

Association of Zoos & Aquariums

2023 AZA CONSERVATION GRANTS FUND

Application Instructions

DEADLINE

This 2023 Conservation Grants Fund (CGF) electronic application must be used for all proposals. Completed applications must be submitted via email no later than **5:00 p.m. EDT** on **15 March 2023**. An auto-response email with a time-stamp will confirm receipt of the application.

*Incomplete applications, or applications received after 5:00 p.m. EDT on 15 March 2023, **regardless of cause**, will NOT be eligible for consideration. NO DEADLINE EXCEPTIONS WILL BE MADE.*

MEMBERSHIP

The Principal Investigator (PI) and all Co-Investigators (CIs) *must be individual AZA members* at the Professional Associate, Professional Affiliate, Professional Fellow, or Student level. Institutional membership does not count as individual membership and individual members at the Friend level are not eligible. Other participants actively involved in the completion of the project should be listed as collaborators and are not required to be AZA members. To apply for membership, visit <https://www.aza.org/individual-membership>.

FUNDING TIMELINE

All CGF projects must be completed within 12 months. CGF grants are intended to serve as seed money to attract additional funding and proposals should request funds only for this one-year period. Identical components of a project will not be funded for more than two grant cycles; however, funding requests for different components of the same project may be applied for in subsequent grant cycles.

CGF proposals undergo a two-tiered review process, outlined at <https://www.aza.org/cgf-selection-process>. Applicants will be notified of funding decisions in early September 2023 and funds will be available 2 October 2023. CGF funds can only be used for proposal expenses incurred on or after the award date. Expenses incurred prior to the award date will not be covered by CGF funds.

APPLICATION GUIDELINES

The application and all supplemental forms are posted online at: <http://www.aza.org/cgf-information-for-applicants/>. These documents contain form fields that must be completed and submitted via email to: CGFapp@aza.org. *All application materials must be in electronic format. No hard copies of any application materials will be accepted.*

It is strongly recommended that you save a copy of your completed application and supplemental forms as a backup. Only completed applications, submitted by the deadline defined above, will be reviewed. Applicants will be informed electronically if their application is incomplete.

APPLICATION INSTRUCTIONS AND CHECKLIST: All completed application materials must be submitted **in one email** by the deadline identified above and include the following:

Application: The application is one document consisting of the three sections outlined below. All sections must be complete in order for the application to be considered complete. The application must be submitted as a Microsoft Word document titled **"Application"** and attached to your Application email.

Applications submitted in Portable Document Format (PDF) will NOT be eligible for consideration. NO EXCEPTIONS WILL BE MADE.

Note that “spell checker” and “track changes” functions cannot be used in this form. AZA strongly recommends that applicants compose the content for their application in a separate document to make use of these features, and then copy and paste the final text into the form fields. When composing in a separate document, be aware of character limitations. If the copied text exceeds the character limit when pasted into a form field, *all text exceeding the character limitation will be cut off and will not appear in the final proposal.* Character limits include spaces.

Also note that certain formatting such as italics, bold, and underlining, is unavailable due to the application format. AZA recommends the use of numbering and spacing to emphasize important points in the text.

- ☒ **Cover Sheet.** Fill in the text fields for the project title, amount requested, and PI and CI information. Choose *two* project categories from the given list and identify the SAFE species that is (are) the focus of the project. Include a project abstract of 1500 or fewer characters.
- ☒ **Project Proposal.** Text fields are provided for responses to questions 1-12. Fields have a limit on the number of characters that may be used to keep the application concise. Character limits, including spaces, are stated following each question. If a question is not applicable to your proposal, write “N/A” in the field but *do not leave any form fields blank*, as this may delay processing of your application.
- ☒ **Budget.** Required budgetary information includes:
 - ☒ Detailed Project Budget. Detail how the budget will be allocated to specific items and indicate which funding source will pay for each item. State the total project budget, the amount requested from CGF, and other financial support applied for or received. Each of these amounts should reflect the one-year duration of the project. Funding decisions are announced in early September and CGF funds are to be used for work from the announcement date forward. Expenses incurred prior to the announcement will not be covered by CGF funds.
 - ☒ Budget Justification. Provide an explanation of why specific major items are essential to the project and reasonable in cost.

Required Attachments: The following must be attached to your Application email:

- ☒ **Curricula Vitae (CV).** A CV is required for each PI and CI listed on the Cover Sheet and must follow the format stated in these guidelines. CVs must not exceed two letter-sized (8.5 by 11 inch) pages each and must be typed in a legible font size (12 point recommended); each side of the paper counts as one page. CVs may be attached for collaborators but are not required. Each CV must be submitted as a separate document entitled, “**CV Investigator’s Last Name.**” CVs *exceeding the maximum length will be cut off at the second page.*
- ☒ **Statement of Institutional Support Forms.** Electronically signed *Statements of Institutional Support* from the CEO(s)/Institutional Director(s) (not the COO, General Curator, Vice President, Dean, or Department Director) of the PI’s institution and **each** CI institution *and* collaborating institution must be attached to the Application email as separate documents titled “**SIS Institution’s Name.**” The *Statement of Institutional Support* form can be found with the rest of the Application materials on the AZA website identified above.

Applicants wishing to include support letters from entities *other than* PI and CI institutions, collaborating institutions may submit such items as appendices.

Letters of support from PI and CI institutions and collaborating institutions will not be accepted in lieu of the *Statement of Institutional Support* form.

- ☒ **Statement of SAFE Species Program Alignment Forms.** Electronically signed *Statements of SAFE Species Program Alignment* from the program leader of relevant SAFE species program(s) must be attached to the Application email as separate documents titled “**SOA SAFE Species Program Name.**” The *Statement of SAFE Species Program Alignment* form can be found with the rest of the Application materials on the AZA website identified above.

Letters of support/endorsement from AZA Programs (Taxon Advisory Groups, Species Survival Plans®, SAFE) are **not** accepted, although coordination with AZA SAFE Programs is expected and should be described in Question 1. To assure program review of relevant submissions, AZA SAFE or Animal Program Leaders may serve as expert reviewers in the application review process and may express their support for a proposal at that time.

- ☒ **Permits.** If permits are required to complete your proposed project, you must attach a copy of each to your Application email. Each permit attached to the Application email must be titled “**Permit #.**” *If you are not able to obtain a required permit before submitting this proposal, you must submit it by 15 June 2023 to ensure award eligibility.*
- ☐ **Proposal Resubmission Form.** If a proposal for this project was previously submitted for AZA grant funding (i.e., CGF or SAFE granting program) and rejected, the revised proposal *must* include a completed *Proposal Resubmission Form* as an attachment on the Application email. This attachment must be submitted as a Microsoft Word document titled “**Resubmission Form**” and attached to your Application email. *Resubmission forms submitted in Portable Document Format (PDF) will not be accepted.* The form can be found with the rest of the Application materials on the AZA website identified above.

Note: Proposals that fail to provide all items identified in the above checklist in the correct format will not be reviewed.

Non-Required Attachments: The following attachments to your Application email are optional:

- ☐ **Citations (recommended).** Citations/references for statements made in the Application should be included in a separate document titled “**Citations**” and attached to the Application email.
- ☐ **Appendices.** Appendices are allowed, but may only *clarify*, and not *supplement*, information in the narrative. For example, photos or diagrams would be acceptable, but not videos, publications, or SAFE species program plans. Appendices must be attached to the Application email titled “**Appendix #.**”

Note: Appendices that do not adhere to these guidelines will be removed from the proposal prior to review.

SUBMISSION INSTRUCTIONS

By submitting your application, you agree, if funded, to abide by the Grant Terms and Conditions posted on AZA’s website at <http://www.aza.org/cgf-information-for-applicants/>.

Proposals must be submitted electronically using the 2023 Application and related forms via a **single email, with the proposal title as the subject line**, to CGFapp@aza.org no later than 5:00 p.m. EDT on 15 March 2023. Hard copies of any application materials or applications received after this deadline will not be accepted regardless of cause.

AZA's email system accepts messages up to 8 MB in size. In cases when applications are too large to be accepted in one email, AZA will accept the application submission in two separate emails, provided that the same proposal title is identified in the subject line of each.

The 2023 Application email **must** include the following attachments

- Application (this completed form);
- CVs for each Principal and Co- Investigator(s);
- Statements of Institutional Support for each PI and CI institution and collaborating institution;
- Statement(s) of SAFE Species Program Support; and
- A Proposal Resubmission form, if applicable.

The Application email may also include citation and appendices attachments.

Auto-response emails will be sent to applicants confirming receipt of the application package. If an auto-response is not received, please resubmit the application. If an applicant submits more than one proposal, the person should ensure that an auto-response was received for *each* submission. If submission problems arise, contact the AZA office at 301-562-0777. If you submit your application after the 5:00 p.m. deadline, you may still receive an auto-response from the Application inbox; however, your proposal will not be reviewed.

Applications which fail to follow submission instructions or are time-stamped after the deadline will not be considered and applicants will be notified that their application is inadmissible.

APPLICATION ASSISTANCE

The CGF website (<http://www.aza.org/cgf-information-for-applicants/>) contains a wealth of information to help applicants compose a competitive proposal.

Proposals received before 8 March will be reviewed by AZA staff to ensure that the application is completed correctly. Early submission allows time for AZA staff to inform applicants if problems are noted in time for resubmission. Please note that AZA staff does not review early proposals for content.

2023 AZA CONSERVATION GRANTS FUND
Cover Sheet

Project Number:
For AZA use only

Title of Project: Orangutan pre-release island in East Kutai Regency, East Kalimantan, Indonesian Borneo.

Amount Requested: \$17,092 (round to the nearest whole dollar)

Project Start Date: 1 November 2023

End Date: 1 November 2024

(CGF funding is for one year only, beginning no earlier than the award date)

Investigators: Each Principal Investigator (PI) and Co-Investigators (CI) *must be an individual AZA member at the time of application* at the Professional Associate, Professional Affiliate, Professional Fellow, or Student level. Other participants should be listed as collaborators on this form.

A Curriculum Vitae (CV) is required for each PI and CI, and a Statement of Institutional Support (SIS) form is required for each PI and CI Organization.

1. Principal Investigator (PI) Name and Title:

CV Attached? ☒ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (required; available at: <http://www.aza.org/cgf-information-for-applicants/>). ☒

Individual AZA Member Number: (required)

Institution/Organization:

Statement of Institutional Support Form Attached? ☒ (required)

Institutional Address:

Phone:

E-mail:

2. Co-Investigator (CI) Name and Title:

CV Attached? ☐ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (available at: <http://www.aza.org/cgf-information-for-applicants/>). ☐ (required)

Individual AZA Member Number: (required)

Institution/Organization:

Statement of Institutional Support Form Attached? ☐ (required)

Institutional Address:

Phone:

E-mail:

3. Co-Investigator (CI) Name and Title:

CV Attached? ☐ (required – no more than 2 pages)

Checking this box indicates agreement to the CGF Terms and Conditions, including affirmation that the organization is or will be a program partner of the relevant SAFE species program(s) upon acceptance of an award (available at: <http://www.aza.org/cgf-information-for-applicants/>). ☐ (required)

Individual AZA Member Number: (required)

Institution/Organization:

Statement of Institutional Support Form Attached? ☐ (required)

Institutional Address:

Phone:

E-mail:

Information about additional co-investigators may be included in a separate document titled “**Additional Co-Investigators**” and attached to your Application email.

Collaborating Institutions or Organizations: A collaborating institution is defined as any institution actively involved in the design or completion of the project. Funding institutions *not* actively involved in project design or completion should be listed in the “Grant/Matching Support” section of the Project Budget and need not be listed as collaborators.

List all collaborating institutions below, including the institutions of the PI and CIs listed on the Cover Sheet, as well as those associated with the personnel listed in Question 6, and attach a Statement of Institutional Support form for each collaborating institution to the Application email.

Collaborating Institution Names:

Borneo Orangutan Survival Foundation *Statement of Institutional Support Form Attached?* ☒ (required)

Statement of Institutional Support Form Attached? ☐ (required)

Statement of Institutional Support Form Attached? ☐ (required)

Statement of Institutional Support Form Attached? ☐ (required)

Statement of Institutional Support Form Attached? ☐ (required)

Note: If additional Collaborating Institutions or Organizations need to be included, add their information in a separate document titled “**Additional Collaborators**” and include it as an attachment to your Application email.

Project Categories (choose two that best describe the project):

☐ Animal / Population Management (*Ex situ*)

☐ Conservation Education / Engagement

☐ Animal Health

☒ Field Conservation (*In situ*)

☒ Animal Welfare

☐ Research

☐ Communications / Public Relations

Identify the SAFE species program(s) this project will benefit: Orangutan SAFE

Project Abstract (limit 1,500 characters with spaces):

The Juq Kehje Swen Pre-Release Island is a progressive project that facilitates an important step of reintroducing Bornean orangutans (*Pongo pygmaeus*) native to East Kalimantan back into the wild. This 82-hectare naturally vegetated pre-release island is for orangutans who have been orphaned and/or rehabilitated at BOS Foundation's Samboja Lestari Orangutan Rescue and Rehabilitation Center. Rehabilitated orangutans who qualify for release will first inhabit the pre-release island to test their forest skills before returning to the wild. This is especially important for orangutans who were orphaned at a young age and may have spent up to seven years in BOS Foundation's forest school program (rehabilitation and education program). The pre-release island is an innovative example of how conservation organizations can work together in a collaborative effort between government, non-government and private sectors to accomplish in situ species survival and forest restoration through a well-organized orangutan reintroduction program. The BOS Foundation operates the island with land and resources provided by the oil palm company PT. Nusaraya Agro Sawit (PT. NUSA). This project also coordinatinates with the government division of Conservation of Natural

Resources and Ecosystems of the Ministry of Environment and Forestry of the Republic of Indonesia. Together, these three entities have a memorandum of agreement to carry out all things necessary for the pre-release island operation.

2023 AZA CONSERVATION GRANTS FUND

Project Proposal

1. Describe the overall project and its significance for conservation and/or management. What species, sites, habitats, populations, or questions are targeted or addressed and what critical needs will be met? Explain the project's relevance to the SAFE species' program team's priorities and how it supports implementation of the team's 3-year program plan and existing regional and/or global recovery plans. **LIMIT 5,000**

CHARACTERS with spaces

As the Borneo Orangutan Foundation (BOSF) is the largest orangutan conservation program in the world, many of the Bornean orangutans (*Pongo pygmaeus*) affected by agricultural expansion and human conflict are rescued by BOSF and nursed back to health for return to the wild. The Juq Kehje Swen Pre-release Island project focuses on one step within the overall orangutan rehabilitation process. The BOS Foundation operates the island with land and resources provided by the oil palm company PT. Nusraya Agro Sawit (PT. NUSA). Since 2016, the BOS Foundation has worked with the plantation owners and established an 82-hectare naturally vegetated pre-release island only 10 kilometers away from the 86,593.65-hectare Ecosystem Restoration Concession - Kehje Sewen Forest. The pre-release island's close proximity to the Kehje Sewen Forest, BOS Foundation's East Kalimantan final release site, makes the journey back to the wild much less laborious for the orangutans. The purpose of a pre-release island is to test the forest skills and readiness of rehabilitated orangutans before returning them to the forest. Orangutans who were orphaned at a young age spend approximately seven years in Samboja Lestari's forest school, where they observe and learn species specific behaviors and skills while still under close observation from the BOS Foundation staff. Orangutans have different learning speeds and their progress is assessed on an individual basis. When space becomes available, the release team transfers the candidates 400 kilometers from Samboja Lestari to the Juq Kehje Swen Pre-release Island, where they will live in a forested habitat under close observation from the island staff. The orangutans will stay on the pre-release island until they are ready for their final release into the wild. The information collected from their time on the island will help the staff determine if their health and welfare will be sustainable once released into the Kehje Sewen Restoration Forest. The oil palm concession (PT. NUSA) borders the human-made pre-release island and funds 62% of the project's operating costs. The BOS Foundation covers the remaining 33% of operating costs. This grant will help the BOS Foundation fund their portion of one year's operation cost of the Juq Kehje Swen Pre-release Island project.

"The Orangutan SAFE program moves beyond the goals of the AZA Orangutan Species Survival Plan (SSP), of which the aims is to manage our captive populations, by focusing specifically on the conservation of the wild orangutan population. The Orangutan SAFE Program aims to protect and restore the wild orangutan population and their habitats through public engagement, funding, and field work." - Orangutan SAFE Species Program Goal. A number of Zoos within AZA have supported the Borneo Orangutan Survival Foundation (BOSF) for many years through their individual conservation programs. Between 2020 and 2022, the BOS Foundation received funding from Henry Vila Zoo and Cameron Park Zoo for reintroduction program costs. In addition to this, the Orangutan SAFE program has included the BOS Foundation as one of its main Conservation Program Partners. The Bornean orangutan was designated as Critically Endangered by the IUCN in 2016, owing to a drastic population decline of 80% over three generations (Ancrenaz et al. 2016). This population decline is driven by: habitat loss caused by clearance of rainforest habitat for plantation agriculture, particularly oil palm and paper pulp, consequent forest fires, degradation of peat-swamp forests, and hunting for meat and for the wildlife trade. As of today, the BOS Foundation has released 500 orangutans into their wild home, and 27 wild-born babies have been birthed from rehabilitated and reintroduced orangutan parents.

Orangutan SAFE's Recovery objectives for 2023-2026

Objective

1. Protect and Restore Orangutan Habitat
2. Support Anti-poaching and Wildlife Trafficking Prevention Efforts, Including Rescue, Rehab & Release of Displaced Animals
3. Continue and Enhance Research Related to Orangutan Distribution and Numbers

The BOS Foundation believes that this project, the Juq Kehje Swen pre-release Island, falls under objective #2, Support Anti-poaching and Wildlife Trafficking Prevention Efforts, Including Rescue, Rehab & Release of Displaced Animals. This project is an integral part of the overall reintroduction program currently happening for displaced Bornean orangutans.

2. List the goal(s) and associated objective(s) of the proposed project and the actions that will be taken to achieve them. Goals should describe the desired status in the long-term of the question or problem that the project will address. Objectives should state the immediate results that are necessary to meet the long-term goal(s). Actions should be the specific activities the project will undertake to complete each objective. If the proposal is a request to fund part of a larger project, this section should focus on the part for which CGF funding is being requested during the one-year duration, while also providing some context regarding the larger effort. **LIMIT 4,500 CHARACTERS with spaces**

BOS Foundation has reintroduced 500 rescued orangutans from the orangutan rehabilitation centers in both Central (Nyaru Menteng) and East (Samboja Lestari) Kalimantan into three primary rainforest habitats in Borneo, with many food trees, no existing orangutan population, and few people. Orangutan reintroduction is a complex and lengthy process with evolving protocols and practices employed by the BOS Foundation for more than thirty years. Following earlier reintroductions and a decade-long pause in reintroduction events, new approaches to Bornean orangutan rehabilitation have been developed. These new approaches focus on the Bornean orangutan's extensive early learning process in natural or semi-natural environments. The rescued orphaned orangutans progress through the different levels of Forest School as they grow, learn and master critical forest skills.

Project Goal:

During the next 12 months, the BOS Foundation's primary goal is to successfully release a further 34 orangutans into the wild to fulfill our long-term goal of strengthening the newly created viable wild populations of this critically endangered ape. To ensure long-term conservation success, we believe in the importance of engaging with local communities, local authorities, and, more recently, local companies. The pre-release Island Juq Kehje Swen is a progressive example of how an orangutan conservation organization can work in collaboration with a local extractive company (PT NUSA) to re-stabilize and protect wild orangutan populations. We hope that others will follow this type of engagement in terms of demonstrating best practices scenarios. To date, the total number of orangutans released in the Kehje Sewen forest is 128, with eight deaths and seven wild births recorded.

Project Objective:

To provide rehabilitated orangutans with a suitable environment, high standards of care and welfare, and observation based behavior and health monitoring until they demonstrate an appropriate amount of species-specific behaviors before being transferred into the wild.

Actions

-3 Post-Release Monitoring (PRM) Assistants provided for day-to-day orangutan monitoring, PRMs provide monthly monitoring reports, necessary site protection activities, phenology assessments, monthly medical reports, day-to-day orangutan health monitoring as well as compliance with animal welfare standards.

-3 Animal Welfare Managers are provided to oversee compliance with animal welfare standards in the orangutan release process and to provide substantive and technical advice to the PRM team.

-2 Specialists in Best Management Practice for Orangutan Conservation (BMP) are provided for technical inputs to the Camp Coordinator and the teams regarding implementing BMP in the pre-release island. These specialists provide project progress reports (quarterly reports), as well as communication with the management company.

-All BOS Foundation employees and PT NUSA employees operate under strict Covid-19 protocols, which includes operations on the orangutan pre-release island.

Future goal: The future goal for this project is to explore the possibilities of expanding the areas suitable for pre-release and release sites in and around the Kehje Sewen Forest Concession. The BOS Foundation acknowledges that creating a successful future for rehabilitated orangutans cannot be achieved without long-term commitment from local communities and continued collaboration with the Foundation's stakeholders.

3. Explain in detail the methodology for this project and why it is appropriate. If this is a research project, clearly state the research question(s) and how it will be tested. For applied conservation projects, explain how project actions will be undertaken and why the proposed actions are appropriate for addressing the conservation issue identified. If this is a conservation education or professional training project, describe

the methods as they relate to the target audience, number of people that will be reached, etc. **LIMIT 7,000 CHARACTERS with spaces**

In addition to testing preparedness for return to the wild, by the time an orangutan has completed the BOS Foundation's Forest School program they are simply too big for their human caregivers to safely handle them in the same environment as they wait for their wild re-introduction. Without a safe and naturally forested habitat to live in, the alternative would be to hold them in enclosures. Being held in an enclosure for too long can be detrimental to their survival skills and overall well being; it's ideal for them to be transferred to an island at this time.

Logistics: The oil palm company (PT NUSA) generously lends BOS Foundation the land, the infrastructure consisting of a road, a camp, a clinic located outside the island, and any additional staff needed. The BOS Foundation is responsible for running the island and providing the expert staff, field logistics and supplies, monitoring staff equipment, clothing, caring for the orangutans, and maintaining of the orangutan enclosures that the BOS Foundation constructed here for temporary holding of individuals during transportation processes or for emergency treatment. All activities are done alongside a long-running community engagement and habitat protection program while meeting the requirements of the Indonesian government. This kind of collaboration is appropriate for orangutan release because it demonstrates the potential for success other conservation organizations can have when collaborating with the private sector in Indonesia. "Our partnership with the BOS Foundation is our way of supporting sustainable conservation in East Kalimantan. For PT. NAS, sustainable environmental governance is a vital element in the running of our business. We are, therefore, committed to supporting the BOS Foundation's efforts by providing a pre-release habitat for rehabilitated orangutans as the final step before their release to the wild. For us, this partnership proves that a sustainable business can run harmoniously alongside the conservation effort. We hope this can inspire other parties to become actively involved and support the ongoing conservation effort in East Kalimantan" [REDACTED]

Methodology:

1. Before candidates are brought to the pre-release island, the [REDACTED] staff must assess their behavior skills, conduct health tests, and fit them with a radio-tracking transmitter.

[REDACTED] is the Orangutan Rehabilitation Center where orphaned or injured orangutans native to East Kalimantan are rehabilitated and reintroduced back into the wild on a timeline that is based on their individual needs. In total, there are currently 74 males and 53 females being cared for at the [REDACTED] Center. This includes unreleasable individuals, infants, orphans in Forest School, and any emergency medical cases.

2. Island staff transports the apes overland and by longboat to the appropriate release location on the island. Release locations on the island vary depending on the demographic, distribution and established home ranges of the current island residents.

3. Staff will intensively follow them for the first few days post-release. Post-release monitoring is necessary to assess how well the rehabilitated orangutan is adapting to their new environment. This critical step allows the BOS Foundation to evaluate the overall success of their reintroduction program; and, subsequently, review or update management strategies for future releases. It further allows the BOS Foundation to keep detailed records of the ongoing health of the released apes and directly intervene if an individual needs medical attention, a little extra support, or if they need to be taken off the island.

4. Regular phenology surveys are conducted by our Post-Release Monitoring (PRM) teams in the forests where we release orangutans, to ensure there is an adequate supply of natural food. Surveys are carried out in the Kehje Sewen Forest, but also on the Juq Kehje Swen Pre-release Island. Data collected from phenology surveys charts the availability of natural foods for orangutans in the forest and helps us determine which fruits are available throughout the year and in which areas. From a 2019 survey, fruiting trees included *Teijsmanniodendron* sp., *Psychotria* sp., *Sarcotheca* sp., *Melicope glabra*, *Macaranga pearsonii*, *Schima wallichii*, *Vitex trifolia*, *Macaranga gigantea*, *Hypobathrum* sp., *Glochidion rubrum*, and *Litsea firma*. Meanwhile, the flowering trees were *Sarcotheca* sp., *Saurauia* sp., *Neolitsea* sp., and *Pternandra azurea*, indicating a valuable forest area rich in biodiversity.

5. The pre-release island team monitors the orangutan's adaptation to the island for the duration of their stay and has the ability to intervene in case of poor health. This happens through regular feeding and daily monitoring of the island orangutans. The key areas of focus are the orangutan's feeding behavior, social interactions, reproductive behavior, and ranging patterns. The employment of good-quality post-release monitoring is a priority recommendation of the IUCN Best Practice Guidelines for the Reintroduction process of Great Apes.

Miscellaneous operations to consider for Island operation:

6. Routine purchase, storage, and distribution of orangutan food (as per our nutrition programs) consisting of an fruits and vegetables such as banana, starfruit, papaya (leaves and fruit), coconut, sugarcane, tempe, and oranges, etc. The procurement of orangutan food continues to be carried out in collaboration with seven local farmer groups.

7. Monthly routine rapid tests and monitoring of all employee health to monitor COVID-19.

4. If AZA has provided previous funding for this or a related project through its grants programs, summarize relevant findings and identify how they relate to the current proposal. **LIMIT 1,000 CHARACTERS with spaces**
5. Describe the timeline in which components of the project will be completed within the one-year project duration. Use of bulleted/numbered lists is encouraged. **LIMIT 1,500 CHARACTERS with spaces**

As of late December 2022, there are two orangutans (Jonas, and Muhadi) housed in [REDACTED] i Quarantine who have been selected for immediate transport to the pre-release island. Information of subsequent transfers to the pre-release island will be provided in the progress report if the project is selected for funding.

From November 2023 - November 2024, the following will be carried out:

- enclosure and monitoring equipment maintenance
- maintenance of long boats, engines and motorbikes used for observation and orangutan transport
- orangutan transport as needed for translocation of new or graduating residents and/or translocating emergency medical cases to and from the island.

- phenology assessments of the island

- daily food deliveries to the island

- two program monitoring and evaluation assessment visits from Headquarters

- Covid-19 tests for employees (antigen rapid test every three months, total 16 person)

- Annual staff health checks for 18 person

- annual meeting for the socialization of the pre-release island partnership project to local and national stakeholders.

*Clarification statement: 62% of the components listed above are funded by the oil palm company. PT NUSA lends BOS Foundation the land and funds all of the infrastructure costs, transportation costs for visiting the island to evaluate the project (question 7), as well as any additional support staff needed.

6. Define the project team by identifying the personnel included for this project, their roles, qualifications, and the key skills they bring. Discuss the PI and each CI listed on the Cover Sheet and any collaborators (persons actively involved in the completion of the project). Each collaborator's institution should be listed under **Collaborating Institutions or Organizations** on the application Cover Sheet. **LIMIT 2,500 CHARACTERS with spaces**

- 1 Program Manager. Oversees project implementation, provides substantial advice regarding the strategic aspect (approaches or methods of activities implemented, stakeholders dynamics, etc.), as well as technical advice if necessary.

- 1 Best Management Practice (BMP) for Orangutan Conservation Specialist. BMPs are responsible for best management practice implementation in the pre-release island; provide technical inputs for the Camp Coordinator and the teams regarding the implementation of BMP in the pre-release island, provide materials for the project progress report (quarterly report), as well as management representative to communicate with the management company.

- 1 Animal Welfare Manager. Oversees compliance with animal welfare standards in the orangutan release process, provides substantive and technical advice to PRM team regarding the compliance.

- 1 Camp Coordinator. Responsible for pre-release monitoring activities, day-to-day released orangutan monitoring, routine camp management, provides monthly monitoring report to Program Manager, and other necessary site protection activities.

- 1 Veterinarian. Responsible for animal welfare and health activities, day-to-day orangutan health monitoring as well as overseeing compliance of animal welfare standard and Covid-19 protocols in orangutan pre-release island, provides substantive and technical advice to PRM team regarding the compliance, routine clinic management, and provides monthly medical report to Camp Coordinator.

- 2 Post-Release Monitoring (PRM) Assistants. Implement day-to-day monitoring implementation, routine monitoring, phenology, and other necessary assignments related to post-release monitoring.

- Supporting Staff. Support staff are provided by the oil palm company as needed. Support day-to-day camp management; maintenance of the camp building, vehicles and equipment. Including the implementation of the reforestation process in degraded project sites, nursery development, seedlings production as well as the maintenance of seedlings, planting sites preparations, planting activities and routine maintenance of the plants planted.

- 1 Camp Cook. Support camp personnel's logistic and food supplies.

7. Describe the project's monitoring and evaluation plans. Explain how the goals and objectives of the project will be met, which indicators will be used, and how those indicators will be measured. If this project has an educational or professional training component, the educational impact should be discussed (ideally including impacts on conservation-related knowledge, attitudes/affect, and behavior). Plans may be quantitative or qualitative, and should differentiate between monitoring (ensuring proposed actions are taken) and evaluation (whether the project had the desired impact on the issue or question addressed).

LIMIT 3,000 CHARACTERS with spaces

-Twice a year, two staff members from the BOS Foundation (it can be one from HQ and one from Samboja Lestari) visit the Juq Kehje Swen Pre-release Island. They are responsible for collecting data and evaluating the operation of the Post Release Monitoring Team. The data collected will then be processed by the Monitoring and Evaluation (Monev) team in the Bogor HQ, and copies will be sent to the partnering party (██████████). As mentioned in the budget, the monitoring and evaluation visits are carried out every six months, and the costs of travel are funded by the oil palm company.

-The Juq Kehje Swen team annually meets with the oil palm company (██████████) team to workshop the Annual Work Plan. The annual workshop, professional development materials, and transportation is completely funded by ██████████

- The BOS Foundation will continue to maintain its relationship with existing research partners, including universities and university student field projects. These university collaborations offer the BOS employees the opportunity to increase the training and capacity of the core teams

-Each and every stage of the rehabilitation process is key to understanding and implementing successful reintroduction practices for rehabilitated orangutans. The data from every release, whether it's on the pre-release island or in the wild forest, expands our knowledge of longer-term success rates, home ranges, dispersal, reproduction and infant development. It is important for release sites to maximize the success of the newly reintroduced orangutans whilst safeguarding those orangutans already successfully reintroduced and settled in established home ranges. Post-release monitoring is necessary to assess how well the rehabilitated orangutan is adapting to their new environment. This critical step allows the BOS Foundation to evaluate the overall success of the reintroduction program and, subsequently, review or update management strategies for future releases.

8. Explain and identify the means and timeline of how the key results and lessons of the project will be disseminated and shared. Key internal and external audiences should be identified. **LIMIT 1,500 CHARACTERS with spaces**

Each time orangutans are released into the wild, the BOS Foundation produces a public news article on its website describing the orangutan's story and its journey to freedom. Every time an orangutan release is in collaboration with a private sector, i.e, a bank or palm oil company, BOS Foundation uses these publications to publicly acknowledge and thank the investors. These public collaborations are setting positive examples around the country of how Indonesian non-government organizations can get support not only through international charities but also from their own peers and local businesses.

9. Have all the necessary permits been obtained for the project?

a) ☒ Yes ☐ No ☐ Not Applicable

If yes, list the permits here and attach one copy of each to your Application email. Attachments should be titled **"Permit #."**

Permit #1 is a MOU between ██████████ and ██████████ describing that ██████████ lends ██████████ their land to use as a pre-release island, dating 2016-2021

- b) If the necessary permits have not yet been obtained, please explain why. **Pending permits must be obtained and submitted to AZA by 15 June 2023.**

The next 10 year MOU is currently being signed and will be available upon request if necessary

10. If research animals are to be purchased for the project, indicate and justify the destination of the animal(s) after completion of the research. **LIMIT 750 CHARACTERS with spaces**

11. If this is a multi-year project, identify the funding strategy for subsequent years. **LIMIT 750 CHARACTERS with spaces**

Each year, the cost of operating the pre-release island project is a joint effort between the BOS Foundation and the oil palm company [REDACTED] covers 62% of the overall project budget, the BOS Foundation is responsible for the remaining 38%. The BOS Foundation receives ongoing support through its official partners: BOS-USA, BOS-UK, BOS Australia, BOS Germany, and BOS Switzerland. These official BOS chapters are registered charities in their respective countries, and their mission is to exclusively fundraise for the BOS Foundation in Indonesia. Together BOS Foundation is supported year-round by these fundraising entities located around the world, all with different strengths and all located in separate markets.

12. **Past AZA Grant Support.** If Principal or Co-Investigators listed on the Cover Sheet have received previous AZA grant support (i.e., CGF or SAFE granting program), complete the following (required).

a) Name of Investigator: Year of Award: Amount of Award:
Project Title:
Were all required reports (annual/final) submitted?
☐ Yes ☐ No ☐ Not yet due / Other (briefly explain)

b) Name of Investigator: Year of Award: Amount of Award:
Project Title:
Were all required reports (annual/final) submitted?
☐ Yes ☐ No ☐ Not yet due / Other (briefly explain)

Note: If additional awards need to be included, add their information to a separate document titled “**Past AZA-Funded Projects**” and include it as an attachment with your Application email.

2023 AZA CONSERVATION GRANTS FUND

Project Budget

BUDGET CYCLE

All funding requests from CGF must be for a maximum period of one year only. Funding decisions are announced in early September and expenses incurred prior to the award date will not be covered by CGF funds. CGF funds are to be used within one year from the project start date and forward.

DETAILED BUDGET

A detailed budget sheet is provided below and information should be separated into CGF and non-CGF costs. List under each category the budget items and method of calculation for each (e.g., 2 persons x 10 days x \$25/day), as well as probable sources of support. The following should be listed as **separate** budget items:

- airfares
- lodging
- vehicle rental (automobiles, planes, boats)
- fuel
- per diem
- equipment over \$500
- supplies, services (lab analyses, editing)
- pharmaceuticals
- shipping/postage
- printing
- personnel costs

CGF does not fund the following: Tuition, university fees, or fringe benefits associated with graduate students or other project personnel; administrative costs (including institutional overhead and submission costs for the publication of journal articles); travel unrelated to completion of the project (conference presentation expenses, travel to meetings, etc.); planning meetings that define, rather than implement, conservation goals.

CGF does not fund salaries for project personnel other than graduate students, technicians, and start-up positions established solely for the purpose of completion of the project.

Note: Recipients of CGF grants are obligated to inform AZA (CGF@aza.org) of any pending or overlapping grants received. If such grants are received, AZA's Scientific Advisory Committee may recommend that the award amount be reduced or refunded.

Note: If additional budget items need to be included, add this information in a separate document titled "**Additional Budget Items**" and include it as an attachment with your Application email.

Budget Items Form:

Budget Item	Method of Calculation (e.g., 2 persons x 10 days x \$25/day)	CGF- Requested Amount	Non-CGF Requested Amount (if applicable)	Date Expected from Non-CGF Source (if applicable and not yet received)	Name of Non-CGF Source (e.g., Grant Fund, Matching)	Total Expense (CGF+Non-CGF)
1. Strengthening of Collaboration and JKJ7 Management		\$	\$			\$
a.JKJ7 Annual Work Plan (RKT) Workshop to discuss RKT	1 unit	\$	\$167			\$234
Transportation (local for 4 person)	4 units		\$67			
b. Compliance of JKJ7 Legality and Formality Aspects Drafting of Environment Management and Monitoring (ind: UKL/UPL) reports	1 unit	\$	\$333			\$333
c.Training & Workshop Health test (PCR) round trip for 2 person	4 units	\$	\$400			\$833
Transportation in Jakarta (local) round trip for 2 person	4 units		\$67			
Transportation Samarinda - Muara Wahau round trip for 2 person	4 units		\$200			
Workshop	1 unit		\$167			
d. Regular Monitoring and Evaluation on JKJ7 Partnership Project		\$	\$			\$2800
Health test (PCR) round trip for 2 person (2 times/year)	4 units	\$400				

Transportation in Jakarta (local) round trip for 2 person (2 times/year)	4 units	\$133				
Transportation Jakarta - Samarinda (air fare) round trip for 2 person (2 times/year)	4 units	1,067				
Transportation Samarinda - Muara Wahau round trip for 2 person (2 times/year)	2 units	\$667				
Food and accommodations for 2 person, 4 days (2 times/year)	16 packages	\$533				
2. JKJ7 Utilization of Orangutan Pre-release Island		\$	\$			\$
a.Orangutan Transfer to JKJ7		\$817	\$			\$817
Monitoring equipment						
b. Orangutan Rehabilitation in JKJ7		\$4,292	\$			\$4,292
Monitoring equipment						
c.Operational Cost Covid-19 tests (antigen rapid test every 3 months, total 16 person)	64 units	\$ \$320	\$ \$320			\$4,373
Annual staff health checks for	16 people	\$1,400	\$2,333			
d.Orangutan Care		\$	\$			\$1,120
Purchase of medical supplies for 1 orangutan	12 months	\$400	----			
Food supplies (5	1800kg	----	\$720			

kg/orangutan/day)						
e.Logistics		\$	\$			\$28,898
Fuel for dirt bike (5 litres/day, IDR10,000/litre)	12 months	\$1,200	---			
Fuel for generator (25 litres/day, IDR12,000/litre)	12 months	---	\$ 7,200			
Dirt bike maintenance (lubricants, etc.)	12 months	\$ 400	---			
Generator maintenance (lubricants, etc.)	12 months	---	\$ 240			
Camp logistics (IDR50,000/person/day, for 16 person)	12 months	\$4,800	\$14,400			
Telecommunication (cell phone credit)	12 months	\$120	---			
Purchase of uniforms, boots, etc. for 16 person	12 months	\$533	---			
3. Personnel Cost of Project Team		\$	\$			\$
a.		\$	\$			\$32,900
PT. NUSA: Head of Sustainability (10% of salary)	14 months		\$1,400			
PT. NUSA: Deputy of Head of Sustainability (20% of salary)	14 months		\$1,400

	TOTAL PROJECT BUDGET (round to nearest whole dollar)	\$17,092	\$78,786			\$95,878

BUDGET JUSTIFICATION

State why each item listed in the Budget Items Form costs what it does and indicate how each item relates to the proposed scope of work. Sufficient detail should be provided to address any potential reviewer concerns with respect to cost and need. If the lifespan of equipment costing over \$500 exceeds that of the grant period, detail and justify who will assume ownership of the item. **LIMIT 2,500 CHARACTERS with spaces**

in the budget the Juq Kehje Swen pre-release island is labeled: JKJ7.

A breakdown of how the pre-release island will be funded for 2024. The total project cost is \$95,878

62% of 95,878 is oil company [REDACTED] responsibility = \$59,444 USD

38% of 95,878 is BOS Foundation's responsibility = \$36,434 USD

An [REDACTED] grant will cover Island employee salaries for 2024, which total \$19,273 USD

The remaining portion of the island operating costs that the BOS Foundation is responsible for are being submitted to the AZA CGF = \$17,092 USD

In 2024 the combined grants of [REDACTED] and AZA CGF (= 36,365) will cover BOS Foundation's operating cost for the Juq Kehje Swen Pre-release Island for one year.

Budget Line Items

1. Strengthening of Collaboration and Juq Kehje Swen Pre-release Island Management

This section refers to the management of the island between the two entities, BOS Foundation and [REDACTED]. The island is on [REDACTED] land and is located in close proximity to the final release forest (Kehje Sewen, about 10 km away.) The island is an 11 to 12 hour journey north of the HQ office in Samarinda. The transportation costs described in Section 1 refer to the occasional 400 km journey by car or by flight to get staff back and forth between HQ, Samboja Lestari and the Juq Kehje Swen Island locations when necessary. In regards to staff training, permits, workshops, and the annual work plan meetings, the cost is financially covered by [REDACTED]. The transportation for Project evaluation are the BOS Foundation's responsibility. Trips to the island from HQ and Samboja Lestari (round trips) are how the BOS Foundation monitors and evaluates the success of the project.

2. Utilization of Orangutan pre-release island

The details listed in the 2nd category are a breakdown of all the necessary tools and supplies required for the island operation in the span of 12 months. 2a) and 2b) refer to the monitoring equipment needed for orangutan observation and transport, such as binoculars, GPS Garmin 62 CSx, digital camera, digital wrist watches, waterproof box, handheld transceivers, laptop, drybags, daypacks, headlamps, battery chargers, stationery for orangutan monitoring, silica gel to keep electronics dry.

3. Personnel Cost of Project Team

The BOS Foundation does not expect the AZA CGF to cover any personnel salaries. The salaries were included in the budget to provide a full picture of how many people are involved, where they are based, and the diversity this one project includes.
