

Association of Zoos & Aquariums

2023 AZA CONSERVATION GRANTS FUND

Application Instructions

DEADLINE

This 2023 Conservation Grants Fund (CGF) electronic application must be used for all proposals. Completed applications must be submitted via email no later than **5:00 p.m. EDT** on **15 March 2023**. An auto-response email with a time-stamp will confirm receipt of the application.

*Incomplete applications, or applications received after 5:00 p.m. EDT on 15 March 2023, **regardless of cause**, will NOT be eligible for consideration. NO DEADLINE EXCEPTIONS WILL BE MADE.*

MEMBERSHIP

The Principal Investigator (PI) and all Co-Investigators (CIs) *must be individual AZA members* at the Professional Associate, Professional Affiliate, Professional Fellow, or Student level. Institutional membership does not count as individual membership and individual members at the Friend level are not eligible. Other participants actively involved in the completion of the project should be listed as collaborators and are not required to be AZA members. To apply for membership, visit <https://www.aza.org/individual-membership>.

FUNDING TIMELINE

All CGF projects must be completed within 12 months. CGF grants are intended to serve as seed money to attract additional funding and proposals should request funds only for this one-year period. Identical components of a project will not be funded for more than two grant cycles; however, funding requests for different components of the same project may be applied for in subsequent grant cycles.

CGF proposals undergo a two-tiered review process, outlined at <https://www.aza.org/cgf-selection-process>. Applicants will be notified of funding decisions in early September 2023 and funds will be available 2 October 2023. CGF funds can only be used for proposal expenses incurred on or after the award date. Expenses incurred prior to the award date will not be covered by CGF funds.

APPLICATION GUIDELINES

The application and all supplemental forms are posted online at: <http://www.aza.org/cgf-information-for-applicants/>. These documents contain form fields that must be completed and submitted via email to: CGFapp@aza.org. *All application materials must be in electronic format. No hard copies of any application materials will be accepted.*

It is strongly recommended that you save a copy of your completed application and supplemental forms as a backup. Only completed applications, submitted by the deadline defined above, will be reviewed. Applicants will be informed electronically if their application is incomplete.

APPLICATION INSTRUCTIONS AND CHECKLIST: All completed application materials must be submitted **in one email** by the deadline identified above and include the following:

Application: The application is one document consisting of the three sections outlined below. All sections must be complete in order for the application to be considered complete. The application must be submitted as a Microsoft Word document titled **"Application"** and attached to your Application email.

Applications submitted in Portable Document Format (PDF) will NOT be eligible for consideration. NO EXCEPTIONS WILL BE MADE.

Note that “spell checker” and “track changes” functions cannot be used in this form. AZA strongly recommends that applicants compose the content for their application in a separate document to make use of these features, and then copy and paste the final text into the form fields. When composing in a separate document, be aware of character limitations. If the copied text exceeds the character limit when pasted into a form field, *all text exceeding the character limitation will be cut off and will not appear in the final proposal.* Character limits include spaces.

Also note that certain formatting such as italics, bold, and underlining, is unavailable due to the application format. AZA recommends the use of numbering and spacing to emphasize important points in the text.

- ☒ **Cover Sheet.** Fill in the text fields for the project title, amount requested, and PI and CI information. Choose *two* project categories from the given list and identify the SAFE species that is (are) the focus of the project. Include a project abstract of 1500 or fewer characters.
- ☒ **Project Proposal.** Text fields are provided for responses to questions 1-12. Fields have a limit on the number of characters that may be used to keep the application concise. Character limits, including spaces, are stated following each question. If a question is not applicable to your proposal, write “N/A” in the field but *do not leave any form fields blank*, as this may delay processing of your application.
- ☒ **Budget.** Required budgetary information includes:
 - ☒ Detailed Project Budget. Detail how the budget will be allocated to specific items and indicate which funding source will pay for each item. State the total project budget, the amount requested from CGF, and other financial support applied for or received. Each of these amounts should reflect the one-year duration of the project. Funding decisions are announced in early September and CGF funds are to be used for work from the announcement date forward. Expenses incurred prior to the announcement will not be covered by CGF funds.
 - ☒ Budget Justification. Provide an explanation of why specific major items are essential to the project and reasonable in cost.

Required Attachments: The following must be attached to your Application email:

- ☒ **Curricula Vitae (CV).** A CV is required for each PI and CI listed on the Cover Sheet and must follow the format stated in these guidelines. CVs must not exceed two letter-sized (8.5 by 11 inch) pages each and must be typed in a legible font size (12 point recommended); each side of the paper counts as one page. CVs may be attached for collaborators but are not required. Each CV must be submitted as a separate document entitled, “**CV Investigator’s Last Name.**” CVs *exceeding the maximum length will be cut off at the second page.*
- ☒ **Statement of Institutional Support Forms.** Electronically signed *Statements of Institutional Support* from the CEO(s)/Institutional Director(s) (not the COO, General Curator, Vice President, Dean, or Department Director) of the PI’s institution and **each** CI institution *and* collaborating institution must be attached to the Application email as separate documents titled “**SIS Institution’s Name.**” The *Statement of Institutional Support* form can be found with the rest of the Application materials on the AZA website identified above.

Applicants wishing to include support letters from entities *other than* PI and CI institutions, collaborating institutions may submit such items as appendices.

Letters of support from PI and CI institutions and collaborating institutions will not be accepted in lieu of the *Statement of Institutional Support* form.

- ☒ **Statement of SAFE Species Program Alignment Forms.** Electronically signed *Statements of SAFE Species Program Alignment* from the program leader of relevant SAFE species program(s) must be attached to the Application email as separate documents titled “**SOA SAFE Species Program Name.**” The *Statement of SAFE Species Program Alignment* form can be found with the rest of the Application materials on the AZA website identified above.

Letters of support/endorsement from AZA Programs (Taxon Advisory Groups, Species Survival Plans®, SAFE) are **not** accepted, although coordination with AZA SAFE Programs is expected and should be described in Question 1. To assure program review of relevant submissions, AZA SAFE or Animal Program Leaders may serve as expert reviewers in the application review process and may express their support for a proposal at that time.

- ☒ **Permits.** If permits are required to complete your proposed project, you must attach a copy of each to your Application email. Each permit attached to the Application email must be titled “**Permit #.**” *If you are not able to obtain a required permit before submitting this proposal, you must submit it by 15 June 2023 to ensure award eligibility.*
- ☐ **Proposal Resubmission Form.** If a proposal for this project was previously submitted for AZA grant funding (i.e., CGF or SAFE granting program) and rejected, the revised proposal *must* include a completed *Proposal Resubmission Form* as an attachment on the Application email. This attachment must be submitted as a Microsoft Word document titled “**Resubmission Form**” and attached to your Application email. *Resubmission forms submitted in Portable Document Format (PDF) will not be accepted.* The form can be found with the rest of the Application materials on the AZA website identified above.

Note: Proposals that fail to provide all items identified in the above checklist in the correct format will not be reviewed.

Non-Required Attachments: The following attachments to your Application email are optional:

- ☒ **Citations (recommended).** Citations/references for statements made in the Application should be included in a separate document titled “**Citations**” and attached to the Application email.
- ☒ **Appendices.** Appendices are allowed, but may only *clarify*, and not *supplement*, information in the narrative. For example, photos or diagrams would be acceptable, but not videos, publications, or SAFE species program plans. Appendices must be attached to the Application email titled “**Appendix #.**”

Note: Appendices that do not adhere to these guidelines will be removed from the proposal prior to review.

SUBMISSION INSTRUCTIONS

By submitting your application, you agree, if funded, to abide by the Grant Terms and Conditions posted on AZA’s website at <http://www.aza.org/cgf-information-for-applicants/>.

Proposals must be submitted electronically using the 2023 Application and related forms via a **single email, with the proposal title as the subject line**, to CGFapp@aza.org no later than 5:00 p.m. EDT on 15 March 2023. Hard copies of any application materials or applications received after this deadline will not be accepted regardless of cause.

AZA's email system accepts messages up to 8 MB in size. In cases when applications are too large to be accepted in one email, AZA will accept the application submission in two separate emails, provided that the same proposal title is identified in the subject line of each.

The 2023 Application email **must** include the following attachments

- Application (this completed form);
- CVs for each Principal and Co- Investigator(s);
- Statements of Institutional Support for each PI and CI institution and collaborating institution;
- Statement(s) of SAFE Species Program Support; and
- A Proposal Resubmission form, if applicable.

The Application email may also include citation and appendices attachments.

Auto-response emails will be sent to applicants confirming receipt of the application package. If an auto-response is not received, please resubmit the application. If an applicant submits more than one proposal, the person should ensure that an auto-response was received for *each* submission. If submission problems arise, contact the AZA office at 301-562-0777. If you submit your application after the 5:00 p.m. deadline, you may still receive an auto-response from the Application inbox; however, your proposal will not be reviewed.

Applications which fail to follow submission instructions or are time-stamped after the deadline will not be considered and applicants will be notified that their application is inadmissible.

APPLICATION ASSISTANCE

The CGF website (<http://www.aza.org/cgf-information-for-applicants/>) contains a wealth of information to help applicants compose a competitive proposal.

Proposals received before 8 March will be reviewed by AZA staff to ensure that the application is completed correctly. Early submission allows time for AZA staff to inform applicants if problems are noted in time for resubmission. Please note that AZA staff does not review early proposals for content.

2023 AZA CONSERVATION GRANTS FUND Cover Sheet

Project Number:
For AZA use only

Title of Project: The Orangutan Haven - Improving Welfare of un-Releasable Orangutans and Giving Them a Role in Ensuring the Survival of Their Species

Amount Requested: \$20,000 (round to the nearest whole dollar)

Project Start Date: November 1, 2023

End Date: October 31, 2024

(CGF funding is for one year only, beginning no earlier than the award date)

Investigators: Each Principal Investigator (PI) and Co-Investigators (CI) *must be an individual AZA member at the time of application* at the Professional Associate, Professional Affiliate, Professional Fellow, or Student level. Other participants should be listed as collaborators on this form.

A Curriculum Vitae (CV) is required for each PI and CI, and a Statement of Institutional Support (SIS) form is required for each PI and CI Organization.

1. Principal Investigator (PI) Name and Title: Ian Singleton, Ph.D., OBE

CV Attached? ☒ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (required; available at: <http://www.aza.org/cgf-information-for-applicants/>). ☒ (required)

Individual AZA Member Number: 6387000 (required)

Institution/Organization: PanEco Foundation

Statement of Institutional Support Form Attached? ☒ (required)

Institutional Address: Chileweg 5, CH-8415 Berg am Irchel, Switzerland

Phone: 62811650491

E-mail: ian@sumatranorangutan.org

2. Co-Investigator (CI) Name and Title: Ms. Diana Kosmanto

CV Attached? ☒ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (available at: <http://www.aza.org/cgf-information-for-applicants/>). ☒ (required)

Individual AZA Member Number: 81226473 (required)

Institution/Organization: Yayasan Ekosistem Lestari

Statement of Institutional Support Form Attached? ☒ (required)

Institutional Address: Jalan Bunga Sedap Malam IX No. 3, Medan 20131, Sumatera Utara, Indonesia

Phone: 6282167475778

E-mail: diana.kosmanto@yel.or.id

3. Co-Investigator (CI) Name and Title:

CV Attached? ☐ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (available at: <http://www.aza.org/cgf-information-for-applicants/>). ☐ (required)

Individual AZA Member Number: (required)

Institution/Organization:

Statement of Institutional Support Form Attached? ☐ (required)

Institutional Address:

Phone:

E-mail:

Information about additional co-investigators may be included in a separate document titled “**Additional Co-Investigators**” and attached to your Application email.

Collaborating Institutions or Organizations: A collaborating institution is defined as any institution actively involved in the design or completion of the project. Funding institutions *not* actively involved in project design or completion should be listed in the "Grant/Matching Support" section of the Project Budget and need not be listed as collaborators.

List all collaborating institutions below, including the institutions of the PI and CIs listed on the Cover Sheet, as well as those associated with the personnel listed in Question 6, and attach a Statement of Institutional Support form for each collaborating institution to the Application email.

Collaborating Institution Names:

PanEco Foundation *Statement of Institutional Support* Form Attached? ☒ (required)

Yayasan Ekosistem Lestari *Statement of Institutional Support* Form Attached? ☒ (required)

Statement of Institutional Support Form Attached? ☐ (required)

Statement of Institutional Support Form Attached? ☐ (required)

Statement of Institutional Support Form Attached? ☐ (required)

Note: If additional Collaborating Institutions or Organizations need to be included, add their information in a separate document titled "**Additional Collaborators**" and include it as an attachment to your Application email.

Project Categories (choose two that best describe the project):

☐ Animal / Population Management (*Ex situ*)

☒ Conservation Education / Engagement

☐ Animal Health

☐ Field Conservation (*In situ*)

☒ Animal Welfare

☐ Research

☐ Communications / Public Relations

Identify the SAFE species program(s) this project will benefit: Orangutan

Project Abstract (limit 1,500 characters with spaces):

The single greatest threat to orangutans is the continued destruction and fragmentation of their remaining habitat, mostly due to conversion for large scale plantations, and the construction of inappropriate infrastructure projects. Orangutans are also still often killed, primarily as pests if raiding crops, or during the forest clearance process. Wild orangutan populations have subsequently declined dramatically, with only around 14,600 orangutans in Sumatra: ~13,800 Sumatran and <800 Tapanuli orangutans. Due to the rate of their decline both species are listed on the IUCN Red List as Critically Endangered, and both have featured on the "the World's 25 Most Endangered Primates" list.

The Orangutan Haven will achieve two primary objectives, first, to provide care and the best possible quality of life for ex-captive orangutans that cannot be returned to the wild, and second, to serve as a unique education resource for schools, and domestic and international visitors alike, to learn about the plight facing wild orangutans, their tropical rainforest habitat and the countless other rare and threatened species that share it with them. The Haven will be a unique asset to the region and will focus considerable attention on conservation, animal welfare and sustainable development, through its unlimited potential for education and awareness raising.

2023 AZA CONSERVATION GRANTS FUND

Project Proposal

1. Describe the overall project and its significance for conservation and/or management. What species, sites, habitats, populations, or questions are targeted or addressed and what critical needs will be met? Explain the project's relevance to the SAFE species' program team's priorities and how it supports implementation of the team's 3-year program plan and existing regional and/or global recovery plans. **LIMIT 5,000**

CHARACTERS with spaces

The Sumatran (*Pongo abelii*) and Tapanuli (*Pongo tapanuliensis*) orangutan species, both endemic to Sumatra, are listed as Critically Endangered (CR) by the International Union for Conservation of Nature (IUCN; Nowak et al., 2017; Singleton et al., 2017). At present there are <14,000 Sumatran and <800 Tapanuli orangutans remaining in the wild (Wich et al. 2016).

Throughout their range, orangutans are threatened by two main and often related factors; habitat destruction (i.e. degradation, loss and fragmentation), and the killing and capture of individuals. Deforestation in Sumatra is commonly due to large-scale agriculture, small-scale localized encroachment, logging, infrastructure development and mining. Especially worrying is that Sumatra's lowland and peat swamp forests, areas with the highest biodiversity and highest densities of orangutans, also suffer the highest rates of deforestation. While more difficult to quantify, killing of orangutans remains a serious concern despite the species long being protected under Indonesian law. It tends to be more common in areas where forests are actively being cleared as this leads to easier human access and increased human wildlife conflicts in surrounding areas as animals try to survive. When adult females are killed, and an infant survives this process, it is often these individuals that end up in human hands, either as illegal pets in the local region or as part of the illegal wildlife trade.

To address this issue, since 2001 the PanEco Foundation and Yayasan Ekosistem Lestari (YEL) have been implementing the Sumatran Orangutan Conservation Programme (SOCP). The SOCP works to confiscate, rehabilitate, and reintroduce ex-captive orangutans, at two reintroduction centres, into protected forests that historically did once harbour orangutans, but not in recent times. To date the SOCP has rescued and cared for over 450 ex-captive orangutans at its specialist Orangutan Quarantine and Rehabilitation Centre in North Sumatra. Over 350 of these have been rehabilitated and reintroduced back to the wild (200 in Jambi province and 150 in Jantho, in Aceh province) to create two entirely new, viable and self-sustaining wild populations of this critically endangered great ape. These activities are 100% aligned with the Orangutan SAFE species 3 year action plan, Conservation Strategic Objective 2, activity 2.1 "Confiscation and translocation of orangutans to appropriate habitats in country based on site specific release plans following IUCN guidelines."

A further 50 or so orangutans currently reside at the quarantine centre. Most will also be released to the wild when ready, but there are 8 individuals that can never be released due to disability (some blind due to being shot), or other concerns – all a result of human impacts on their lives. Currently they are housed in large metal cages at the centre. The Orangutan Haven will provide each of these orangutans a new home on large vegetated naturalistic islands surrounded by water moats, giving them a new life with all the support they need, in a far more spacious and naturalistic setting. They will each have a dramatically improved quality of life, and a far more positive and meaningful future in which they will serve as 'ambassadors' for their wild counterparts, helping to communicate the plight of Critically Endangered orangutans to a wide and diverse audience. Despite remaining in captivity, they will continue to contribute to the future survival of their species, and its rainforest habitat, via their unique and invaluable role in education and raising awareness. Whilst the Orangutan Haven itself is not an AZA member, and not technically a zoo (though it does have the Indonesian equivalent of a zoo license), these activities align 100% with the Orangutan SAFE species 3 year action plan, Communication Strategic Objective 1 Activity 1.2 "Connect Zoo visitors with Orangutan Conservation issues year round."

The Orangutan Haven as a whole will be a unique resource for education and awareness raising, and ultimately changing the perceptions and behaviour of a highly diverse range of people, at all levels of society. From the development of the initial concept, attention has been focussed on maximising the potential for education at the Haven. Acute attention has been paid to detailed designs and the style of all facilities, and also to the use of sustainable building techniques and materials. Each facility, from a micro-hydro plant to toilets, bridges and including the orangutan islands and holding areas, is intended to be an educational resource in itself, showcasing alternative ways of doing things and alternative construction techniques and materials. The Haven also prioritizes local community involvement and employment in its activities, helping to boost livelihoods and build local capacity, leading to the betterment of civil society as a whole through increased opportunities.

2. List the goal(s) and associated objective(s) of the proposed project and the actions that will be taken to achieve them. Goals should describe the desired status in the long-term of the question or problem that the project will address. Objectives should state the immediate results that are necessary to meet the long-term goal(s). Actions should be the specific activities the project will undertake to complete each objective. If the proposal is a request to fund part of a larger project, this section should focus on the part for which CGF funding is being requested during the one-year duration, while also providing some context regarding the larger effort. **LIMIT 4,500 CHARACTERS with spaces**

The primary goal is to provide un-releasable orangutans with the best possible quality of life and welfare, and the opportunity, via their unique role and potential to educate visitors, to continue to contribute to the long-term conservation of their species in the wild. As orangutans can live as long as 60 years or more, the Orangutan Haven is an innovative solution to not only provide a far more acceptable and stimulating environment for the orangutans, but to also enable them to play a unique education and awareness raising role, helping people to better understand the problems orangutans like themselves, and their wild counterparts face.

Problem statement:

Indonesia is known as a global hub for the illegal wildlife trade. Countless wildlife species are constantly offered for sale in animal markets, along roadsides, and increasingly online.

The main target audience of the Haven is the people of Medan, a sprawling city of 3 to 4 million people, whose daily workplace decisions have far reaching impacts on orangutans in Sumatra, and their habitat. It is planned to allow managed access to the Haven for visitors, such that both today's decision makers, and those of tomorrow, will better understand why orangutans end up in human hands, what the consequences of this are for orangutans and humans alike, and what is needed to conserve wild orangutans and their rainforest habitat. The Haven will also promote sustainable development, through showcasing organic agriculture and alternative green technologies and architecture, with facilities such as an education for schools an ecology centre for students and researchers. It will feature a 'netted' forest area to house ex-captive fruit bats to educate visitors about the wildlife trade, aviaries for captive breeding of Critically Endangered songbird species, a 'green technology park', and an eco-farming research and training centre with attached agroforest gardens. Energy on the site is from renewable sources. The aim is that each and all facilities at the Haven serve as unique educational resources in themselves. The site will also be a gateway for visitors to the nearby Leuser Ecosystem and the UNESCO 'Tropical Rainforest Heritage of Sumatra' World Heritage Site.

Objective:

1. Un-releasable orangutans are transferred from holding cages at the SOCP Quarantine and Rehabilitation Centre to a more naturalistic environment on vegetated islands surrounded by water moats, where they will serve as conservation ambassadors for their wild counterparts, and help free up space for other confiscated orangutans.
2. Local and international visitors will gain a better understanding of orangutans, their individuality, intelligence and complexity, an increased appreciation of their plight in the wild, and greater awareness of how their own daily decisions and behavior impacts wildlife and the environment. The target is to educate a minimum of 1,000 visitors (students) during the project period.

Activity:

1. Keeper training.

Newly recruited Orangutan Keepers will be stationed at the nearby SOCP Quarantine and Rehabilitation Center and trained by experienced Keepers and Vets. This will also allow them to get to know the orangutans they will later be caring for Orangutan Haven. The training process will also involve experienced personnel from national and international Zoos, including specialists in positive reinforcement training of orangutans, something considered especially important for the blind individuals.

2. Furnishing and enrichment of the orangutan islands

Each island has access to indoor holding areas within 'orangutan houses'. These allow orangutans to be easily 'switched' and given access to different islands if desired. This activity will help fulfill the enrichment needs of the orangutans by increasing the number and quality of ropes, hammocks and other climbing structures on the islands and in the holding areas.

3. Visitors of all backgrounds engage in tailored education programmes at the Orangutan Haven (focus: local schools).

The Orangutan Haven has setup and trained a new, specialised Outreach and Education team. Educational Modules have been created related to biodiversity and wildlife conservation, animal welfare, and global climate change. The team

will actively carry out outreach activities for community groups and visiting schools from Medan and especially the local area, increasing awareness and concern for orangutans, other wildlife and the environment.

3. Explain in detail the methodology for this project and why it is appropriate. If this is a research project, clearly state the research question(s) and how it will be tested. For applied conservation projects, explain how project actions will be undertaken and why the proposed actions are appropriate for addressing the conservation issue identified. If this is a conservation education or professional training project, describe the methods as they relate to the target audience, number of people that will be reached, etc. **LIMIT 7,000 CHARACTERS with spaces**

Background - the Orangutan Haven

The Orangutan Haven covers more than 120 acres of mixed agroforest, just 30 minutes from the major city of Medan and its population of 3 to 4 million people. It lies on a road well-travelled by both residents and tourists seeking recreation outside of the city. Development of the Orangutan Haven is already well advanced. All 9 orangutan islands and associated 'orangutan houses' have been completed, as have a veterinary clinic, staff canteen, keeper's depot and orangutan food store. The islands vary from 400 to 800 m². Additional facilities already completed include a bamboo access bridge and on-site bamboo processing facilities, micro-hydro and solar electricity installations, an ecofarm centre and maintenance building, some public toilets and an impressive new bamboo visitor arrival centre. The orangutan islands are covered in climbing structures and natural vegetation, and surrounded by water moats. More enrichment will be added prior to the orangutans moving in. The islands will enable the orangutans to live a far more natural and enriching life, whilst still being afforded all the care they need. Being in the tropics, natural vegetation will grow fast and eventually cover much of the islands areas, ensuring plenty of shade and areas where the animals can relax. Visitors to the Haven will be able to see them across the moats with no visual barrier between them. In this way, the orangutans will not only have a vastly improved quality of life for the rest of their days, in a far more naturalistic environment, but will also serve as ambassadors for their wild counterparts through their unique educational role.

Context and rationale:

The Sumatran Orangutan Conservation Programme (SOCP), is implemented by the Indonesian non-profit Yayasan Ekosistem Lestari (Sustainable Ecosystem Foundation) and its Swiss partner, PanEco Foundation, under a Memorandum of Understanding with Indonesia's Government. With its mission to conserve viable wild populations of Critically Endangered orangutans in Sumatra, the SOCP deals with all aspects of Sumatran and Tapanuli orangutan conservation including: the confiscation, rehabilitation, and reintroduction of captive orangutans to form new wild populations, education and awareness raising, surveys and monitoring of wild populations, and habitat protection.

The majority of wild Sumatran orangutans reside in the 2.6-million-hectare Leuser Ecosystem and many SOCP programmes focus on this National Strategic Area. The SOCP is also active with field projects in the Batang Toru forests further south, home to the new Tapanuli orangutan species. The SOCP's flagship programme, however, remains its creation of two entirely new, genetically viable and self sustaining wild populations within the species' historical range but outside of its current distribution, through reintroduction programmes in the Bukit Tigapuluh National Park in Jambi province, and the Jantho Pine Forest Nature Reserve in Aceh province. These new populations serve as a 'safety net' or 'back up' should catastrophe befall the remaining, original wild populations.

Since 2001, more than 450 orangutans have been cared for at the SOCP's orangutan Quarantine and Rehabilitation Centre, and over 350 of these have been released to the wild. The centre currently houses around 50 individuals, most of which will also be released to the wild when ready. However, 8 of these orangutans cannot be released to the wild, for disability or other concerns. Leuser, for example, is a large adult male who is blind in both eyes due to being shot 62 times with an air rifle. Dek Nong, an adult female, suffers from a chronic arthritic condition, and Krismon, another large male, spent 19 years in a cage barely larger than his body, and is both physically and psychologically unlikely to ever be able to survive as a wild orangutan. As these individuals could live for another 40 years or more, we want to provide them the best, most naturalistic environment to live in as we can, as opposed to the large, but somewhat sterile metal cages they currently inhabit.

Promoting conservation education and sustainable development

In addition to the welfare of these orangutans themselves, a major focus of the Orangutan Haven is addressing what is arguably the main impediment to effective nature conservation in Indonesia – namely a lack of education and awareness of the importance of biodiversity and the living environment for our own future and sustainable development. Early awareness is of paramount importance, especially at the local level. Education and awareness programmes based at the Orangutan Haven will emphasise the importance of the natural environment and promote more sustainable development. They will increase public awareness and knowledge of the importance of forest ecosystems, not only for

biodiversity, but also for the protection of critical ecosystem services, such as provision of water supplies and mitigation of global climate change. The Haven will provide a unique opportunity to learn about and better understand the problems the Haven's individual orangutans, their wild counterparts, and many other rare and threatened species are facing, as their habitat continues to be fragmented and destroyed, and the killing and capture of animals for trade or as pests continues. It's education programmes will cover wildlife conservation generally, the importance of forests for human welfare and livelihoods, and issues surrounding the illegal wildlife trade. They will also promote sustainable agriculture, architecture, energy and development.

To begin realising the Orangutan Haven's huge potential for education, a program to strengthen and improve the Orangutan Haven educator team has been carried out since mid-2021, in collaboration with several experts from around the world including zoo educators, wildlife biologists and researchers, and more traditional educators from schools and within Indonesia's government. A team of 5 full time education staff has been formed and is actively promoting the haven among schools, universities and among relevant government departments within Medan and the wider region. In collaboration with local schools and universities, and the supporting international team, the first education module has been developed to teach Biodiversity and Conservation. Its content is adapted to the goals of the Haven and its existing facilities. An workshop was also held in late 2022 to socialize the module, in which more than 100 schools from Medan and the surrounding area participated, highlighting the keen interest there is in the Haven. The module is structured in-line with Indonesia's formal national learning curriculum, which aims not only to broaden students' understanding of nature and the environment.

4. If AZA has provided previous funding for this or a related project through its grants programs, summarize relevant findings and identify how they relate to the current proposal. **LIMIT 1,000 CHARACTERS with spaces**

The SOCP (YEL and PanEco) has received one grant in the past from the AZA. It was for USD 27,625 in 2011 from the Conservation Endowment Fund for "Protection of the Sumatran orangutan of the Batang Toru forest through socialisation of forest boundaries and wildlife protection laws". The project worked with local communities to map and mark protected forest boundaries around the Batang Toru ecosystem and socialise laws aimed at preventing the illegal killing and illegal trade in wildlife and the encroachment of protected forests. It was therefore not so closely related to the current project proposal.

5. Describe the timeline in which components of the project will be completed within the one-year project duration. Use of bulleted/numbered lists is encouraged. **LIMIT 1,500 CHARACTERS with spaces**

- Intensive keeper training will be carried out for 6 months. During the first 3 months the keepers will work at the Orangutan Quarantine and Rehabilitation Centre, being trained by the centre's team of keepers and vets, During this time they will also develop relationships with the orangutans that will live at the Haven. The next 3 months the keepers will be on full time duty at the orangutan haven. They will be accompanied by senior keepers from the Orangutan Quarantine and Rehabilitation Centre and will be directly supervised by the PI and a senior SOCP veterinarian.

- New enrichment facilities will be installed on the islands and in the holding areas prior to the move of each orangutan to its new home. new enrichment will include new ropes, hammocks, timber, bamboo etc. and will be continually added to when new items become available. Staff and volunteers will observe all orangutans when first given access to the islands, recording behaviour, enclosure and equipment use on specially designed check sheets. At the end of the project there will be a written "Orangutan Enrichment Program" document as a guide for the animal management team.

- Within the first 6 months the Orangutan Haven education team will establish communication with a minimum of 50 schools around Medan for 'OUH goes to school' activities, and to socialize the modules already created. A minimum of 20 schools will visit Orangutan Haven in the following 6 months period.

6. Define the project team by identifying the personnel included for this project, their roles, qualifications, and the key skills they bring. Discuss the PI and each CI listed on the Cover Sheet and any collaborators (persons actively involved in the completion of the project). Each collaborator's institution should be listed under **Collaborating Institutions or Organizations** on the application Cover Sheet. **LIMIT 2,500 CHARACTERS with spaces**

- Principal Investigator, Ian Singleton, Ph.D., OBE has been leading the SOCP on behalf of the PanEco Foundation since its inception in 2001. Prior to this he was senior orangutan keeper at the Durrell Wildlife Conservation Trust from 1989 to 1996 and then studied wild orangutans in the Leuser Ecosystem for his Ph.D. As such Ian is one of very few, if not the only person to have worked with orangutans in a zoo situation, in the wild, and in the context of conservation/NGO

work. His work with the SOCP has involved rehabilitation and reintroduction, scientific research and surveys, habitat monitoring and protection, advocacy at all levels and education and awareness raising. Ian will be fully responsible for supervising all project planning and the implementation of all project activities.

- Co-Investigator, Ms. Diana Kosmanto, 15+ years' at Yayasan Ekosistem Lestari, working and managing a wide range of different projects, but focussed on landscape management and protection. Diana is skilled at project development and implementation, especially in meeting targets and achieving goal-led outcomes. Her role in this project will include coordinating and supervising the project team in carrying out the planned activities to an optimum level and ensuring efficient and effective resource utilization and management.

In addition to the above, additional key personnel in the implementation of this work will include:-

- Hetty Damanik (YEL), General Manager Orangutan Haven; will support the PI and CI to oversee all ongoing activities within the Orangutan Haven.

- dr(vet). Citrakasih Nente (YEL), Head of Ex Situ Conservation; manage and plan all training activity for ke Keepers, together with the Quarantine Center team.

- Maria Suhatri (YEL), Orangutan Haven Outreach and Education Manager; manage and coordinate the team for planning and implementing environmental education activities and training for local communities.

- Asril Abdullah (YEL), Field Manager-Orangutan Haven, oversee all animal and enclosure management activities at Orangutan Haven.

- Suherry Aprianto (YEL), Construction Manager-Orangutan Haven; oversees all activities related to construction and facility development.

- Arista Ketaren (YEL), Manager-Quarantine and Rehabilitation Centre; will coordinate, oversee and implement all keeper training activities at the Quarantine Center and Orangutan Haven, with the larger keeper and veterinary team, and others.

7. Describe the project's monitoring and evaluation plans. Explain how the goals and objectives of the project will be met, which indicators will be used, and how those indicators will be measured. If this project has an educational or professional training component, the educational impact should be discussed (ideally including impacts on conservation-related knowledge, attitudes/affect, and behavior). Plans may be quantitative or qualitative, and should differentiate between monitoring (ensuring proposed actions are taken) and evaluation (whether the project had the desired impact on the issue or question addressed).

LIMIT 3,000 CHARACTERS with spaces

YEL and PanEco will work closely throughout all stages of the project and maintain overall responsibility for monitoring and evaluation. This will be led by the PI and CI with support from the whole project team. We will develop a detailed M&E plan for each activity that clearly indicates key performance indicators for each objective and activity, including data collection methods and timeline, and roles and responsibilities of personnel. The M&E plan will be discussed in detail at a project "kick-off" workshop and will be revised if and when justified, via regular discussions.

Additional baselines will be finalized at the start of the project to improve the initial indicators and baselines; specifically, these will result from the behavior patterns of the orangutans on the islands, and for the education work, feedback from the local schools. We will also establish a baseline regarding current levels of environmental awareness in the target schools and communities. The team will develop an overall results tracker and use this to record progress against all activities (backed by supporting data and evidence). This will be maintained and updated using a monthly and quarterly reporting system.

Regular narrative reports will be produced that align with the M&E plan and include progress reporting on each objective/activity in the results tracker and providing further qualitative detail. Project teams will also carry out routine coordination meetings to discuss progress of the activities, reviewing each achievement, and if necessary, adapting implementation as required.

Supported by in-country monitoring and reporting, the PI and CI will prepare and submit regular reports to AZA at agreed intervals, working closely with the entire team implementing the project.

8. Explain and identify the means and timeline of how the key results and lessons of the project will be disseminated and shared. Key internal and external audiences should be identified. **LIMIT 1,500 CHARACTERS with spaces**

The results and lessons learned from all activities of the Orangutan Haven will be widely disseminated by various means. The PI speaks regularly to a diverse range of audiences and both the PI and CI will actively participate in various national and international conferences. These may include the International Primatology Society Congress, AZA Annual Conferences and the 2024 Orangutan Husbandry Conference. The education team is also in touch with the International Zoo Educators Association and will almost certainly attend future conferences.

Besides these largely International groups, the number one audience for the Orangutan Haven and dissemination of its achievements should be local and national entities, to increase awareness here in Indonesia.

The educational modules created will be distributed to local schools (Medan City and its surroundings) and the education team will facilitate regular teacher training opportunities to garner further support and build capacity.

Furthermore, the SOCP and Orangutan Haven are both active on social media and developments at the Orangutan Haven are anticipated to be shared widely, both locally in northern Sumatra, within Indonesia, and globally.

9. Have all the necessary permits been obtained for the project?

a) ☒ Yes ☐ No ☐ Not Applicable

If yes, list the permits here and attach one copy of each to your Application email. Attachments should be titled **"Permit #."**

- Permit for Lembaga Konservasi (Conservation Entity) from Ministry of Environment and Forestry of Indonesia

b) If the necessary permits have not yet been obtained, please explain why. **Pending permits must be obtained and submitted to AZA by 15 June 2023.**

10. If research animals are to be purchased for the project, indicate and justify the destination of the animal(s) after completion of the research. **LIMIT 750 CHARACTERS with spaces**

11. If this is a multi-year project, identify the funding strategy for subsequent years. **LIMIT 750 CHARACTERS with spaces**

The Orangutan Haven and its education programmes are intended to be long-term and run indefinitely. Once orangutans have been safely moved in, we plan to "soft open" the Orangutan Haven to limited numbers of paying visitors. This will help offset some of the management costs. School visits will also be paid for by those schools that have a budget to cover costs. In the longer term we hope to build a major new restaurant at the site and develop merchandise and organic produce from agriculture, all of which will add to revenues. The goal of the Haven is not for profit, but to cover management costs of the Haven itself, and hopefully in the longer term to help achieve sustainable funding to support some of our other conservation work

12. **Past AZA Grant Support.** If Principal or Co-Investigators listed on the Cover Sheet have received previous AZA grant support (i.e., CGF or SAFE granting program), complete the following (required).

a) Name of Investigator: Ian Singleton Year of Award: 2011 Amount of Award: USD 27625

Project Title: Protection of the Sumatran Orangutans of the Batang Toru forest through socialisation of forest boundaries and wildlife protection laws (CEF funded).

Were all required reports (annual/final) submitted?

☒ Yes ☐ No ☐ Not yet due / Other (briefly explain)

b) Name of Investigator: Year of Award: Amount of Award:

Project Title:

Were all required reports (annual/final) submitted?

☐ Yes ☐ No ☐ Not yet due / Other (briefly explain)

Note: If additional awards need to be included, add their information to a separate document titled “**Past AZA-Funded Projects**” and include it as an attachment with your Application email.

2023 AZA CONSERVATION GRANTS FUND

Project Budget

BUDGET CYCLE

All funding requests from CGF must be for a maximum period of one year only. Funding decisions are announced in early September and expenses incurred prior to the award date will not be covered by CGF funds. CGF funds are to be used within one year from the project start date and forward.

DETAILED BUDGET

A detailed budget sheet is provided below and information should be separated into CGF and non-CGF costs. List under each category the budget items and method of calculation for each (e.g., 2 persons x 10 days x \$25/day), as well as probable sources of support. The following should be listed as **separate** budget items:

- airfares
- lodging
- vehicle rental (automobiles, planes, boats)
- fuel
- per diem
- equipment over \$500
- supplies, services (lab analyses, editing)
- pharmaceuticals
- shipping/postage
- printing
- personnel costs

CGF does not fund the following: Tuition, university fees, or fringe benefits associated with graduate students or other project personnel; administrative costs (including institutional overhead and submission costs for the publication of journal articles); travel unrelated to completion of the project (conference presentation expenses, travel to meetings, etc.); planning meetings that define, rather than implement, conservation goals.

CGF does not fund salaries for project personnel other than graduate students, technicians, and start-up positions established solely for the purpose of completion of the project.

Note: Recipients of CGF grants are obligated to inform AZA (CGF@aza.org) of any pending or overlapping grants received. If such grants are received, AZA's Scientific Advisory Committee may recommend that the award amount be reduced or refunded.

Note: If additional budget items need to be included, add this information in a separate document titled "**Additional Budget Items**" and include it as an attachment with your Application email.

Budget Items Form:

Budget Item	Method of Calculation (e.g., 2 persons x 10 days x \$25/day)	CGF- Requested Amount	Non-CGF Requested Amount (if applicable)	Date Expected from Non-CGF Source (if applicable and not yet received)	Name of Non-CGF Source (e.g., Grant Fund, Matching)	Total Expense (CGF+Non-CGF)
PI	1 person x 12 month	\$0	\$10,000	1 January 2024	PanEco Foundation	\$10,000
CI	1 person x 12 month	\$0	\$5,000	1 January 2024	Orangutan Coffee Project	\$5,000
General Manager	1 person x 12 month	\$2,000	\$2,000	1 January 2024	PanEco Foundation	\$4,000
Head ExSitu	1 person x 12 month	\$0	\$3,000	1 January 2024	PanEco Foundation	\$3,000
Outreach and Education Manager	1 person x 12 month	\$2,000	\$1,000	1 January 2024	PanEco Foundation	\$3,000
Field Manager	1 person x 12 month	\$1,000	\$2,000	1 January 2024	PanEco Foundation	\$3,000
Construction Manager	1 person x 12 month	\$1,000	\$2,000	1 January 2024	PanEco Foundation	\$3,000
Quarantine Manager	1 person x 12 month	\$0	\$4,000	1 January 2024	PanEco Foundation	\$4,000
Animal Keeper	4 person x 12 month	\$4,000	\$8,000	1 January 2024	PanEco Foundation	\$12,000
Enrichment materials and installation	9 island x 2 unit	\$5,000	\$0			\$5,000
Domestic travel for the team	1 team x 12 month	\$2,000	\$0	1 January 2024	PanEco Foundation	\$2,000
Outreach and education materials (booklets, flyers, etc..)	1 package x 12 month	\$3,000	\$0			\$3,000
		\$	\$			\$

	TOTAL PROJECT BUDGET	\$20,000	\$37,000			\$57,000

	(round to nearest whole dollar)					
--	------------------------------------	--	--	--	--	--

BUDGET JUSTIFICATION

State why each item listed in the Budget Items Form costs what it does and indicate how each item relates to the proposed scope of work. Sufficient detail should be provided to address any potential reviewer concerns with respect to cost and need. If the lifespan of equipment costing over \$500 exceeds that of the grant period, detail and justify who will assume ownership of the item. **LIMIT 2,500 CHARACTERS with spaces**

- Personnel: US\$ 10,000 of the key-personnel cost is requested in this proposal to support contributions from other sources. US\$ 4,000 of this amount will contribute to the salaries of the new keepers. YEL and PanEco are committed to fully supports the full salary of the PI, CI and Head of EX-Situ, beside partly-supporting the other project personnel costs, to a total amount of US\$37,000 for this project.

- Enrichment: US\$5,000 is requested to purchase ropes, clamps and other climbing facilities and their installation.

- Outreach and education materials: US\$ 3,000 funds are requested to support creation and printing of education materials (e.g. modules) and education signage to be located around the orangutan islands.

- Domestic travel: Funds are budgeted for US\$ 2,000 to help offset some of the costs over 12 months of key-personnel travelling between the Orangutan Haven and the YEL base in Medan, without which none of the work would be possible. This amount will also support the travel of the education team when visiting different schools in the area.

PERIZINAN BERUSAHA BERBASIS RISIKO

IZIN : 91203141521170006

Berdasarkan Undang-Undang Nomor 11 Tahun 2020 tentang Cipta Kerja, Pemerintah Republik Indonesia menerbitkan Perizinan Berusaha Lembaga Konservasi untuk kepentingan umum kepada Pelaku Usaha berikut ini:

- | | |
|--|--|
| 1. Nama Pelaku Usaha | : PT ORANG UTAN HAVEN |
| 2. Nomor Induk Berusaha (NIB) | : 9120314152117 |
| 3. Alamat Kantor | : JALAN BUNGA SEDAP MALAM IX NOMOR 3, Desa/Kelurahan Sempakata, Kec. Medan Selayang, Kota Medan, Provinsi Sumatera Utara,
Kode Pos: 20132 |
| 4. Status Penanaman Modal | : PMDN |
| 5. No. Telepon | : 0614514360 |
| 6. Kode Klasifikasi Baku Lapangan Usaha Indonesia (KBLI) | : 02209 - Usaha Kehutanan Lainnya |
| 7. Lokasi Usaha | : Jl. Jamin Ginting Km 28,5 Bintang Meriah, Pancur Batu, Deli Serdang, Sumatera Utara, Desa/Kelurahan Bintang Meriah, Kec. Pancur Batu, Kab. Deli Serdang, Provinsi Sumatera Utara,
Kode Pos: 20353 |
| 8. Status | : Telah memenuhi persyaratan |

Lampiran Izin ini memuat daftar persyaratan dan/atau kewajiban sesuai dengan kode KBLI Pelaku Usaha dan merupakan bagian tidak terpisahkan dari dokumen Izin yang dimaksud. Pelaku Usaha dengan Izin tersebut di atas wajib menjalankan kegiatan usahanya sesuai dengan ketentuan peraturan perundang-undangan.

Diterbitkan tanggal: 18 Januari 2023

**a.n. Menteri Lingkungan Hidup dan Kehutanan
Menteri Investasi/
Kepala Badan Koordinasi Penanaman Modal,**

Ditandatangani secara elektronik

Dicetak tanggal: 18 Januari 2023

1. Dokumen ini diterbitkan sistem OSS berdasarkan data dari Pelaku Usaha, tersimpan dalam sistem OSS, yang menjadi tanggung jawab Pelaku Usaha.
2. Dalam hal terjadi kekeliruan isi dokumen ini akan dilakukan perbaikan sebagaimana mestinya.
3. Dokumen ini telah ditandatangani secara elektronik menggunakan sertifikat elektronik yang diterbitkan oleh BSR-E-BSSN.
4. Data lengkap Perizinan Berusaha dapat diperoleh melalui sistem OSS menggunakan hak akses.

PEMERINTAH REPUBLIK INDONESIA

**PERIZINAN BERUSAHA BERBASIS RISIKO
LAMPIRAN**

IZIN : 91203141521170006

Lampiran berikut ini memuat daftar bidang usaha, persyaratan dan/atau kewajiban:

Kode KBLI	Judul KBLI	Klasifikasi Risiko	Persyaratan dan/atau Kewajiban	Bukti Pemenuhan	Lembaga Verifikasi	Masa Berlaku
02209	Usaha Kehutanan Lainnya	Tinggi	Persyaratan: - Dokumen badan usaha, berupa Akta Pendirian dan Akta Perubahan beserta Surat Keputusan Kementerian Hukum dan HAM. - Dokumen lingkungan: Luas usaha - Surat Keputusan Rencana Karya Pengelolaan (SK RKP). - Dokumen Rencana Karya Pengelolaan (RKP) diunggah di persyaratan lainnya. - Surat permohonan yang dilampiri proposal. Untuk template surat permohonan dapat diunduh di sini. - Disain tapak/site plan - Bukti kepemilikan atau legalitas lahan yang sah (dapat berwujud SHGB, SHM atau surat perjanjian sewa-menyewa dengan lampiran SHGB/SHM - Persetujuan Teknis Kepala UPT dilampiri Berita Acara Persiapan Sarana dan Prasarana - Pakta integritas - Rekomendasi Dirjen KSDAE Kewajiban: - Mengelola intensif lembaga konservasi sesuai dengan etika dan kesejahteraan satwa - Membuat Rencana Karya Lima Tahunan (RKL) - Membuat Rencana Karya Tahunan (RKT) - Melakukan pembangunan infrastruktur - Membuat dan menyampaikan laporan triwulan dan tahunan mengenai perkembangan pengelolaan satwa kepada Dirjen KSDAE dengan tembusan kepada kepala Balai Besar/Balai KSDA setempat - Mempekerjakan tenaga ahli sesuai dengan bidangnya; - Membayar pungutan izin sesuai ketentuan peraturan perundang-undangan. - Menyampaikan laporan pengelolaan Lembaga Konservasi secara berkala paling sedikit 1 (satu) kali dalam 1 (satu) tahun	Telah memenuhi persyaratan	Kementerian Lingkungan Hidup dan Kehutanan	25 Tahun

1. Dengan ketentuan bahwa Izin tersebut hanya berlaku untuk Kode dan Judul KBLI yang tercantum dalam lampiran ini.
2. Pelaku Usaha wajib memenuhi persyaratan dan/atau kewajiban sesuai Norma, Standar, Prosedur, dan Kriteria (NSPK) Kementerian/Lembaga (K/L).
3. Verifikasi pemenuhan persyaratan Pelaku Usaha dilakukan oleh Kementerian/Lembaga/Pemerintah Daerah terkait.
4. Lampiran ini merupakan bagian tidak terpisahkan dari dokumen Izin tersebut.

1. Dokumen ini diterbitkan sistem OSS berdasarkan data dari Pelaku Usaha, tersimpan dalam sistem OSS, yang menjadi tanggung jawab Pelaku Usaha.
2. Dalam hal terjadi kekeliruan isi dokumen ini akan dilakukan perbaikan sebagaimana mestinya.
3. Dokumen ini telah ditandatangani secara elektronik menggunakan sertifikat elektronik yang diterbitkan oleh BSR-E-BSSN.
4. Data lengkap Perizinan Berusaha dapat diperoleh melalui sistem OSS menggunakan hak akses.

II. Hak, Kewajiban dan Larangan

1. Pemegang Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum berhak:
 - a. memperoleh jenis satwa sesuai dengan ketentuan peraturan perundang-undangan;
 - b. memanfaatkan hasil pengembangbiakan sesuai dengan ketentuan peraturan perundang-undangan;
 - c. bekerja sama dengan Lembaga Konservasi untuk Kepentingan Umum lain di dalam dan atau di luar negeri dalam rangka pengembangan ilmu pengetahuan, tukar menukar jenis satwa, peragaan dan peminjaman satwa dilindungi di luar negeri untuk kepentingan pengembangbiakan sesuai dengan ketentuan peraturan perundang-undangan;
 - d. memperagakan jenis satwa di dalam areal pengelolaannya;
 - e. memperoleh manfaat hasil penelitian jenis satwa; dan
 - f. menerima imbalan atas jasa kegiatan usahanya.

2. Pemegang Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum wajib untuk:
- a. membuat Rencana Karya Lima Tahun (RKL) Pengelolaan;
 - b. membuat Rencana Karya Tahunan (RKT) Pengelolaan;
 - c. melakukan pembangunan infrastruktur paling sedikit berupa kantor pengelola, fasilitas kesehatan, dan sarana pemeliharaan spesimen;
 - d. melakukan penandaan terhadap spesimen tumbuhan dan satwa liar yang dikelola;
 - e. membuat buku catatan (*studbook* dan/atau *logbook*) masing-masing jenis satwa yang dikelola;
 - f. mengelola intensif lembaga konservasi sesuai dengan etika dan kesejahteraan satwa;
 - g. mempekerjakan tenaga ahli sesuai dengan bidangnya;
 - h. memberdayakan masyarakat setempat;
 - i. melakukan pemeriksaan kesehatan spesimen satwa secara reguler dan pencegahan penularan penyakit;
 - j. melakukan upaya pengamanan dan menjaga keselamatan petugas serta satwa;
 - k. mengoleksi spesies asli Indonesia paling sedikit 50% (lima puluh persen) dari jumlah total koleksi satwa;
 - l. melakukan pengelolaan limbah dan tata kelola lingkungan; dan
 - m. membuat dan menyampaikan laporan secara reguler mengenai perkembangan pengelolaan satwa kepada Direktur Jenderal dengan tembusan Kepala Balai Besar/Balai Konservasi Sumber Daya Alam setempat.

3. Pemegang Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum dilarang untuk:
 - a. memindahtangankan Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum kepada pihak lain;
 - b. memperagakan satwa yang sedang bunting, sakit dan cacat;
 - c. memperjualbelikan satwa dilindungi yang merupakan koleksi;
 - d. melakukan pertukaran satwa tanpa izin;
 - e. melakukan perkawinan satwa dalam satu kekerabatan (*inbreeding*); dan
 - f. menelantarkan satwa atau mengelola satwa yang tidak sesuai dengan etika dan kesejahteraan satwa.

III. Ketentuan Masa Berlaku Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum

Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum ini berlaku sejak tanggal ditetapkan untuk jangka waktu 25 (dua puluh lima) tahun dan dapat diperpanjang berdasarkan hasil evaluasi yang dilakukan oleh Menteri Lingkungan Hidup dan Kehutanan.

IV. Ketentuan Perpanjangan Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum

Permohonan perpanjangan Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum dapat diajukan oleh pemegang izin paling lambat 6 (enam) bulan sebelum jangka waktu Perizinan Berusaha Lembaga Konservasi untuk Kepentingan Umum berakhir dengan persyaratan dan prosedur sesuai dengan ketentuan peraturan perundang-undangan.

2023 AZA CONSERVATION GRANTS FUND

Statement of Institutional Support

One copy of this statement must be **electronically signed** by the institutional CEO/Director using the checkbox below, and submitted as an attachment to the CGF Application email titled **"SIS Institution Name"** for *each* institution or organization that fits one or more of the following criteria:

1. **Has an employee listed as a Principal Investigator or Co-Investigator on the Application Cover Sheet.**
2. **Is listed as a collaborating institution or organization on the Application Cover Sheet.**

By signing this form, all participating institutions, whether participating as a facility or through an employee, take responsibility for: 1) completing their part of the proposed project and 2) obtaining Institutional Animal Care and Use Committee (IACUC)* or Institutional Review Board (IRB)** approvals, if necessary. All accountability for conducting responsible research lies in the hands of each participating institution, not the CGF Scientific Advisory Committee.

All *Statement of Institutional Support* forms must be received as part of the CGF Application Email.

The (*Institution Name*) PanEco Foundation has reviewed the proposal titled (*Proposal Title*) The Orangutan Haven - Improving Welfare of un-Releaseable Orangutans and Fiving Them Role in Ensuring the Survival of Their Species and commits itself to providing the time, resources and/or financial support as stated in the application, and for obtaining IACUC and/or IRB approvals, if necessary, should the proposal be selected for funding by AZA's Conservation Grants Fund.

* Institutional Animal Care and Use Committee (IACUC, for U.S. applicants) or the equivalent oversight committee (for non-U.S. applicants) approval is desirable for any proposal, but is required for any project in which animals are to be involved in invasive procedures and/or procedures that may result in pain, harm, distress, and/or altering of behavior (this includes any time an animal in the wild is sedated or anesthetized). This generally excludes samples obtained during regularly scheduled veterinary or husbandry procedures or emergency medical procedures. IACUC (or the international equivalent thereof) approval is required for both *in situ* and *ex situ* projects. Each institution involved in a project must submit the project proposal to its IACUC (or equivalent) for review. In order to be considered complete, proposals must include the Statement of Institutional Support from each participating institution/organization as recognition of compliance with these IACUC (or equivalent) approval guidelines.

If an institution is not registered as a research facility or similar facility and therefore does not have an IACUC (or equivalent), it needs to become affiliated with a university, zoo, or other body that has an IACUC (or equivalent) in order to obtain approval.

** Any projects supported through CGF funding that involve human subjects must be conducted under the auspices of a federally registered Institutional Review Board (IRB) and be consistent with 45 CFR Part 690: Federal Policy for the Protection of Human Subjects if the work or researchers are based in the USA. For members submitting from outside the USA for projects to be completed entirely outside the USA and its territories may use a process that meets the requirements of the prevailing legislation for protection of human subjects where the principal investigator is based or in the country where data collection will occur, whichever is more stringent. We note that all protocols must still conform to the types of protections outlined in 45 CFR Part 690 irrespective of the reviewing organization.

2023 AZA CONSERVATION GRANTS FUND

Statement of SAFE Species Program Alignment

AZA's Conservation Grants Fund awards funds to members to implement SAFE program plans and advance the species program team's priorities. Because of the granting program's alignment with SAFE species programs, coordination with SAFE Species Programs is expected.

Program leaders are asked to submit this form for proposals related to their SAFE species program. To assure program review of relevant submissions, AZA SAFE Program Leaders may also be asked to serve as expert reviewers during the application review process and may express their support for a proposal at that time.

One copy of this statement must be **electronically signed** by the SAFE Species Program Leader using the checkbox below, and submitted as an attachment to the Application email titled "**SOA SAFE Species Program Name**" for *each* SAFE species program relevant to the Application.

All *Statement of SAFE Species Program Alignment* forms must be received as part of the CGF Application Email.

I affirm that, to the best of my knowledge, the proposal titled (*Proposal Title*) The Orangutan Haven - Improving Welfare of un-Releasable Orangutans and Giving Them a Role in Ensuring the Survival of Their Species aligns with and advances the objectives and priorities of SAFE (*Species Program Name*) Orangutan SAFE - Conservation and Communication objectives in support anti-poaching and wildlife trafficking prevention efforts that incorporate orangutan conservation messaging on grounds.
