, university fees, or fringe benefits associated with graduate students or other project personnel; administrative costs (including institutional overhead and submission costs for the publication of journal articles); travel unrelated to completion of the project (conference presentation expenses, travel to meetings, etc.); planning meetings that define, rather than implement, conservation goals.

CGF does not fund salaries for project personnel other than graduate students, technicians, and start-up positions established solely for the purpose of completion of the project.

Note: Recipients of CGF grants are obligated to inform AZA (CGF@aza.org) of any pending or overlapping grants received. If such grants are received, AZA's Scientific Advisory Committee may recommend that the award amount be reduced or refunded.

Note: If additional budget items need to be included, add this information in a separate document titled **“Additional Budget Items”** and include it as an attachment with your Application email.

Budget Items Form:

Budget Item	Method of Calculation (e.g., 2 persons x 10 days x \$25/day)	CGF- Requested Amount	Non-CGF Requested Amount (if applicable)	Date Expected from Non-CGF Source (if applicable and not yet received)	Name of Non-CGF Source (e.g., Grant Fund, Matching)	Total Expense (CGF+Non-CGF)
Services - Avian Influenza PCR testing	600 individuals X \$29.27 per test	\$17562	\$0	N/A	N/A	\$17562
Services - Lab waste incineration	500kg X \$0.74 per kg	\$370	\$0	N/A	N/A	\$370
Supplies - Plastic tip rayon swabs	2 samples X 600 individuals X \$0.26 per swab	\$312	\$0	N/A	N/A	\$312
Supplies - Transport vials	600 individuals X \$0.27 per vial	\$162	\$0	N/A	N/A	\$162
Supplies - Transport cooler boxes	100 trips X \$2.44 per box	\$244	\$0	N/A	N/A	\$244
Supplies - Foot baths (Sanitising mats)	5 mats X \$19.89 per mat	\$99	\$0	N/A	N/A	\$99
Supplies - Waste disposal bags	72 bags X \$0.67 per bag	\$48	\$0	N/A	N/A	\$48
Pharmaceuticals - Viral transport medium (VTM)	2 X 1L VTM X \$63.25 per 1L container	\$127	\$0	N/A	N/A	\$127
Pharmaceuticals - F10 SC Disinfectant	4 X 5L disinfectant X \$75.05 per 5L container	\$300	\$0	N/A	N/A	\$300
Shipping - Sample overnight courier fee	20 trips X \$73.94 per trip Western Cape	\$1479	\$0	N/A	N/A	\$1479
Shipping - Sample overnight courier fee	40 trips X \$73.94 per trip Eastern Cape	\$2958	\$0	N/A	N/A	\$2958
Shipping - VTM courier fee	41 trip X \$21.39 per trip	\$21	\$0	N/A	N/A	\$21
Shipping - courier fee supplies to EC`	1 trip X \$55.55 per trip	\$56	\$0	N/A	N/A	\$56
Fuel - Laboratory drop-off of samples	40 trips X 26.43km round trip X \$0.25 per km Western Cape	\$264	\$0	N/A	N/A	\$264
		\$	\$			\$
		\$	\$			\$
		\$	\$			\$

BUDGET JUSTIFICATION

State why each item listed in the Budget Items Form costs what it does and indicate how each item relates to the proposed scope of work. Sufficient detail should be provided to address any potential reviewer concerns with respect to cost and need. If the lifespan of equipment costing over \$500 exceeds that of the grant period, detail and justify who will assume ownership of the item. **LIMIT 2,500 CHARACTERS with spaces**

The aim of this project is to conduct screening for HPAI in 600 African penguins and this makes up most of the budget; laboratory testing (PCR technique) costs \$29.27 / test.

Costs for collecting, storing, and transporting the samples to the laboratory are listed below. The Viral Transport Medium (VTM) needs to be couriered to SANCCOB Cape Town from the supplier as it is not available from our regular veterinary suppliers; once-off courier fee of \$21.39. The necessary supplies need to be couriered from Cape Town to Gqeberha; once-off courier fee of \$55.55. Supplies for collection and storage of samples are two plastic tip rayon swabs (trachea and cloaca) per bird at \$0.26 each, 600 transport vials at \$0.27 each, and 2 X 1L containers of VTM (total \$127). The VTM is vital to ensure suitable storage of samples that are not tested immediately. In the Western Cape (WC), we estimate that transporting 500 samples to the laboratories will take 60 trips, and 100 samples in the Eastern Cape (EC) will take 40 trips (fewer samples per trip), thus, we require 100 transport cooler boxes at \$2.44 each.

Transport of the samples to the laboratory is dependent on the centre, the laboratory used, and the urgency of results needed; in the WC they may be couriered overnight (urgent samples where individuals may need to be isolated), or dropped off at the laboratory, while the overnight courier is the only option in the EC. The courier cost is affected by the laboratory testing facility based in a town that is not a major route for the courier companies. The transport costs for laboratory drop-off are used in less urgent cases, and once weekly the laboratory will courier these samples to the testing facility (their cost). We have budgeted for 20 (WC) and 40 (EC) overnight courier trips (\$73.94 / trip) and transport (fuel) costs for drop off at the laboratory (26.43km round trip X \$0.25 / km equals \$6.61 / trip, 40 trips).

Due to increasing prevalence of the HPAI virus in recent years, we also include additional costs for increased biosecurity and waste management. To this end, we are budgeting for additional four 5L containers of F10 SC disinfectant (at \$75.05 / container), used in five footbaths to prevent spread of pathogens between different areas and pens of the facility, with foot baths and sanitising mats costing \$19.89 each. We are also budgeting for additional 72 waste disposal bags at \$0.67 / bag, and laboratory waste incineration for 500kg at \$0.74 / kg.

26 February 2023

To whom it may concern

I would like to express my appreciation of the SANCCOB Foundation and the very important and valuable contribution they have made to avian influenza surveillance and monitoring in the Western Cape over the last five years.

SANCCOB was instrumental in monitoring and responding to the first outbreak of high pathogenicity avian influenza (HPAI) in wild coastal birds in 2018. In 2020, the laboratory testing for which they were responsible comprised the majority of wild bird testing done in the province and supported other evidence of absence of HPAI in the country. The sampling and testing done in 2021 and 2022 was vital in monitoring the new incursion of HPAI H5N1 virus and its effect on endangered coastal bird species.

As Veterinary Services, we have limited funding for disease testing and have to prioritize domestic animal outbreaks and cases. We are restricted to testing for avian influenza virus in sick and dead individuals of newly-affected wild bird species and at new locations. SANCCOB was responsible for nearly 60% of the avian influenza virus detections in wild birds in the province in 2021 and 70% in 2022. This made an extremely significant contribution to the viruses available for genetic analysis, which will contribute to a better understanding of the disease. It also allowed a much clearer picture of what species are susceptible and worst affected, and provided the justification for the measures in which the conservation authorities have invested to try to limit spread of the disease.

I anticipate even less government funding being available in the future for disease surveillance in wild birds. However, monitoring of wild birds can provide an early warning system for disease incursions that have widespread economic and conservation effects, and is vital in assessing the threats to our endangered species. I therefore fully support any funding applications that could lead to ongoing augmentation of wild bird disease surveillance.

Yours Sincerely,

Dr Laura Roberts

RE: Permission to do research in terms of Section 20 of the ANIMAL DISEASES ACT, 1984 (ACT NO. 35 of 1984)

Dear Dr Ludynia,

Your Section 20 amendment request as submitted on 31 August 2022, requesting an amendment to the Section 20 permission granted on 2020-06-30 under Section 20 of the Animal Disease Act, 1984 (Act No. 35 of 1984) to perform a research project or study, refers.

I am pleased to inform you that permission is hereby granted to perform the following amended research/study, with the following conditions:

Conditions:

1. All conditions stipulated in the approval on 2020-06-30 (attached) must still be complied with;
2. The only allowable deviations from the conditions stipulated in the approval on 2020-06-30 (attached) are:

- 2.1 The expiry date may be extended to 31 July 2025;
- 2.2 This amendment is only valid for samples that are to be collected from date of signature of this amendment;
- 2.3 Point 12 of the approval on 2020-06-30 (attached) may be amended to add Assurecloud in Oudtshoorn for avian influenza and Newcastle disease diagnostics.

Title of research/study: Disease surveillance in seabirds admitted to a rehabilitation centre

**RE: Permission to do research in terms of Section 20 of the ANIMAL DISEASES ACT,
1984 (ACT NO. 35 OF 1984)**

Dear Dr Ludynia

Your fax / memo / letter/ Email dated 2 June 2020, requesting permission under Section 20 of the Animal Disease Act, 1984 (Act No. 35 of 1984) to perform a research project or study, refers.

I am pleased to inform you that permission is hereby granted to perform the following research/study, with the following conditions :

Conditions:

1. This permission does not relieve the researcher of any responsibility which may be placed on him by any other act of the Republic of South Africa;
2. All potentially infectious material utilised or collected during the study is to be destroyed at the completion of the study. Records must be kept for five years for audit purposes. A dispensation application may be made to the Director Animal Health in the event that any of the above is to be stored or distributed;
3. The study must be conducted in compliance with the Veterinary and Para-veterinary Professions Act, 1982 (Act No 19 of 1982);

4. Any suspected or confirmed occurrence of controlled and notifiable animal diseases in terms of the Animal Diseases Act, 1984 (Act No 35 of 1984), must be immediately reported to the responsible state veterinarian;
5. Only dead sea birds may be sampled;
6. The following samples may be collected from dead sea birds: Blood samples as smears; blood samples on FTA cards; blood samples in RNA/DNA shield; organ pools in formalin; pooled trachea, cloaca and brain swabs; feathers;
7. Individual bird feathers must be collected in individual ziploc bags and be identified for traceability purposes should any of these birds test positive for avian influenza;
8. Blood samples as smears may be examined at SANCCOB for hemoparasite identification. All smears must be disposed of by BCL Medical Waste Management Services upon completion of analyses;
9. Blood samples on FTA cards and feathers may be stored at SANCCOB. Further use of these stored blood samples on FTA cards and feathers will require written permission from the Director Animal Health;
10. Blood samples in RNA/DNA shield must be sent to the UCT Medical School, Division of Cell Biology, Anatomy Building, Level 5, Room 5.14, Faculty of Health Sciences, UCT for avian malaria PCR. Waste disposal upon completion of analyses must be in full compliance with the Faculty of Health Science's Standard Operating Procedure for Handling and Receiving of Hazardous Substances Waste in the Hazardous Waste Holding Facility, Document No. 3.7HWHF Revision no. 1 dated April 2019;
11. Organ pools in formalin may be sent to Vetdiagnostix for histopathology;
12. Pooled trachea, cloaca and brain swabs must be sent to Western Cape Provincial Veterinary Laboratory for avian influenza and Newcastle disease diagnostics;
13. All samples to be transported must be packaged in compliance with IATA requirements or the Regulations of the National Road Traffic Act, 1996 (Act No 93 of 1996);
14. This Section 20 approval is valid until 31 July 2022.

OCEANS AND COASTAL RESEARCH PERMIT TO ENGAGE IN SCIENTIFIC INVESTIGATION OR PRACTICAL EXPERIMENT ISSUED IN TERMS OF SECTION 83 OF THE MARINE LIVING RESOURCES ACT, 1998 (ACT NO. 18 OF 1998).

SECTION A

Permit Reference Number: Res2023-06

Permit Holder: Dr Katrin Ludynia

Institution: SANCCOB/UCT

Validity Period: 29 February 2024

Scientific Investigation or Practical Experiment Authorised: to sample seabirds admitted for rehabilitation to SANCCOB, in order to provide samples for researchers and for building a biobank

Local of activities: SANCCOB (Cape Town & Gqeberha).

Authorised vessels: none

This permit is issued subject to the general conditions in Section B and the special conditions in Section C.

NAME: Dr GJ Cilliers

DIRECTOR: BIODIVERSITY AND COASTAL RESEARCH

DEPARTMENT OF FORESTRY, FISHERIES AND THE ENVIRONMENT

DATE: 23/02/2023

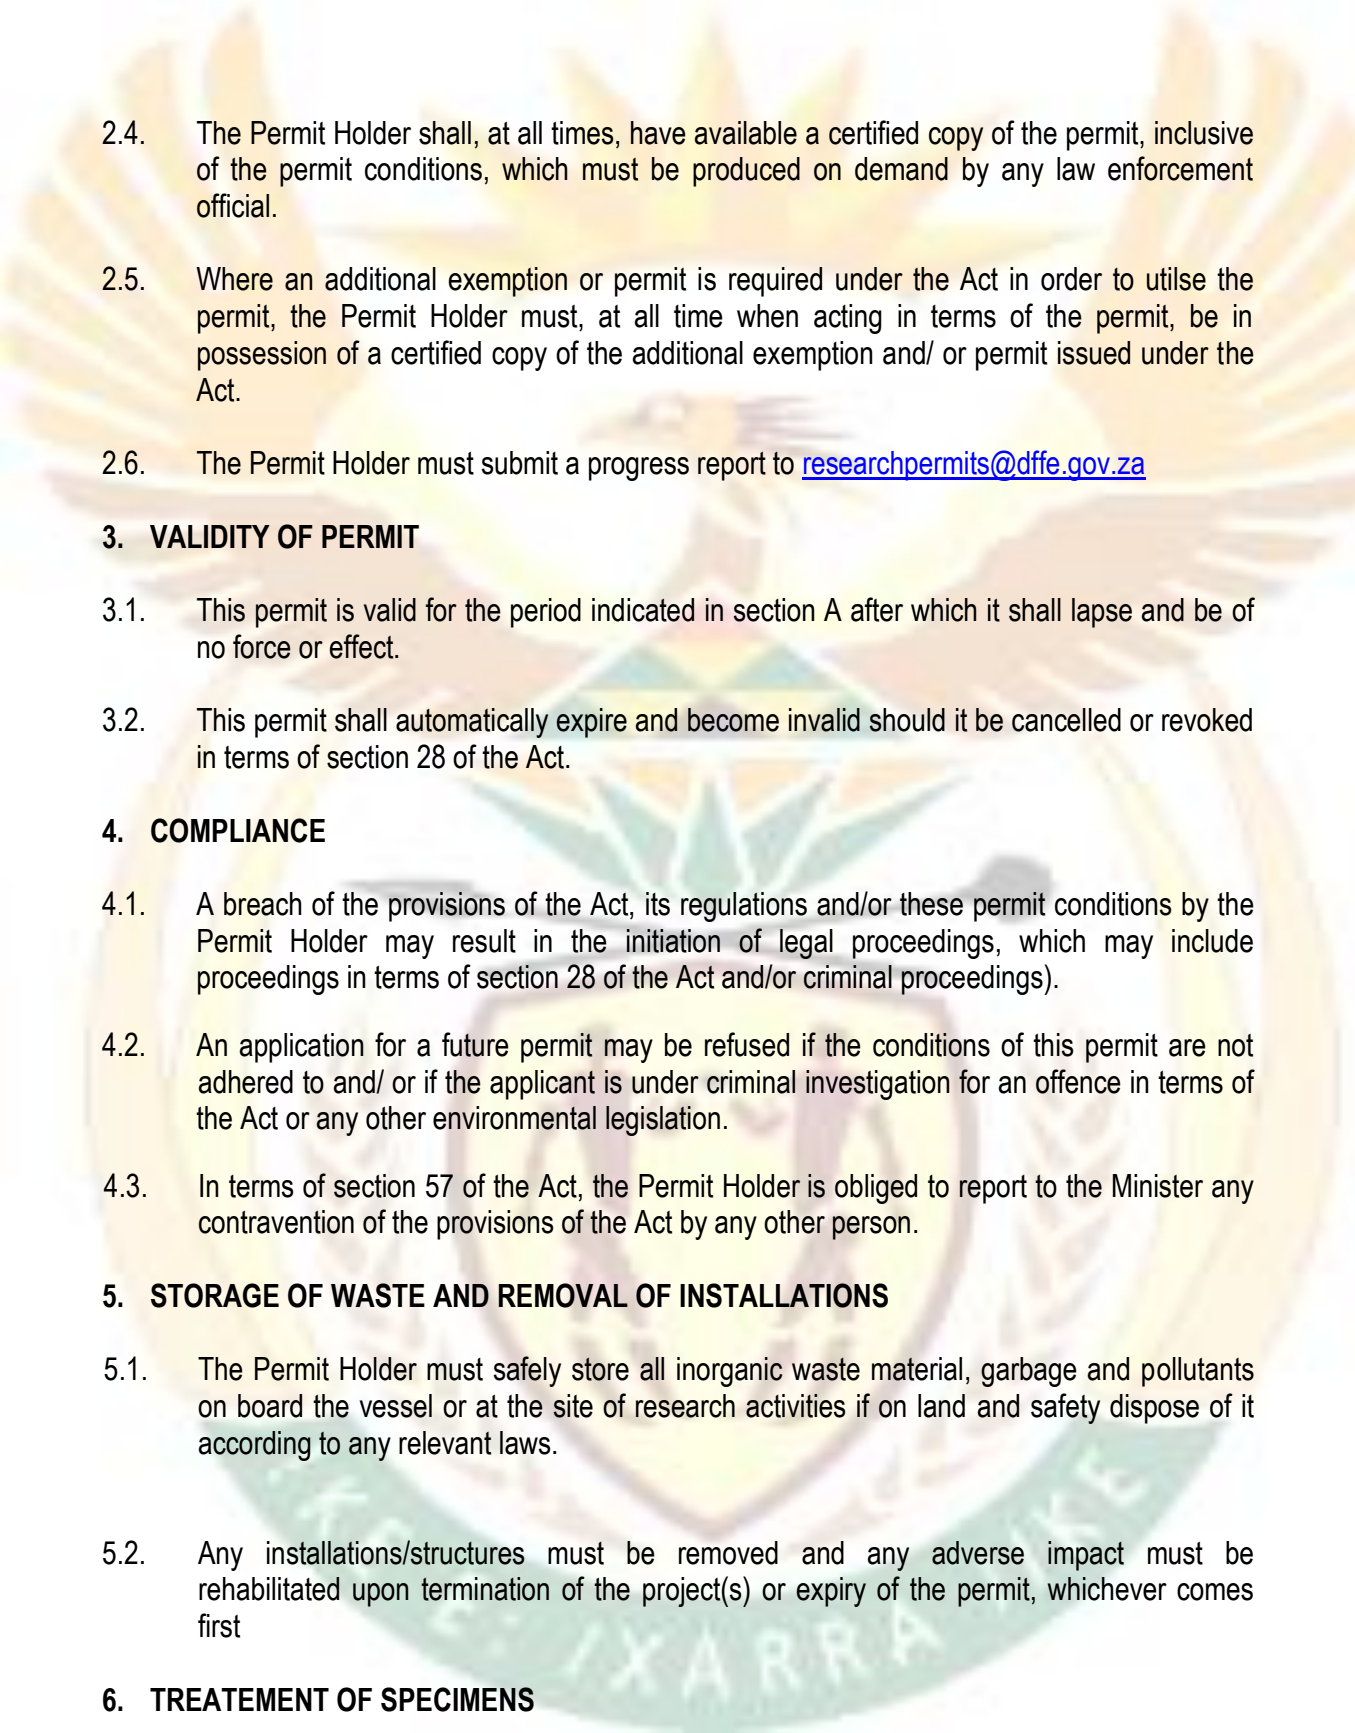

SECTION B: SCIENTIFIC INVESTIGATION OR PRACTICAL EXPERIMENT PERMIT CONDITIONS

1. . GENERAL

- 1.1. This Permit is issued subject to, among others, the following legislation:
 - 1.1.1. Marine Living Resources Act, 1998 (Act No. 18 of 1998) (the Act);
 - 1.1.2. National Environmental Management Act, 1998 (Act No. 107 of 1998), and in particular, the Control of Use of Vehicles in the Coastal Area Regulations (GNR.496 of 27 June 2014);
 - 1.1.3. National Environmental Management Biodiversity Act, 2004 (Act No. 10 of 2004);
 - 1.1.4. National Environmental Management Protected Areas Act, 2003 (Act No. 57 of 2003);
 - 1.1.5. Sea Birds and Seals Protection Act, 1973 (Act No. 46 of 1973);
 - 1.1.6. Prevention of Pollution from Ships Act (Act No. 2 of 1986);
 - 1.1.7. National Environmental Management Integrated Coastal Management Act, 2008 (Act No. 24 of 2008); and
 - 1.1.8. any other relevant law.
- 1.2. This permit is intended to authorise *bona fide* research: the primary purpose of the use of the permit may not be commercial gain.
- 1.3. This permit may not be used in marketing materials of the Permit Holders, or in any way which seeks to solicit business for the Permit Holder
- 1.4. The relevant Delegated Authority shall be entitled to amend these permit conditions when deemed necessary.
- 1.5. Any reference to the Permit Holder in these permit conditions is a reference to the entity or person that holds the permit; and shall in the case of an entity include the directors; and in the case of either an entity or a person include his/her/its employees (whether permanent, full-time or part-time), his/her/its contractors, agents or advisers, - acting in course and scope of their contractual relationship and in the case of a university shall include authorised students.

2. DOCUMENTATION

- 2.1. This permit shall only be utilised by the Permit Holder.
- 2.2. If the permit is in the name of an institution/company/close corporation the individual utilising the permit shall, in addition to a certified copy of this permit, be in possession of identification and a document which letter identifies the individual as being authorised to participate in the authorised activities. [If this does not happen it will be a breach of a permit condition.
- 2.3. The Permit Holder shall store at their/its registered place of business/residence the original permit issued.

- 
- 2.4. The Permit Holder shall, at all times, have available a certified copy of the permit, inclusive of the permit conditions, which must be produced on demand by any law enforcement official.
- 2.5. Where an additional exemption or permit is required under the Act in order to utilise the permit, the Permit Holder must, at all time when acting in terms of the permit, be in possession of a certified copy of the additional exemption and/ or permit issued under the Act.
- 2.6. The Permit Holder must submit a progress report to researchpermits@dffe.gov.za

3. VALIDITY OF PERMIT

- 3.1. This permit is valid for the period indicated in section A after which it shall lapse and be of no force or effect.
- 3.2. This permit shall automatically expire and become invalid should it be cancelled or revoked in terms of section 28 of the Act.

4. COMPLIANCE

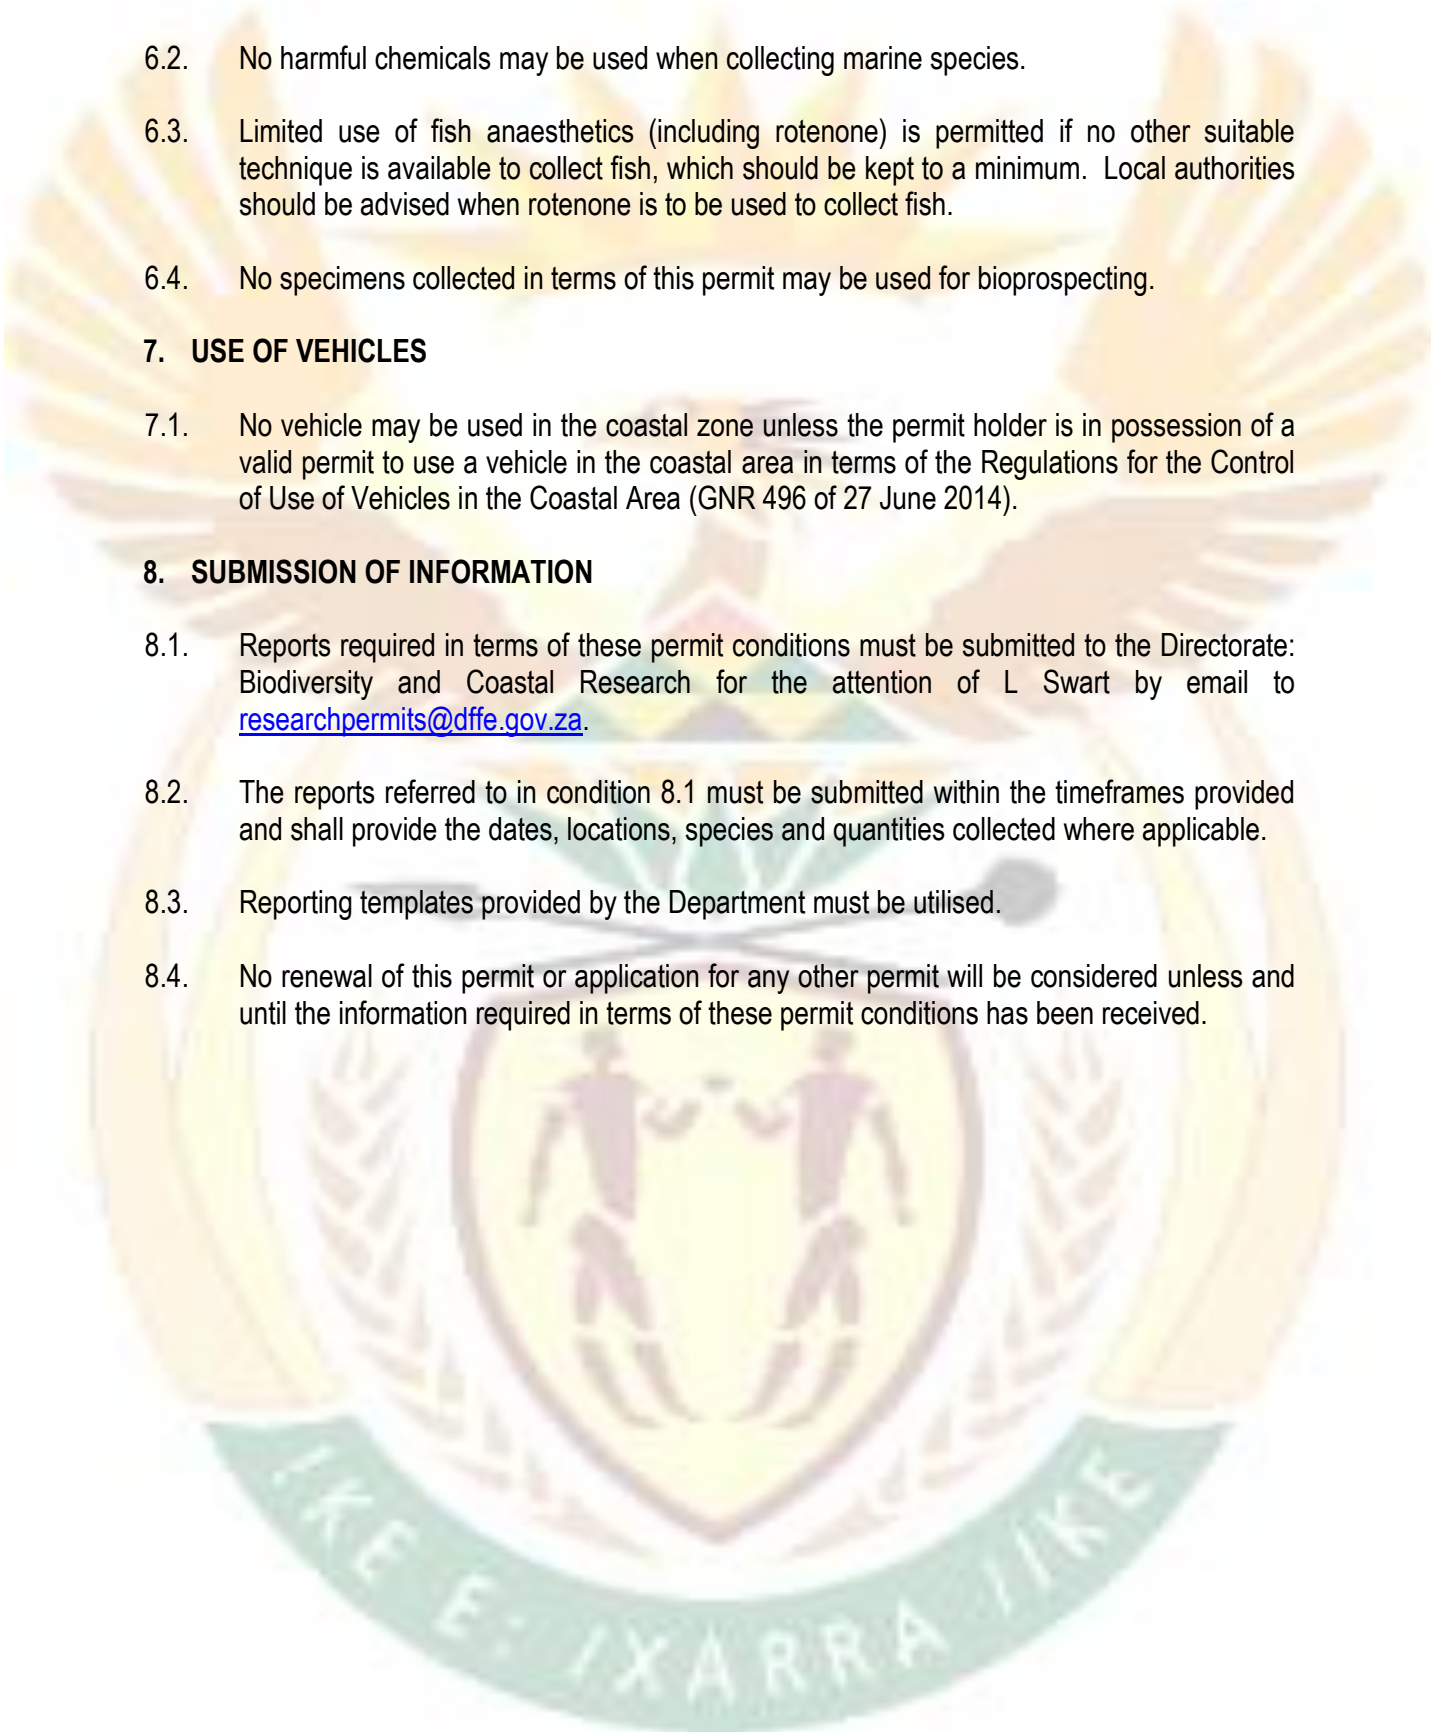

- 4.1. A breach of the provisions of the Act, its regulations and/or these permit conditions by the Permit Holder may result in the initiation of legal proceedings, which may include proceedings in terms of section 28 of the Act and/or criminal proceedings).
- 4.2. An application for a future permit may be refused if the conditions of this permit are not adhered to and/ or if the applicant is under criminal investigation for an offence in terms of the Act or any other environmental legislation.
- 4.3. In terms of section 57 of the Act, the Permit Holder is obliged to report to the Minister any contravention of the provisions of the Act by any other person.

5. STORAGE OF WASTE AND REMOVAL OF INSTALLATIONS

- 5.1. The Permit Holder must safely store all inorganic waste material, garbage and pollutants on board the vessel or at the site of research activities if on land and safety dispose of it according to any relevant laws.
- 5.2. Any installations/structures must be removed and any adverse impact must be rehabilitated upon termination of the project(s) or expiry of the permit, whichever comes first

6. TREATMENT OF SPECIMENS

- 6.1. Specimens collected in terms of this permit shall not be sold or offered for sale.

- 
- 6.2. No harmful chemicals may be used when collecting marine species.
 - 6.3. Limited use of fish anaesthetics (including rotenone) is permitted if no other suitable technique is available to collect fish, which should be kept to a minimum. Local authorities should be advised when rotenone is to be used to collect fish.
 - 6.4. No specimens collected in terms of this permit may be used for bioprospecting.

7. USE OF VEHICLES

- 7.1. No vehicle may be used in the coastal zone unless the permit holder is in possession of a valid permit to use a vehicle in the coastal area in terms of the Regulations for the Control of Use of Vehicles in the Coastal Area (GNR 496 of 27 June 2014).

8. SUBMISSION OF INFORMATION

- 8.1. Reports required in terms of these permit conditions must be submitted to the Directorate: Biodiversity and Coastal Research for the attention of L Swart by email to researchpermits@dff.gov.za.
- 8.2. The reports referred to in condition 8.1 must be submitted within the timeframes provided and shall provide the dates, locations, species and quantities collected where applicable.
- 8.3. Reporting templates provided by the Department must be utilised.
- 8.4. No renewal of this permit or application for any other permit will be considered unless and until the information required in terms of these permit conditions has been received.

SECTION C: SPECIFIC CONDITIONS

9. SPECIFIC CONDITIONS FOR MARINE PROTECTED AREAS/ HABITATS AND PROTECTED SPECIES

- 9.1. This permit allows for the sampling of seabirds admitted for rehabilitation to SANCCOB only, for building a biobank for *bona fide* research projects of David Roberts & Katrin Ludynia of SANCCOB.
- 9.2. The Permit Holder may collect dead seabirds caught as fishery bycatch or along the shore off South Africa.
- 9.3. The permit holder may collect biological samples from seabirds admitted to SANCCOB for rehabilitation. Samples must also be supplied to the SANBI/NGZ Biobank.
- 9.4. The permit holder shall keep accurate record of all species samples together with locality and details of samples collected whether blood, feathers, swabs, guano or fecal pellets. The meta datafile should form part of the report required in section 8 of this permit.
- 9.5. The Permit Holder is only permitted to collect and transport seabird carcasses that died of natural or environmental causes to minimise the spread of disease.
- 9.6. The Permit Holder may collect blood, swabs and fecal samples from admitted Birds that are brought oiled, ill, injured or chicks admitted for hand-rearing. Only seabirds that come to the rehab centre may be sampled
- 9.7. This permit does not allow for any specimens to be used in any way in a bioprospecting context
- 9.8. Biosecurity guidelines must be followed especially when releasing the admitted birds.
- 9.9. The Permit Holder must submit a progress report to researchpermits@dffe.gov.za by end October 2023.

PERMIT TO KEEP WILD ANIMALS IN CAPTIVITY FOR REHABILITATION PURPOSES

Issued in terms of the provisions of the Nature Conservation Ordinance 1974, (Ord 19 of 1974) (Section 29, 31, 44(1)(a) & (e))
 Not Transferable

HOLDER

Issued By:

Leandi Wessels

Approved on Behalf CEO

Western CapeNature Conservation Board

Effective Date:

Signature of Holder:

I acknowledge, accept and understand fully the permit conditions as described.

STANDARD CONDITIONS

1. The holder of this permit shall return it to the Chief Executive Officer: Western Cape Nature Conservation Board, Private Bag X29, Gatesville, 7766, within 14 days of the date of expiry thereof.
2. In addition to the abovementioned condition, the holder of this permit must apply for the renewal of this permit (should they wish to renew it) AT LEAST three months prior to the expiry date of this permit. The onus is upon the holder of this permit to apply timeously for renewal.
3. The transport of live animals with this permit must be done in accordance with the provisions set out in SABS 0331 (Translocation of Certain Species of Wild Herbivore), SANS 10379: 2005 Edition 1 (South African National Standard: Zoo and aquarium practice), the Animals Protection Act, 1962 (Act 71 of 1962) and IATA specifications, where applicable.
4. This permit is subject to the approval from the Veterinary Services, where applicable.

TAKE NOTE OF THE FOLLOWING:

1. This permit is valid for the period specified therein and must be returned within fourteen days of the date of expiry thereof to this office.
2. This permit does not authorise you to buy, sell, donate, receive as a donation and/or transport any protected wild animal. Permits for the fore-mentioned must be obtained from this office beforehand and applications must be addressed to this office, stating the number and species (scientific and common names should be mentioned) of the animals you wish to acquire, as well as the name and address of the person from whom you wish to obtain the animals.
3. Regulation 36 of the Nature Conservation Regulations, promulgated by Provincial Notice 955 dated 29 August 1975, provides that any person who keeps wild animals, except birds which are not endangered or protected wild animals, in captivity, shall keep a register in respect of such animals in which he shall -
 - 3.1. make a dated record in relation to -
 - 3.1.1 the name of each species, and
 - 3.1.2 the number of each sex of every species, or, if it is impossible to distinguish the sex, the total number of each species, which is so held, and
 - 3.1.3 as soon as any change occurs in respect of the species or number of each sex of every species or, if it is impossible to distinguish the sex, the total number of every species, keep a dated record in respect of -
 - 3.1.4 the name of the species in respect of which such change has occurred;
 - 3.1.5 the number of each sex of every species or, if it is impossible to distinguish the sex, the total number of every species in respect of which such change has occurred;
 - 3.1.6 the cause of the change, and
 - 3.1.7 if such change has occurred in consequence of the purchase, sale, donation or receipt as a donation of wild animals, the name and address of every person who is party to such purchase, sale, donation or receipt.
4. Every record contemplated in paragraph 3.1 shall be retained for as long as the wild animal, in respect of which such record has been made, is kept in captivity and, at the termination of such captivity, for the period of two years immediately succeeding such termination.

SPECIAL CONDITIONS

1. This permit is issued ONLY for the purpose of capturing, transporting and keeping in captivity seabird specimens for the purposes of attending to seabird in immediate distress and/or providing temporary care to injured, orphaned and/or surrendered seabird by the permit holder. Under exceptional circumstances and only upon CapeNature's request, may bird specimens that are not of a seabird species be kept in temporary captivity for rehabilitation purposes by the permit holder.
2. The capture (hunting) methods authorized with this permit are to hunt (a) with the aid of artificial light, (b) on or from a public road, (c) during the period one hour after sunset on any day and one hour before sunrise on the following day, (d) by means of a weapon in a public place within the area of jurisdiction of a local authority, (e) in the case of seabirds in or upon inland waters, by the use of a boat for the purpose of chasing or capturing such seabird, (f) by means of a trap or by hand, (g) by means of chemical immobilization and (h) from a motor vehicle.
3. This permit DOES NOT authorise the permit holder to conduct any other activity or activities with seabirds (inter alia this permit DOES NOT authorise the capture, captivity, treatment or rehabilitation of seabirds that are not in accordance with the facility's CapeNature-approved management plan and in adherence with the conditions of this permit).
4. The management of all seabirds in captivity MUST comply with international best practice .
5. Where applicable, other regulatory requirements, such as the National Environmental Management: Biodiversity Act, may also affect seabird rehabilitation / care activities and MUST be additionally adhered to .
6. The maximum capacity of the rehabilitation / care facility as approved by CapeNature in the permit holder's management plan may NOT be exceeded.
7. This permit DOES NOT authorise the keeping of any seabirds in captivity by the permit holder and /or its employees at any other premises other than the property listed on this permit.
8. The sale / trade in seabirds of wild origin, their eggs, offspring or semen is PROHIBITED.
9. This permit DOES NOT confer ownership of any seabird of wild origin . All seabirds of wild origin, originating from within the Western Cape Province, held under this permit remain under the custodianship of CapeNature. Any offspring, egg or semen produced by a seabird of wild origin will be regarded as originating from the wild.
10. The authorised transport of seabirds into and within the Western Cape Province by the permit holder is LIMITED TO the transport into and within the province of seabirds for the purposes of attending to seabirds in immediate distress, providing temporary care to injured, orphaned and/or surrendered seabirds and/or transferring injured, orphaned and/or surrendered seabird specimens to another suitable rehabilitation facility that holds a valid CapeNature wildlife rehabilitation permit that is authorised to temporarily keep in captivity the specific species of seabird for rehabilitation purposes. Where a seabird is imported into the Western Cape Province from another province within the borders of the Republic of South Africa for the purposes of rehabilitation , this permit is valid ONLY if the export province has issued an export permit if the legislation applicable in such province prescribes such permit.
11. The commercial display or exhibition of seabird specimens authorised under this permit is PROHIBITED.
12. Tampering, removal or swapping of any permanent marking is PROHIBITED.
13. CapeNature may place restrictions on the species and/or specimens of seabirds the permit holder is authorised to rehabilitate or hold in temporary captivity, based on inter alia the permit holder's experience and facilities as well as on the specific physical requirements and behavioural traits of particular seabird species. CapeNature reserves the right to issue instructions in this regard.
14. SUBJECT TO the prior approval of CapeNature, seabirds may ONLY be released back to the wild in the nearest suitable and sufficient habitat from the site of wild origin.
15. Where a seabird a) cannot be successfully released back to the wild for whatever reason or b) cannot be transferred to the nearest suitable facility that holds of a valid CapeNature wildlife rehabilitation permit and that is authorised to temporarily keep in captivity the specific species for rehabilitation purposes, CapeNature MUST be notified so as to issue an instruction on the further care /treatment or disposal of the seabird specimen. Without a permit from CapeNature, seabirds may NOT be transferred to commercial display or exhibition facilities (including SANCCOB itself). Under exceptional circumstances CapeNature may consider the permanent housing of a seabird of wild origin in a sanctuary or exhibition facility and will be guided by, amongst other instruments the provincial protocol on the disposal of injured, orphaned, confiscated or surrendered wild animals and the IUCN and CITES guidelines on the placement of confiscated wild animals. The conservation benefits of such placement MUST outweigh all potential associated risks thereof (including the risks of the stimulation of illegal possession and/or trade, welfare concerns etc.) SUBJECT TO the specific seabird adapting successfully (both physically and psychologically) to a life in permanent captivity.

16. No seabird may be released anywhere in the Western Cape without prior approval from CapeNature together with the written permission of the landowner on whose land the wild animal is to be released.

17. Unless by release back to the wild with the approval of CapeNature, the disposal of any seabird during rehabilitation / care activities are SUBJECT TO a prior permit authorising the specific disposal.

18. The permit holder MUST take every precaution to avoid imprinting or habituating seabirds to humans. If a seabird becomes imprinted to humans or so habituated that it becomes unsuitable for release back to the wild while under the care of the permit holder, the permit holder will be REQUIRED to dispose of the seabird as directed by CapeNature.

19. NO seabird, except for release back to the wild, may be disposed of (whether through sale, donation or swop) by the permit holder without a permit issued by CapeNature authorising the specific disposal where required.

20. The disposal of seabird carcasses MUST be done in accordance with the National Environmental Management : Waste Act and all other applicable municipal bylaws relating to waste management where applicable.

21. Unless authority has first been received from CapeNature, the permit holder MAY NOT request a veterinarian to perform any surgical procedures (a) that is reasonably likely to result in rehabilitation for an extended period of time after which the animal is likely to become imprinted, habituated or tame; (b) jeopardizes body parts and/or senses that will reasonably prevent the animal from hunting, foraging, eating, escaping from predators, social interaction or reproducing.

22. The translocation of free-roaming, naturally-occurring seabirds that are not trapped (unable to move off the subject property on their own), in immediate distress and/or in imminent danger due to human activity are PROHIBITED. CapeNature does not support the translocation of nuisance wild animals.

23. Only seabirds that are trapped on the subject property (i.e. cannot move off the subject property on their own), in immediate distress and/or in imminent danger due to human activity may be captured and translocated to the nearest suitable habitat with this permit.

24. The permit holder MUST assess and address any risks, impacts and implications posed by the translocation of free-roaming, naturally-occurring seabirds PRIOR to any capture and translocation activities being carried out under this permit so as to avoid, minimize and mitigate the risks to indigenous biodiversity and ensure that conservation best practice is achieved.

25. Receiving and subsequent treatment / care / rehabilitation of seabirds originating from outside the City of Cape Town Metropolitan Municipality, West Coast District Municipality and Overberg District Municipality boundaries are SUBJECT TO the prior approval of CapeNature. CapeNature reserves the right to issue instructions for the transfer of such seabirds to alternative permitted Western Cape seabird rehabilitation facilities.

26. The permit holder MUST keep a register of all seabirds received, captured, translocated, held, transferred and/or released. This register MUST contain the details of acquisitions (dates, source, reason for admittance to facility, exact site of origin), details of possession (purpose of possession), details of disposals (dates, destination, purpose of final disposal, method of disposal e.g. transfer to another CapeNature wildlife rehabilitation facility, death, donation to a permanent captive facility with the applicable transport permit number, release back to the wild including the exact site of release, escape) and details of each specific seabird (common name, scientific name, sex, age) and the details of the authorisation (permit number) for any status change where applicable.

27. The permit holder is responsible for all costs incurred in connection with its wild animal care/rehabilitation activities.

28. This permit has an expiry date and the onus is on the permit holder to apply for the renewal of this permit, if applicable, AT LEAST sixty (60) days prior to its expiration.

29. CapeNature has the authority and reserves the right to inspect the seabird(s) and/or enclosures wherein seabirds are being kept at any reasonable time WITHOUT PRIOR NOTICE.

30. CapeNature has the authority and reserves the right to suspend or revoke this permit for cause. Failure by the permit holder to adhere to any permit conditions or the successful conviction of the permit holder for a contravention of any applicable environmental legislation pertaining to wild animals (including the unlawful translocation, capture, possession, trade, release or captivity etc.) or their carcasses may result in the suspension or revocation of this permit and exclude the permit holder (either for a determined exclusion period or permanently) from qualifying for subsequent permits to capture, transport and keep in temporary captivity wild animals for rehabilitation purposes in the Western Cape Province.

31. The permit holder MUST implement the facility's CapeNature-approved rehabilitation management plan in its entirety. Any deviation from the approved rehabilitation management plan is SUBJECT TO the prior written approval of CapeNature.

32. This permit, SUBJECT TO all the standard and special permit conditions, also authorises all employees of the permit holder for official purposes.

MRONG

**ACTING DIRECTOR: OCEANS CONSERVATION
STRATEGIES**

07/12/2021

DATE

OCS/TOPS/STANDINGPERMIT/2021/08
PERMIT CONDITIONS: 2021/2024

1. EMPOWERING PROVISION

- 1.1 This Permit is issued in terms of regulation 7(1) of the Threatened or Protected Marine Species Regulations, 2017 (Government Gazette Notice No. 40876 of 30 May 2017) (the Regulations) read with the National Environmental Management: Biodiversity Act, 2004 (Act no.10 of 2004) (the Act).

2. AUTHORISATION

- 2.1 Permission is hereby granted to **THE SOUTHERN AFRICAN FOUNDATION FOR THE CONSERVATION OF COASTAL BIRDS (SANCCOB)** (hereinafter referred to as the Permit Holder) to undertake the restricted activities involving specimen of species referred to in *Annexure B* of this permit.

3. SPECIFIC CONDITIONS

- 3.1. This permit authorizes the permit holder thereof to carry out restricted activities involving specimens of species referred to in this permit, only by persons in the employment of the **Southern African Foundation for the Conservation of Coastal Birds (SANCCOB)**.
- 3.2. In the event that the Permit Holder intends to conduct a restricted activity on marine specimens not referred to in this permit, that are listed as threatened or protected marine species, the Permit Holder must apply for a separate permit with the Department.
- 3.3. In the event that the permit holder intends to conduct restricted activities that are not authorized in terms of this permit, involving specimens of marine species referred to in this permit, the Permit Holder thereof must apply for a separate permit with the Department.
- 3.4. The holder of this permit must take measures to prevent hybridization and inbreeding of the specimen of a listed threatened or protected marine species.
- 3.5. For **Temporary Holding, Rehabilitation & Nursery Facilities**:
- a) The Permit Holder must ensure that it's facility comply with the South African National Standard for Zoo and Aquarium Practices (**SANS 10379:2005**), as amended and Norms and Standards relating to the management of seabirds in captivity.
 - b) The Permit Holder must ensure that species received into rehabilitation facility are identified, stabilized and marked accordingly.
 - c) The Permit Holder may receive **stranded** sick (including oiled), injured or orphaned specimen of listed protected or threatened marine species authorised in terms of this permit from members of the public or a registered or permitted facility / person;
 - d) The Permit Holder must ensure that specimen are not disturbed nor harassed at all times and especially while moulting and or if injured.
 - e) The Permit Holder must **prevent** hybridization and inbreeding of species involved;
 - f) The Permit Holder must ensure best practice techniques for feeding admitted species are followed;
 - g) When handling animals, the Permit Holder must minimize risk of harm to the birds and must cover the birds head and protect its feathers with a towel.
 - h) Record keeping of animals is required and may include:
 - time, date, origin of received species;
 - details of the species may include:
 - o age (adult/juvenile) and gender;
 - o condition of species, weight and other factors (beak/carapace length);

- treatment administered (if any).
- food intake and medical requirements (if any) during admission;
- general observations made regarding behaviour and responses;
- records and date of death;

3.6. For Translocating & Trading (as per the TOPMS definition):

- a) No specimen of a listed threatened or protected marine species originating from the wild may be traded without the approval from the Department;
- b) The transfer and/or relocation of species must only be done so when the facility is unable to keep or hold them. The transfer must be to and from a facility registered and permitted under these regulations.
- c) Transfer must be indicated on the stock-book of both facilities and must include:
 - The identity number of the specimen, date of transfer, reason for transfer and the name of the facility the species is transferred to;
 - Receiving facility – identity number, date of receipt of the transferred birds, reason for the transfer and the name of the facility which the species was obtained;
 - Species must be accompanied by the full medical records, history and current treatment.
- d) Importing and Exporting of a captive bred specimen of a listed threatened or protected marine species, into and from the Republic is not allowed in terms of this permit;
- e) Only African Penguins of **F2 generation** and above can be traded internationally and the Permit Holder must apply for a CITES and/or TOPS marine permit in this regard;
- f) All traded specimens of a listed threatened or protected marine species require proof of legal acquisition;
- g) Exchange and translocation of a listed or protected marine species must be to and/or from a registered and/or permitted facility / person by the Issuing Authority and requires written notification to the Department ahead of such exchange;
- h) No specimen of a listed threatened or protected marine species also listed on CITES Appendix 1 may be imported or exported in to or out of the Republic under this permit

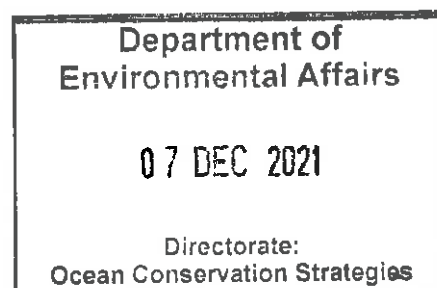

3.7. Live marine species confiscated by the regulatory authorities and brought to the facility for safe-keeping must be treated as part of the facility. The species must be kept in the facility until a go-ahead has been given to the facility for release, transfer, euthanasia and disposal.

3.8. Release of listed threatened or protected marine species:

- a) The Permit Holder must, prior to such release, assess the species to be physically and behaviorally able to fully function in the wild.
- b) This Permit does **not** authorize release, in to the wild, a listed threatened or protected marine species born and bred in captivity and/or previously used for exhibition purposes.
- c) The release of listed threatened or protected marine species that are bred and/or born in captivity, either through natural breeding while in captivity or through a captive breeding programme with the intent to grow the population of such species, require a risk assessment (Reg 13(1c)).
- d) The Permit Holder is allowed to release into the wild (excluding in Marine Protected Areas and/or Islands) listed threatened or protected marine species held in rehabilitation facility and must notify the Department 14 (fourteen) days prior to the intended release. The notification must include dates and possible sites/areas where the specimens will be released. Release of listed threatened or protected marine species in Marine Protected Areas and/or islands requires the approval of this Department and the management authority for the Marine Protected Area.

3.9. Approaching/ Harassing of listed threatened or protected marine species:

- a) The Permit Holder is, in terms of this Permit, allowed to approach at a distance closer than 5 (five) meters, seal and seabird colonies, for the purpose of releasing rehabilitated species.
- b) The Permit Holder may not without notification to the Department, approach seal and seabird colonies to catch species for admittance into the rehabilitation or nursery facility;

- Notification in this regard, must include amongst other information reasons for approaching seabird colonies and catching such species; method of catching such species; envisaged date of undertaking such activity; number of people to undertake such activity;
- c) **ALL APPROACHES SHALL CONSIDER THE DIRECTION OF THE WIND AND MUST BE DOWNWIND OF THE ANIMALS AT ALL TIMES TO AVOID panic and/or STAMPEDE.**
- d) The number of persons allowed to approach, for the purpose of releasing rehabilitated species, near and or on the Seal and Seabird Colonies in terms of this permit is limited to a minimum more so to 3 (three) persons if during breeding season, to minimize the harassment.
- e) **SHOULD ANY APPROACHES CAUSE PANIC AND/ OR STAMPEDE, THE PERMIT HOLDER MUST IMMEDIATELY STOP AND SLOWLY WITHDRAW 100M FROM THE COLONY. ALL ACTIVITIES MUST BE STOPPED FOR A PERIOD OF 2 (TWO) HOURS TO ALLOW THE ANIMALS TO SETTLE.**
- f) In the event that any person under the employment of **The Southern African Foundation for the Conservation of Coastal Birds (SANCCOB)** encounters a stranded and/or entangled listed threatened or protected cetacean, turtle, seal and/or seabird, they shall notify the Department:
 - For marine mammal incidents contact Mr Mdu Seakamela (081 819 5049) (MSeakamela@environment.gov.za);
 - For seabird incidents contact Dr Azwianewi Makhado (021 819 5021) (AMakhado@environment.gov.za);
 - For sea turtle incidents contact Dr Azwianewi Makhado (021 819 5021) (AMakhado@environment.gov.za).

4. GENERAL

- 4.1. This Permit Holder shall comply with all relevant legislation, including but not limited to, the following:
- (a) The Regulations
 - (b) Lists of marine species that are threatened or protected, restricted activities that are prohibited and exemption from restrictions (*Government Gazette* Notice No. 40875 of 30 May 2017);
 - (c) The National Environmental Management Act, 1998 (Act No. 107 of 1998);
 - (d) The National Environmental Management Biodiversity Act, 2004 (Act No. 10 of 2004);
 - (e) The National Environmental Management Protected Areas Act, 2003 (Act No. 57 of 2003);
 - (f) The National Environmental Management Integrated Coastal Management Act, 2008 (Act No. 24 of 2008) including the following regulations:
 - (i) Control of Use of Vehicles in the Coastal Area Regulations (GNR 496 of 27 June 2014);
 - (ii) Management of Public Launch Sites in the Coastal Zone Regulations (GNR 497 of 27 June 2014)
 - (g) The Prevention of Pollution from Ships Act (Act No. 2 of 1986); and
 - (h) The South African Maritime Safety Authority Act (Act 5 of 1998).
- 4.2. The Director: Oceans Conservation Strategies shall be entitled to amend these permit conditions.
- 4.3. Any reference to the Permit Holder in these permit conditions includes the entity or person in whose name this Permit is issued, its employees (whether permanent, full-time or part-time), its contractors and agents/ advisers.
- 4.4. The original or certified copy of the Permit shall be kept at the facility at all times.
- 4.5. A breach of the Act, Regulations or these permit conditions by the Permit Holder may result in the initiation of legal proceedings (civil, administrative and/or criminal). A breach of provisions includes but is not limited to:
- (a) furnishing information to which the Department is entitled, which is not true or complete. Including in the application process; and
 - (b) contravening or failing to comply with a permit condition or with the provisions of the Act or Regulations.
- 4.6. The Department may refuse to re-issue a subsequent permit should the conditions stipulated in this Permit not be adhered to.
- 4.7. This permit authorizes the permit holder thereof to carry out restricted activities involving specimens of species referred to in this permit for rehabilitation and temporary holding, only by persons in the employment of the

Southern African Foundation for the Conservation of Coastal Birds (SANCCOB). If the Permit is in the name of an institution/company/close corporation the individual utilising the permit shall in addition to a certified copy of this Permit, be in possession of identification and/or letter which identifies the individual as an authorised person or employee of the Permit Holder.

- 4.8. The permit holder thereof must ensure that all the necessary authorizations from other national departments, provincial, local authorities and Management Authorities are obtained prior to carrying out the restricted activities referred to in this permit.
- 4.9. The permit holder must obtain a letter of consent from the landowner, if applicable, prior to the carrying out of restricted activities in other person's property.
- 4.10. Any restricted activities permitted under this permit that is conducted within a Protected Area, must be in accordance with the National Environmental Management: Protected Areas Act (Act 57 of 2003) ("NEM:PAA") and the Regulations of that Protected Area.
- 4.11. The permit holder:
- a) may not transfer the permit to any other person;
 - b) may not make any alteration to the permit, in which case the permit will be rendered invalid; and
 - c) is bound by any norms and standards that apply to the restricted activity or species for which the permit is issued, and that the permit-holder must act in accordance with those norms and standards when carrying out the restricted activity to which the permit applies.
 - d) must participate in any national or regional studbook approved by the Department, including the—
 - I. Marking of specimens; and
 - II. Collection of DNA samples for genotyping to determine the parental lineation. The applicant must liaise with the South African National Biodiversity Institute (SANBI), National Zoological Gardens (NZG) for the collection of DNA samples. For further information and details, the permit holder must contact the Bio-bank curator Ms. Kim Labuschagne (012 339 2700).
 - III. Must provide African Penguin samples to the Wildlife Biomaterial Bank (Bio-bank) depository managed by the National Zoological Gardens in contributing towards the conservation of the species. For further information and details, the permit holder must contact the Bio-bank curator Ms. Kim Labuschagne (012 339 2700).
 - e) keep a stock book of specimens of threatened or protected marine species acquired, held in stock and disposed of;
- 4.12. The stock book referred to in paragraph 6(e) must contain the following information:
- a) the name of the permit holder;
 - b) the facility to which the registration applies;
 - c) the unique number to which the registration applies;
 - d) the restricted activity or activities that have been carried out in terms of the permit;
 - e) the date on which the restricted activity or activities contemplated in the paragraph has been carried out;
 - f) the common and scientific names of the species to which the restricted activity or activities contemplated in paragraph (d) relate;
 - g) the number and sexes of specimens involved;
 - h) the markings of specimens involved (if applicable);
 - i) if the permit relates to purchasing, the name, physical address and permit number of the seller;
 - j) if the permit relates to selling, the name, physical address and permit number of the purchaser; and
 - k) if the permit relates to the transport and export of a specimen, and to the extent applicable, the name and physical address of the person where the specimen has been transported or exported to.
- 4.13. The stock book contemplated in paragraph 4.11 and 4.12 must contain the following information:

- a) quantities and sex of specimens acquired, whether such specimens were born in the facility, purchased, received as a donation or a new loan, or a loan returned;
- b) quantities and sex of specimens kept;
- c) quantities and sex of specimens disposed of, whether such specimens died, were sold, or given as a donation or a loan.

4.14. Notwithstanding paragraph 7, the register must contain the following information:

- a) evidence of legal acquisition of new stock acquired during the validity period of the permit,
- b) details of current stock, including the numbers, sex and age of offspring produced during the validity of the permit;
- c) mortalities (percentage and number) and sexes of specimens in the different age groups during the validity of the permit;
- d) past, current (during the validity of the permit) and expected annual production of offspring and, where possible, information on the number of females producing offspring each year, and
- e) plans for the disposal of offspring.

4.15. This permit does **not**:

- a) Authorize a person other than the permit holder to carry out restricted activities referred to in this permit on the property as indicated on this permit unless the person is authorized to do so by means of a permit issued in terms of the National Environmental Management: Biodiversity Act 2004 (Act 10 of 2004);
- b) Absolve the permit holder to adhere to any conditions that may be determined by any relevant issuing authority;
- c) Absolve the holder thereof to obtain additional import, export or re-export permits required in terms of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) Regulations, for the species included in this Annexure B.

4.16. During transportation:

- a) Primary enclosures shall be constructed so that the strength of the enclosure is sufficient to contain the threatened or protected marine species and to withstand the normal effects of transport;
- b) Ensure that the conditions that the threatened or protected marine species will be subjected to during transportation are conducive;
- c) The interior of the enclosures need to be free from any protrusion that could be injurious to threatened or protected marine species within;
- d) No part of the threatened or protected marine species must extend or protrude outside of the primary enclosure which may result in injury;
- e) Any threatened or protected marine species that are to be translocated from this facility need to be transported to a facility that is registered with this Department in terms of these Regulations. Failure to do so may result in prosecution.
- f) Any threatened or protected marine species transported for release must be done so within the species distribution range, adhering to conditions specified under (a) – (d);
- g) Duty of care must be exercised at all times to minimize in-transit mortality;

4.17. For Housing Requirements:

- a) The Permit Holder must ensure that the facility has a Code of Ethics for keeping and caring of animals.
- b) The Permit holder must be able to demonstrate that there are sufficient resources for each individual animal in any shared enclosure used for accommodation and that all animals within a shared enclosure are able to undertake similar activities at the same time, such as allowing all birds to perch or feed at the same time;
- c) Ensure that appropriate space is conditional to the species, its behaviour and nature. This may include the specifics of treatment and recovery. The housing requirements for all specimens need to provide the fauna

with adequate opportunities necessary for its complete recovery from injury and/or learning and practicing vital behaviour necessary for outside survival.

- d) Ensure security from escapes and protection from outside interference. The opening of the enclosures need to be easily accessible for either emergency removal or inspection of the birds by authorized personnel without the risk of escape of the birds;
 - e) A holding area cleaned and sanitized so as to destroy pathogenic agents, maintained so that there is no accumulation of debris or excreta, and in which vermin infestation is minimized;
 - f) Ensure that the enclosure must be structurally sound, constructed of material appropriate for the species housed, be maintained in good repair and designed to protect the animal from injury, abuse or harassment;
 - g) Ensure that the material for the enclosure is of a non-porous, waterproof finish and facilitate effective cleaning and disinfection and is not damaging to species;
 - h) Must prevent overheating, flooding and extreme cold temperatures appropriate for the animals;
 - i) Accommodation for species must:
 - Be suitable to the species and their condition (including health status and age);
 - Be visually and auditory stimuli;
 - Meet their behavioural needs, its situation, space, air quality, cleanliness and temperature;
 - Ensure good water quality;
 - Maintain acceptable noise and light levels and ventilation.
 - j) Fauna must be exposed to natural daylight where possible. Artificial light sources should be timed to mimic current seasonal daylight season;
 - k) Where appropriate, animal pens and cages must open onto secure corridors or other secure areas so that animals are not able to escape from the premises. These corridors/areas must not be used as an exercise area;
 - l) Accommodation must be regularly inspected for damage and potential injury or escape points. Damaged accommodation must be repaired or replaced immediately.
 - m) Pools must consider natural feeding, drinking and bathing behaviour for the different species. This must include depth of water to accommodate such behaviour;
 - n) Rocks and/or piling perches must be considered;
 - o) Door openings must be constructed such that the passage of water/waste is not impeded, or allowed to gather due to inaccessibility;
 - p) All wire mesh/fencing must be kept in good repair to provide an escape and dig proof structure. Where metal bars and/or mesh and/or frames are used, they must be of suitable gauge with spacing adequate to prevent animals escaping or becoming entrapped;
 - q) Drainage must be effective to ensure there is no standing or pooling of liquids. Waste water must not run off into adjacent pens/ units. Drainage channels must be provided.
- 4.18. For Disease Control, the permit holder must:
- a) Have Bio-security measures in place to minimize the spread of diseases within the facility and to the wild population.
 - b) Ensure that upon arrival, all fauna is isolated in a separate area until their health status can be determined;
 - c) Have cleaning protocols for their respective facility;
 - d) Ensure that personal and equipment hygiene are followed at all times;
 - e) Ensure proper cleaning agents and regular cleaning is required to reduce the spread of disease within a facility;
- 4.19. Caring of listed threatened or protected marine species:

- a) Sufficient numbers of staff who are competent to undertake various activities listed in this permit must be available to provide a level of care that ensures that the welfare needs of all the animals are met;
 - b) No specimen of a listed threatened or protected marine species must be kept unless staff on duty are competent in the care and welfare of the animals exhibited and have a recognized qualification and/or suitable and demonstrable experience/training, including working within the exhibition environment.
 - c) The Permit Holder or a designated manager and any staff employed to care for the animals must have competence to identify the normal behaviour of the species for which they are caring and to recognize signs of, and take appropriate measures to mitigate or prevent, pain, suffering, injury, disease or abnormal behaviour.
 - d) Suitable and sufficient training of staff care of listed threatened or protected marine species must be demonstrated to have been carried out in the following areas:
 - Feeding (including supplementary feeding)
 - animal welfare, including recognizing poor welfare;
 - animal handling;
 - animal behaviour;
 - cleanliness and hygiene;
 - feeding and food preparation;
 - disease and zoonosis control;
 - recognition of sick animals and abnormalities.
 - e) The training policy must be reviewed and updated on an annual basis and may include:
 - annual appraisal;
 - planned continued professional development;
 - recognition of knowledge gaps;
 - Use of online courses and literature;
 - Evidence of staff attendance or completion of the training must be provided.
 - f) The Permit holder must provide and ensure the implementation of a written training policy for all staff.
 - g) Ensure your facility has a Code of Ethics for the collection, keeping and caring of animals.
 - h) Ensure your facility has a Code of Ethics for the collection, keeping and caring as well as transportation of animals.
 - i) Regular veterinary medical inspection must be conducted and signed off by a veterinarian. The certificate should include the veterinarian's license number, certification number or equivalent as well as state the animals have been examined, are healthy, appears to be free of any communicable disease;
 - j) Have protocols and procedures in place clearly defining the actions and responses in the case of an emergency;
- 4.20. The Holder of this Permit must ensure that the facility's identified Network Points along the coastline for the temporary holding of stranded marine species are listed and given a letter.
- 4.21. The Permit holder must provide and ensure the implementation of a written training policy for all staff and first responders.
- 4.22. When capacity for care is exceeded, the facility must consider the following:
- a) Refer Threatened or Protected marine species to another registered and permitted facility that is able to better provide; or
 - b) Increase the size of the facility;
- 4.23. An Annual Report must be submitted to the issuing authority, **within 60 calendar days**, after the end of each calendar year for the period of validity of a standing permit if it was issued for a period in excess of 12 months, to OCPermits@environment.gov.za.

- 4.24. This Permit may be cancelled in terms of section 93 of the Act or suspended in terms of section 93B of the Act.
- 4.25. No vehicle may be used in the coastal zone in terms of this Permit unless the Permit Holder is in possession of a valid permit to use a vehicle in the coastal zone issued in terms of the Regulations for the Control of Use of Vehicles in the Coastal Area (GNR 496 of 27 June 2014).

5. VALIDITY OF PERMIT

- 5.1 This permit is valid for the period as indicated on the front page of the Permit .
- 5.2 This Permit shall automatically expire and be invalid should the permit be cancelled and/ or the SAMSA certificate of the nominated vessel expire.
- 5.3 The Permit Holder may lodge an appeal against any decision relating to this Permit and Permit Conditions, or decision to cancel or suspend the Permit by following the appeal procedure in accordance with the National Appeal Regulations, 2014.

END

**STANDING PERMIT**

(Issued in terms of the provisions of the National Environmental Management: Biodiversity Act 2004, Act 10 of 2004)

NAME OF ISSUING AUTHORITY	
NAME	DEPARTMENT: FORESTRY, FISHERIES & THE ENVIRONMENT
ADDRESS	EAST PIER ROAD, EAST PIER 1
	V & A WATERFRONT, 8000
PROVINCE	NATIONAL

SCIENTIFIC NAME	COMMON NAME
REHABILITATION AND RELEASE	
SEABIRDS	
<i>Spheniscus demersus</i>	African Penguin
<i>Phalacrocorax neglectus</i>	Bank Cormorant
<i>Phalacrocorax capensis</i>	Cape Cormorant
<i>Phalacrocorax coronatus</i>	Crowned Cormorant
<i>Phalacrocorax lucidus</i>	White-breasted Cormorant (<i>Non TOPS Listed</i>)
<i>Morus capensis</i>	Cape Gannet
<i>Thalasseus bergii</i>	Greater Crested (Swift) Tern
<i>Larus hartlaubii</i>	Hartlaub Gull
<i>Larus dominicanus</i>	Kelp Gull (<i>Non TOPS Listed</i>)
<i>Eudyptes chrysocome filholi</i>	Southern Rockhopper penguin
<i>Eudyptes moseleyi</i>	Northern Rockhopper penguin (<i>Non TOPS Listed</i>)
<i>Microcarbo africanus</i>	Reed Cormorant (<i>Non TOPS Listed</i>)
<i>Pelicanus onocrotalus</i>	Great White pelican
<i>Haematopus moquini</i>	African Black Oystercatcher
AD HOC (POSSIBLE) ADMISSIONS	
SEABIRDS	
<i>Anhinga rufa</i>	African darter
<i>Stercorarius parasiticus</i>	Arctic skua
<i>Pachyptila desolata</i>	Antarctic prion
<i>Sterna paradisaea</i>	Arctic tern
<i>Sterna vittata</i>	Antarctic tern
<i>Vanellus armatus</i>	Black-smith lap wing
<i>Himantopus himantopus</i>	Black winged stilt
<i>Pachyptila vittata</i>	Broad billed prion
<i>Sterna caspia</i>	Caspian tern

<i>Sterna hirundo</i>	Common tern
<i>Calonectris borealis</i>	Cory's shearwater
<i>Hydrobates pelagicus</i>	European storm petrel
<i>Chroicocephalus cirrocephalus</i>	Grey headed gull
<i>Ardea cinerea</i>	Grey heron
<i>Aptenodytes patagonicus</i>	King penguin
<i>Eudyptes chrysolophus</i>	Macaroni penguin
<i>Tachybaptus ruficollis</i>	Little grebe
<i>Macronectes halli</i>	Northern giant petrel
<i>Macronectes giganteus</i>	Southern giant petrel
<i>Ardea purpurea</i>	Purple heron
<i>Xema sabini</i>	Sabine's gull
<i>Sterna sandvicensis</i>	Sandwich tern
<i>Pterodroma mollis</i>	Soft plumaged petrel
<i>Puffinus griseus</i>	Sooty shearwater
<i>Mecronectes giganteus</i>	Southern giant petrel
<i>Sterna Bergii</i>	Swift tern
<i>Stercorarius antarcticus</i>	Brown skua
<i>Bubulcus ibis</i>	Western cattle egret
<i>Charadrius marginatus</i>	White fronted plover
<i>Charadrius pecuarius</i>	Kittlitz's plover
<i>Procellaria aequinoctialis</i>	White- chin petrel
<i>Pterodroma lessonii</i>	White headed petrel
<i>Aphrodroma brevirostris</i>	Kerguelen petrel
<i>Hydrobates leucorhous</i>	Leeches storm petrel
<i>Daption capense</i>	Pintado petrel
<i>Pterodroma macroptera</i>	Great – winged petrel
<i>Halobaena caerulea</i>	Blue petrel
<i>Oceanites oceanicus</i>	Wilson's storm petrel
<i>Thalassarche melanophris</i>	Black browed albatross
<i>Phoebastria fusca</i>	Sooty albatross
<i>Thalassarche cauta</i>	Shy albatross
<i>Thalassarche chlororhynchos</i>	Yellow-nosed albatross
<i>Thalassarche carteri</i>	Indian yellow nosed albatross
<i>Thalassarche chrysostoma</i>	Grey headed albatross
<i>Sula sula</i>	Red – footed booby
<i>Phaethon aethereus</i>	Red-billed tropic bird

STANDING PERMIT NUMBER: OCS/TOPS/STANDINGPERMIT/2021/08

<i>Phoenicopterus roseus</i>	Greater flamingo
<i>Phoeniconaias minor</i>	Lesser flamingo
<i>Ardea melanocephala</i>	Black headed heron
OILED AND DISEASED WILDLIFE	
Temporary stabilisation centre for seabirds

Curriculum Vitae of Dr. Katrin Ludynia

Research Manager

Southern African Foundation for the Conservation of Coastal Birds (SANCCOB)

2 Hermitage Avenue, Rosebank 7700, Cape Town

cell: +27 82 8377927

kludynia@gmail.com

Born 02 June 1975, Osnabrück, Germany

Married, two children (born 2013 & 2018)

PhD in Biological Marine Science (2007)

>15 years experience in seabird biology and conservation in Southern Africa

SACNASP Registration number: 114201 (Ecological Science)

Qualifications

2007 Doctoral degree (PhD) in Biological Marine Science “magna cum laude”, University of Kiel, Germany

2003 Diploma in Biology (equivalent to MSc), University of Kiel, Germany

1995 Abitur (German Matric HG equivalent), Ursulaschule, Osnabrück, Germany

Academic and Professional Career

- | | |
|------------------|--|
| 2017–
current | Research Manager at SANCCOB |
| 2015–2016 | Project Manager: Marking of African penguins using PIT as a tool for long-term monitoring and population dynamics |
| 2014 | Presenter and organisational support for German TV production “Umkhondo – at the Cape of wild animals” covering African penguin conservation efforts in South Africa |
| 2014 | Consultant for Cape Nature, breeding success analyses of African penguins at Dyer Island and Stony Point including supervision of MSc student Yolokazi Galada |
| 2012–2013 | Postdoctoral research fellow at the MA-RE Institute (South African Research Chair in Marine Ecology and Fisheries), Department of Biological Sciences, UCT; Convenor of multi-stakeholder expert group for the <i>Penguin Pressure Model</i> |
| 2010 | Member of the group of researchers and stakeholders who drafted the Biodiversity Management Plan for the African penguin (Government Gazette 36966, 2013) |
| 2008–2013 | Postdoctoral research fellow at the Animal Demography Unit, UCT; in cooperation with the Ministry of Fisheries and Marine Resources (MFMR), Lüderitz, Namibia; Project: <i>Spatial and temporal variability in diet composition of seabirds in the northern Benguela system and its effects on population trends of endangered seabird species</i> |
| 2009–2011 | Associated Researcher at the Max-Planck Institute for Ornithology, Radolfzell, Germany & New Island Conservation Trust, Falkland Islands; Project: <i>Foraging behaviour of rockhopper penguins in the Falkland Islands</i> |

2004–2007	Doctoral studies at the Research and Technology Center Westcoast (FTZ), University of Kiel, Germany: <i>Identification and characterisation of foraging areas of seabirds in upwelling systems: biological and hydrographic implications for foraging at sea</i> (collaboration with the Ministry of Fisheries and Marine Resources, Namibia and the University of Coquimbo, Chile)
2000–2003	Diploma studies in Biological Marine Science, Zoology and Geology at the University of Kiel, Germany and the University of Coquimbo, Chile: <i>Foraging ecology of the Kelp gull (Larus dominicanus) in the Humboldt Current upwelling system</i>
2000–2003	Student research assistant, University of Kiel, Germany
1990	University studies in Marine Biology at the Universidad Austral, Valdivia, Chile
1996–1999	University studies in Biology (Diploma) at the University of Göttingen, Germany

Professional activities and associations

Member of scientific working groups:

- Biodiversity Management Plan African Penguin Working Group (Department of Forestry, Fisheries and the Environment, South Africa)
- Seabird Technical Team (Department of Forestry, Fisheries and the Environment, South Africa)
- Conservation Stakeholder Group, Island Closures (Department of Forestry, Fisheries and the Environment, South Africa)
- IUCN Species Survival Commission Penguins
- IUCN Species Survival Commission Climate Change
- SEACODE research group, Namibia
- Seabird Group and African Seabird Group
- Association of Zoos and Aquariums

Employment

June 2017 - Present

Southern African Foundation for the Conservation of Coastal Birds (SANCCOB):
Clinical Veterinarian

September 2014 to August 2015

AfriCat Foundation:
Veterinarian and Head of Research

May 2013 to August 2014 August

Department of Production Animal Studies, University of Pretoria:
Part-time, after-hours veterinarian

Oiled Wildlife Response and Rehabilitation Experience

Incident command System ICS 100 and ICS 200

2019 'Chrysanthi' Oil spill in the Eastern Cape: South Africa

Veterinarian and rehabilitation centre management

Over 100 oiled seabirds were admitted into rehabilitation during in this spill

2019 New Zealand - National Oiled Wildlife Response Team training workshop

Education

University of Pretoria, South Africa 2006-2017

2017 MSc Veterinary Science

2012 BVSc

2008 BSc Veterinary Biology

St Paul's College, Windhoek, Namibia 2000-2004

2004 Grade 12- HIGCSE (Top male student with 5 subjects in Namibia)

2003 Grade 11- IGCSE (Top male student in Namibia) (Full school colours)

CAREER HISTORY

Seabird Research Internship

Department of Environmental Affairs, Cape Town

January 2010 to November 2010

Seabird Rehabilitator

Southern African Foundation For the Conservation of Coastal Birds. (SANCCOB)

April 2013 to December 2015

Seabird Research Technician on Marion Island (Seabirds and fur seals)

Department of Environmental Affairs

March 2016 to May 2017

Research Assistant

Southern African Foundation For the Conservation of Coastal Birds. (SANCCOB)

May 2017 to July 2020

Researcher

Southern African Foundation For the Conservation of Coastal Birds. (SANCCOB)

July 2020 to present

ACADEMIC QUALIFICATIONS

TERTIARY:

Completed a National Diploma in Fisheries Resource Management from Cape Peninsula University of Technology in 2011.

Completed a BSc. Hons. In Ichthyology and Fisheries Science from Rhodes University in 2012.

Vanstreels, R., Proctor, H., **Snyman, A.**, Hurtado, R., Ludynia, K., Parsons, N., & Pistorius, P. (2019). Nasal mites (Mesostigmata: Rhinonyssidae) in African penguins (*Spheniscus demersus*). *Parasitology*, 146(1), 121-127. doi:10.1017/S0031182018000999

Curriculum Vitae

PROFILE

Committed and driven wildlife biologist with a strong passion to protect and conserve the natural world, with more than a decade dedicated to marine conservation. Seeking to use my leadership and interpersonal skills to achieve organisational strategic goals.

WORK EXPERIENCE

Head of Conservation

SANCCOB | Cape Town | November 2021 - present

Overall strategic leadership, development, and oversight of the implementation of conservation initiatives to advance SANCCOB's mission.

- Advocate against the primary threats facing endangered seabirds;
- Align SANCCOB with partners to achieve the conservation strategy;
- Lead and coordinate SANCCOB's conservation division, including rehabilitation, veterinary, oiled wildlife preparedness and response, research, and advocacy

Preparedness & Response Manager

SANCCOB | Cape Town | April 2020 – November 2021

Responsible for ensuring SANCCOB is prepared to respond to oil-affected seabirds, maintaining a state of readiness 24/7/365.

- Work with government as well as oil and gas industry to improve preparedness and formulate contingency plans for regional and national ecologically sensitive areas;
- Advocacy work involving various stakeholders;
- Grant writing and project management;
- Manage all aspects of the Robben Island Seabird Ranger Project;
- Participate in the Global Oiled Wildlife Response System (GOWRS) and maintain a state of 24/7 readiness to respond to a global oil spill.

Rehabilitation Manager

SANCCOB | Cape Town | 2011 – 2020

Responsible for overseeing seabird rescue, rehabilitation and release.

Ensuring seabird rehabilitation was performed according to best practice.

- Led and mentored a team of rehabilitators;
- Developed protocols designed to advance animal welfare;
- Greatly contributed to the establishment of the Chick Rearing Unit and the SANCCOB seabird hospital;

EDUCATION

- Bachelor of Science with Honours with Honours Animal Sciences
Plymouth University, UK | 2002-2005
- Higher National Diploma Animal Science
University of Glamorgan, South Wales | 2000-2002

HIGHLIGHTS

- 12 years of experience in senior management
- Stakeholder Management
- Passionate about biodiversity conservation and driving positive change

INTERESTS

- Wildlife & the Natural World
- Running
- Travelling
- Reading
- Diving

EXPERTISE

- Oiled wildlife preparedness
- Project management
- Conservation strategies

- Stakeholder engagement;
- Raised funds and implemented the Robben Island Seabird project.

Seabird Rehabilitator

SANCCOB | Cape Town | 2010 – 2011

Provided a high standard of care for injured, sick, oiled or abandoned seabirds. Ensuring that volunteers and interns were trained according to standard operating procedures.

- Daily care of seabird patients and non-releasable seabirds;
- Maintain the seabird facilities;
- Mentor and supervision of interns and volunteers;
- Provided theory and practical training to provincial and local government, as well as volunteer first responders;
- Assisted the veterinarian with clinical aspects of seabird care.

Hospital Manager

Tenikwa Wildlife Awareness Centre | Plettenberg Bay | 2009 - 2010

Overall supervision of various wildlife species undergoing rehabilitation as well as providing daily care to the resident awareness collection.

- Led a team of animal care staff;
- Developed clear protocols for animal health, enclosure hygiene, nutrition and enrichment;
- Volunteer coordination.

Fundraiser

Animal Anti-Cruelty League | Cape Town | 2008 – 2009

Exploring potential sponsors and funding avenues, creating marketing material, writing funding proposals.

- Successful with in-kind donations;
- Marketing adoption animals in various media channels;
- Organised a walkathon fundraising event.

Welfare Manager

SPCA | King William's Town | 2005 – 2006

Overall responsibility for the rescue and rehoming of domestic animals, domestic animal boarding facility and agricultural animal pound in conjunction with law enforcement. Investigating complaints of animal abuse and taking necessary steps to prevent further cruelty. Animal behaviour assessments, coordinating sterilisations, adoption drives, fundraising and follow-up home checks. Advocating responsible pet ownership.

- Led a team of animal care staff;
- Implemented the local outreach project;
- Presented talks at various venues to create awareness and generate funds.

- Advocacy skills
- Excellent communicator
- Animal welfare

VOLUNTEER WORK

- University of Cape Town
Animal welfare advisor, Science
Faculty Animal Research Ethics 2012
- present

COURSES

- First Aid Level 1 & 2 | 2021
- Laboratory Animal Science, Ethical Considerations of Animals in Research | 2020
- Incident Command System Level 1 & 2 | 2018
- Incident Command System Level 3 | 2021
- Fire Awareness | 2017
- Health & Safety | 2017

2023 AZA CONSERVATION GRANTS FUND

Statement of Institutional Support

One copy of this statement must be **electronically signed** by the institutional CEO/Director using the checkbox below, and submitted as an attachment to the CGF Application email titled “**SIS Institution Name**” for *each* institution or organization that fits one or more of the following criteria:

1. **Has an employee listed as a Principal Investigator or Co-Investigator on the Application Cover Sheet.**
2. **Is listed as a collaborating institution or organization on the Application Cover Sheet.**

By signing this form, all participating institutions, whether participating as a facility or through an employee, take responsibility for: 1) completing their part of the proposed project and 2) obtaining Institutional Animal Care and Use Committee (IACUC)* or Institutional Review Board (IRB)** approvals, if necessary. All accountability for conducting responsible research lies in the hands of each participating institution, not the CGF Scientific Advisory Committee.

All *Statement of Institutional Support* forms must be received as part of the CGF Application Email.

The (*Institution Name*) Southern African Foundation for the Conservation of Coastal Birds (SANCCOB) has reviewed the proposal titled (*Proposal Title*) Screening for Highly Pathogenic Avian Influenza in African penguins admitted for rehabilitation in South Africa and commits itself to providing the time, resources and/or financial support as stated in the application, and for obtaining IACUC and/or IRB approvals, if necessary, should the proposal be selected for funding by AZA's Conservation Grants Fund.

Natalie Maskell

Name

CEO SANCCOB

Title

(Zoos and Aquariums must include the signature of the Institutional CEO/Director above and cannot substitute the signature of the COO, General Curator, Vice President, Department Director, or Principal Investigator. Universities, Colleges, and Federal or State Government entities may substitute the signature of a Governing Official.)

22 February 2022

Date

☒ **Checking this box serves as my electronic signature to this letter of support. I affirm that I am the person listed above and understand that this letter WILL NOT be accepted unless the box is checked.**

* Institutional Animal Care and Use Committee (IACUC, for U.S. applicants) or the equivalent oversight committee (for non-U.S. applicants) approval is desirable for any proposal, but is required for any project in which animals are to be involved in invasive procedures and/or procedures that may result in pain, harm, distress, and/or altering of behavior (this includes any time an animal in the wild is sedated or anesthetized). This generally excludes samples obtained during regularly scheduled veterinary or husbandry procedures or emergency medical procedures. IACUC (or the international equivalent thereof) approval is required for both *in situ* and *ex situ* projects. Each institution involved in a project must submit the project proposal to its IACUC (or equivalent) for review. In order to be considered complete, proposals must include the Statement of Institutional Support from each participating institution/organization as recognition of compliance with these IACUC (or equivalent) approval guidelines.

If an institution is not registered as a research facility or similar facility and therefore does not have an IACUC (or equivalent), it needs to become affiliated with a university, zoo, or other body that has an IACUC (or equivalent) in order to obtain approval.

** Any projects supported through CGF funding that involve human subjects must be conducted under the auspices of a federally registered Institutional Review Board (IRB) and be consistent with 45 CFR Part 690: Federal Policy for the Protection of Human Subjects if the work or researchers are based in the USA. For members submitting from outside the USA for projects to be completed entirely outside the USA and its territories may use a process that meets the requirements of the prevailing legislation for protection of human subjects where the principal investigator is based or in the country where data collection will occur, whichever is more stringent. We note that all protocols must still conform to the types of protections outlined in 45 CFR Part 690 irrespective of the reviewing organization.

2023 AZA CONSERVATION GRANTS FUND

Statement of SAFE Species Program Alignment

AZA's Conservation Grants Fund awards funds to members to implement SAFE program plans and advance the species program team's priorities. Because of the granting program's alignment with SAFE species programs, coordination with SAFE Species Programs is expected.

Program leaders are asked to submit this form for proposals related to their SAFE species program. To assure program review of relevant submissions, AZA SAFE Program Leaders may also be asked to serve as expert reviewers during the application review process and may express their support for a proposal at that time.

One copy of this statement must be **electronically signed** by the SAFE Species Program Leader using the checkbox below, and submitted as an attachment to the Application email titled "**SOA SAFE Species Program Name**" for *each* SAFE species program relevant to the Application.

All *Statement of SAFE Species Program Alignment* forms must be received as part of the CGF Application Email.

I affirm that, to the best of my knowledge, the proposal titled (*Proposal Title*) Screening for Highly Pathogenic Avian Influenza in African penguins... aligns with and advances the objectives and priorities of SAFE (*Species Program Name*) African Penguin.
